KEY INFORMATION

1. Applicable Code(s) & Regulations For This Project:
   - 2012 IBC (International Building Code With Amendments)
   - 2012 IRC (International Residential Code With Amendments)
   - ICC/ANSI A117.1-2009 (Accessibility required by IBC)
   - 2010 ADA Standards for Accessible Design
   - Delaware State Fire Prevention Regulation 2009
   - 2009 Edition of Life Safety NFPA 101
2. Occupancy Use Group(s): B
3. Construction Type(s): II B
4. Project Description: Campground improvements include new electric & water connections at each RV camping site, new & modified roadways & parking, removal of roadways, pavement of RV parking spots as well as grading and stormwater management. Alternates will be accepted to convert the bathhouse into a camp store & laundry, renovate the contact station and to enclose the power panels.
5. Type Of Construction: Renovation of existing.

LIST OF ALTERNATES

1. Alternate One: Bathhouse Conversion
2. Alternate Two: Contact Station Renovations
3. Alternate Three: Power Panel Enclosures

GENERAL NOTES

1. All work shall be in accordance with applicable state and local building codes and all other governing agencies and regulations.
2. Contractor shall verify all conditions and dimensions in the field prior to commencement of the work. Verify layout in relation to property, benchmarks, and other fixed conditions. Report discrepancies to the Architect immediately upon discovery.
3. Notify Architect of discrepancies regarding the Contract Documents or design intent immediately upon discovery. Contractor shall be responsible for obtaining clarification prior to proceeding with the work or related work.
4. Contractor shall obtain all required building permits and licenses.
5. Contractor shall remove all rubbish and debris from the site during course of project, and dispose of legally off-site.
6. Contractor shall perform all cutting, patching and protection required to complete the work indicated on the Contract Documents.
7. Contractor shall provide all inspections and tests required by state and local authorities including but not limited to mechanical and electrical work. Refer to individual drawings and specifications for additional testing requirements.
8. Unless indicated otherwise in Specifications, products and manufacturers are noted to establish the type and quality of materials to be provided. Contractor may submit proposed substitutions to the Architect for review, per Section 016000 Product Requirements. Contractor shall include costs associated with proposed substitution, including redesign, and alteration of adjacent work to accept substitution.
9. All dimensions are either to face of masonry or the face of stud, unless noted otherwise. Drawings are not to be scaled.
10. Install all equipment and materials per manufacturer's instructions and recommendations unless specifically otherwise indicated, or where local codes and regulations take precedence.
11. Contractor shall provide supervision while any subcontractors or workers are on the job site and shall supervise and direct all work.
12. Contractor shall be solely responsible for all construction means, methods, techniques, sequences, procedures, site safety, and coordinating the work of all trades under the contract.
13. No products containing asbestos or other hazardous materials shall be installed on this project or used during the construction of the project. It shall be the responsibility of the Contractor to certify to the Owner that this requirement has been met. Subcontractors shall verify to the Contractor that no asbestos or other hazardous products are used in their work.
14. Locations of rated fire/smoke separations and/or fire resistive structural protection are shown on documents. Provide complete assemblies to meet fire resistive requirements of the project including protection of structural elements and fire separation assemblies. Maintain the integrity of these assemblies at openings and penetrations including but not limited to fire or smoke dampers in ductwork, light fixture protection, electrical device box ratings, expansion joints, and sealants. Provide this protection by using complete building component systems approved by recognized authorities such as Underwriters Laboratories, Inc., Factory Mutual, or other building code accepted agencies. It is the responsibility of the Contractor to coordinate subcontractors and suppliers to accomplish this work during bidding, procurement, scheduling, sequencing and construction of the project.
15. Delegated Design: When professional design services or certifications related to pre-manufactured structures, systems, materials, or equipment are required by these documents, the Architect/Engineer will specify performance and design criteria that such services must satisfy. The Contractor shall cause such services and certifications to be provided by properly licensed design professional, whose signature and seal shall appear on all drawings, calculations, Shop Drawings, and other related submittals. The Owner and Architect/Engineer shall be entitled to rely upon the accuracy and completeness of those delegated services. The Architect/Engineer will review submittals only for the limited purpose of checking for conformance with the performance and design criteria.

GENERAL NOTES, ABBREVIATIONS & SYMBOLS

DELAWARE DEPARTMENT OF NATURAL RESOURCES AND ENVIRONMENTAL CONTROL

DESIGNED BY: O.D.D.
DRAWN BY: O.D.D.
BUILDING NO.: N/A
DATE: 04\26\2016
SCALE: AS NOTED
SHEET NO.: G-2
PARKS PROJECT #: CH-44
CONTRACT #: 2015-CH-300

PROJECT NOTES

1. THE INTENT OF THIS PROJECT IS TO PROVIDE THE FOLLOWING IMPROVEMENTS AT THE CAPE HENLOPEN CAMPGROUND:
   1.1. CONSTRUCTION OF BACK-IN AND PULL-THROUGH HOT-MIX ASPHALT CAMPER/RV PARKING SITES.
   1.2. CONSTRUCTION OF A ONE-WAY LOOP ROADWAY SYSTEM THROUGHOUT THE CAMPGROUND. THE ROADWAY AND ASSOCIATED IMPROVEMENTS SHALL FOLLOW, AS CLOSELY AS POSSIBLE, THE HORIZONTAL ALIGNMENT AND PATH PROFILE SHOWN ON THE PLANS. MINOR ADJUSTMENT IN THE ALIGNMENT AND/OR PROFILE MAY BE REQUIRED BY THE ENGINEER IN THE FIELD.
   1.3. REMOVAL OF EXISTING EXCESS ASPHALT PAVEMENT.
   1.4. PLACEMENT OF CONCRETE AND/OR HOT-MIX WALKWAYS.
   1.5. CONSTRUCTION OF NEW WATER SERVICE, AND HOSE BIB CAMPER HOOK-UP SERVICE, AS SHOWN.
   1.6. REMOVAL/ABANDONMENT OF EXISTING WATER HOSE BIBS AND UNDERGROUND WATER SERVICE.
   1.7. CONSTRUCTION OF NEW ELECTRICAL CAMPER HOOK-UP SERVICE, AS SHOWN.
2. THESE PLANS WERE DEVELOPED FROM AERIAL SURVEY PROVIDED BY DNREC STATE PARKS. CONTROL POINTS UTILIZED FOR THE AERIAL SURVEY, AND THE ASSOCIATED SURVEY INFORMATION, HAVE BEEN INCLUDED IN THESE PLANS. THE CONTRACTOR IS RESPONSIBLE FOR PROVIDING ALL ADDITIONAL PHYSICAL CONTROL AS REQUIRED TO COMPLETE THE WORK AT NO ADDITIONAL COST TO THE OWNER.
3. EXISTING UTILITIES SHOWN ARE BASED ON THE BEST INFORMATION AVAILABLE AT THE TIME THIS PLAN WAS DEVELOPED. COMPLETENESS OR CORRECTNESS OF THE UTILITIES SHOWN THEREOF IS NOT GUARANTEED. THE CONTRACTOR IS RESPONSIBLE FOR EMPLOYING AN UNDERGROUND UTILITY LOCATOR TO LOCATE AND MARK EXISTING UTILITIES WITHIN THE LIMIT OF DISTURBANCE PRIOR TO BEGINNING CONSTRUCTION.
4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR MINOR RELOCATION OF WATER LINES, YARD HYDRANTS, ELECTRICAL LINES, AND ELECTRICAL PEDESTALS THAT CONFLICT WITH EXISTING FEATURES TO REMAIN, AT NO ADDITIONAL COST TO THE PROJECT, AS DIRECTED BY THE ENGINEER. WORK SHALL INCLUDE, BUT IS NOT LIMITED TO, EXCAVATION/TRENCHING, MATERIALS, AND ALL LABOR.
5. PORTIONS OF THIS CONTRACT ARE TO BE CONSTRUCTED IN ACCORDANCE WITH DELAWARE DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION (STANDARD SPECIFICATIONS) DATED AUGUST 2001 INCLUDING ALL REVISIONS UP TO ADVERTISEMENT OF THIS PROJECT, UNLESS NOTED OTHERWISE IN THESE PLANS OR THE SPECIFICATIONS. ITEMS INCLUDING, BUT NOT LIMITED TO, ASPHALT PAVEMENT, REFER TO THE "STANDARD SPECIFICATIONS" FOR MATERIALS AND METHOD OF CONSTRUCTION. UNLESS NOTED OTHERWISE, THE COST FOR ALL WORK SHALL BE PAID FOR IN THE LUMP SUM PRICE BID FOR THE PROJECT, WHETHER THE INDIVIDUAL SECTION IS INCLUDED IN THE SPECIFICATION PACKET OR NOT.
6. ALL EXCAVATION FOR CONSTRUCTION OF THE PROPOSED ROADWAY SHALL BE IN ACCORDANCE WITH SECTION 202 – EXCAVATION AND EMBANKMENT, OF THE DELDOT STANDARD SPECIFICATIONS.
7. CLEARING AND GRUBBING IS ASSUMED TO EXTEND A MINIMUM OF SIX (6) INCHES BELOW EXISTING GRADE FOR THE LENGTH OF THE PROJECT. CLEARING AND GRUBBING WITHIN THE LIMITS OF DISTURBANCE (LOD) SHALL CONSIST OF CLEARING, GRUBBING, REMOVING AND DISPOSING OF ALL TREES, ROOTS, VEGETATION AND DEBRIS UNLESS OTHERWISE INDICATED, EXCEPT SUCH OBJECT(S) THAT ARE DESIGNATED TO REMAIN.
8. ALL TREE REMOVAL AND TREE TRIMMING WITHIN THE LIMITS OF DISTURBANCE, REGARDLESS OF SIZE, SHALL BE INCIDENTAL TO THE CONTRACT. INDIVIDUAL TREES ARE NOT SHOWN ON THE DRAWINGS BUT MAY BE REMOVED BY THE CONTRACTOR AS NECESSARY WITHIN THE LIMITS OF DISTURBANCE. TREES GREATER THAN 6" IN DIAMETER SHALL BE FLAGGED BY THE CONTRACTOR FOR REVIEW AND APPROVAL BY THE ENGINEER PRIOR TO REMOVAL. THE ENGINEER WILL NOT ACCEPT REMOVAL OF TREES INTENDED TO BE PROTECTED.
9. TREES NOT DESIGNATED TO BE REMOVED SHALL BE PROTECTED FROM CONSTRUCTION EQUIPMENT AND COMPACTION OF SOIL WITHIN THE DRIP LINE BY MEANS OF 3'-0" HIGH SENSITIVE AREA PROTECTION (SAP) FENCE, SEE DNREC DETAIL DE-ESC-3.7.2, SENSITIVE AREA PROTECTION.
10. ENDS OF THE PROPOSED ROADWAY SHALL BE TRANSITIONED AS NECESSARY TO MEET THE EXISTING GRADES OF THE EXISTING PAVEMENT.
11. CROSS SLOPE OF ALL NEW WALKWAYS SHALL NOT EXCEED A SLOPE OF 1:50. LONGITUDINAL SLOPES OF ALL NEW WALKWAYS SHALL NOT EXCEED 1:20.
12. CAMP SITES AND WALKWAYS SHOWN FOR BIDDING PURPOSES ONLY. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LAYING OUT THE CENTER LINE OF CAMP SITES AND ALL WALKWAYS IN THE FIELD FOR APPROVAL OF THE OWNER PRIOR TO STARTING CONSTRUCTION. THE OWNER RESERVES THE RIGHT TO ADJUST THE LOCATION OF THE CAMP SITES AND/OR THE WALKWAYS TO AVOID CONFLICT WITH EXISTING SITE FEATURES INCLUDING, BUT NOT LIMITED TO, TREES AND OBJECTIONABLE SLOPES.
13. THE CONTRACTOR MAY STORE AND/OR STOCKPILE EQUIPMENT AND MATERIALS WITHIN THE PROJECT SITE LIMIT OF DISTURBANCE (LOD) SHOWN ON PLAN.
14. EXCESS EXCAVATED MATERIAL SHALL BE STOCKPILED WITHIN CAPE HENLOPEN STATE PARK AT A LOCATION TO BE DETERMINED BY THE ENGINEER. ANY ADDITIONAL LOCATIONS FOR STOCKPILE/STORAGE AREAS SHALL BE COORDINATED WITH THE ENGINEER AND APPROVED BY THE DNREC SEDIMENT AND STORMWATER MANAGEMENT PROGRAM PRIOR TO THE START OF WORK. ALL STOCKPILE AREAS SHALL BE STABILIZED DURING CONSTRUCTION, AND REDRESSED AFTER CONSTRUCTION IN ACCORDANCE WITH EROSION AND SEDIMENT CONTROL REQUIREMENTS. COST SHALL BE INCLUDED IN THE LUMP SUM PRICE BID FOR THE PROJECT.
15. THE OWNER RESERVES THE RIGHT TO ELIMINATE RV SITES SHOWN ON THESE PLANS. PROPOSED UTILITIES ASSOCIATED WITH ANY RV SITE(S) ELIMINATED BY THE OWNER SHALL ALSO BE ELIMINATED. THE CONTRACTOR SHALL ISSUE A CREDIT FOR ALL RV SITES AND UTILITIES ELIMINATED.
16. THE CONTRACTOR IS ADVISED THAT CONTRACTOR EMPLOYEE PARKING SHALL BE LIMITED TO THE EXISTING PAVED PARK PARKING AREAS OF CAMPGROUND, UNLESS APPROVED BY THE ENGINEER. VEHICLE PARKING SHALL NOT BE ALLOWED ON UNPAVED AREAS.
17. EXISTING BUILDING PAD TO BE CONVERTED INTO OVERFLOW PARKING LOT AS NOTED IN SECTION 12300 – ALTERNATES.
   17.1. POWER SWEEP EXISTING BUILDING PAD WITH TRACTOR MOUNTED ROTARY BROOM TO REMOVE ALL EXISTING DEBRIS, VEGETATION, ETC. TO REVEAL BARE PAD.
   17.2. POWER WASH ALL DEBRIS OUT OF ALL CRACKS TO A MINIMUM DEPTH OF ONE (1) INCH AND APPLY CRACK SEALANT IN ACCORDANCE WITH SECTION 406507 – CRACK SEALING.
   17.3. APPLY BITUMINOUS ASPHALT TACK COAT, ITEM 404501, TO PAD IMMEDIATELY PRIOR TO PLACING ASPHALT OVERLAY.
18. EXISTING ROADWAY TO REMAIN SHALL RECEIVE THE FOLLOWING WORK PRIOR TO PLACEMENT OF ASPHALT OVERLAY:
   18.1. REMOVE AND PATCH DAMAGED SECTIONS OF ASPHALT AS SHOWN ON PLAN SHEET C2.1 – DEMOLITION PLAN, AND AS DIRECTED BY THE ENGINEER. PATCHING SHALL INCLUDE SAWCUTTING EXISTING PAVEMENT, PLACEMENT AND COMPACTION OF TYPE B WARM MIX ASPHALT TO MATCH THE ELEVATION OF THE EXISTING ADJACENT ASPHALT. TYPE B ASPHALT PATCH MATERIAL SHALL BE PLACED AT A THICKNESS EQUIVALENT TO THE THICKNESS OF THE EXISTING ASPHALT OR THREE (3) INCHES, WHICHEVER IS GREATER. TYPE C WMA, SUPERPAVE SHALL BE PLACED AS PART OF THE OVERLAY OPERATION AND NOT INCLUDED IN THE PATCHING OPERATION.
   18.2. POWER WASH ALL DEBRIS OUT OF ALL CRACKS TO A MINIMUM DEPTH OF ONE (1) INCH AND APPLY CRACK SEALANT IN ACCORDANCE WITH SECTION 406507 – CRACK SEALING.
   18.3. CRACKS WIDER THAN ONE (1) INCH IN WIDTH SHALL BE REMOVED BY SAWCUTTING PAVEMENT ONE (1) FOOT ON EACH SIDE OF CRACK AND REMOVING ASPHALT PAVEMENT. PLACE NEW WARM MIX ASPHALT, TYPE B AND COMPACT WITH VIBRATORY PLATE COMPACTOR TO BRING PATCH LEVEL WITH SURROUNDING ASPHALT PAVEMENT. CRACKS SHALL BE IDENTIFIED IN THE FIELD WITH PAINT MARKS IDENTIFYING THE LONGITUDINAL LIMITS OF THE CRACK FOR APPROVAL BY THE ENGINEER. THE PRICE FOR ALL SAWCUTTING, REMOVAL, AND PLACEMENT OF NEW WARM MIX ASPHALT SHALL BE PAID FOR UNDER THE UNIT COST BID FOR THIS WORK.
   18.4. AREAS OF PAVEMENT TO RECEIVE AN OVERLAYMENT THAT CONTAIN RAISED AREAS HIGHER THAN ONE INCH FROM TREE ROOTS, ETC. SHALL BE MILLED TO MATCH THE SURROUNDING PAVEMENT PRIOR TO PLACING THE NEW WARM MIX ASPHALT OVERLAY. THE PRICE FOR ALL MILLING SHALL BE INCLUDED IN THE LUMP SUM PRICE BID FOR THE PROJECT.
   18.5. SWEEP AND BLOW OFF EXISTING ROADWAY WITH TRACTOR MOUNTED ROTARY BROOM AND COMPRESSED AIR TO REMOVE ALL EXISTING DEBRIS, VEGETATION, ETC. TO REVEAL BARE PAVEMENT AND/OR BUILDING PAD.
   18.6. APPLY BITUMINOUS ASPHALT TACK COAT, ITEM 404501, TO EXISTING ROADWAY IMMEDIATELY PRIOR TO PLACING TYPE C WMA OVERLAY.

GENERAL NOTES

1. THE TERM "ENGINEER", "STATE", "OWNER", AND/OR "ARCHITECT" NOTED THROUGHOUT THE CONTRACT PLANS AND SPECIFICATIONS SHALL REFER TO DNREC / STATE PARKS, OR THEIR APPOINTED REPRESENTATIVE. THE TERM "SITE" AND "PARK" MAY BE USED INTERCHANGEABLY THROUGHOUT THESE DOCUMENTS AS A MEANS OF IDENTIFYING CAPE HENLOPEN STATE PARK.
2. THE TERM HOT-MIX ASPHALT MAY BE FOUND WITHIN THESE PLANS AND SPECIFICATIONS. IN ALL CASES, WARM MIX ASPHALT SHALL BE USED IN PLACE OF HOT-MIX ASPHALT.
3. THE CONTRACTOR SHALL PROTECT ALL FEATURES NOT DESIGNATED TO BE REMOVED. DAMAGED ITEMS SHALL BE REPAIRED OR REPLACED AS DIRECTED BY DNREC, AT NO COST TO THE OWNER.
4. THE CONTRACTOR SHALL RESTORE ALL AREAS AFFECTED BY THE CONSTRUCTION SHOWN HEREON AS SHOWN ON THESE PLANS AND SPECIFICATIONS, TO A CONDITION COMPARABLE TO THAT EXISTING PRIOR TO CONSTRUCTION, AND TO THE SATISFACTION OF DNREC.
5. THE CONTRACTOR SHALL PROVIDE NECESSARY FACILITIES, INCLUDING BUT NOT LIMITED TO RESTROOMS, AND CONSTRUCTION TRAILER DURING CONSTRUCTION. PARK FACILITIES SHALL NOT BE USED.
6. THE CONTRACTOR SHALL NOTE THAT IN CASE OF DISCREPANCY BETWEEN THE SCALED AND THE FIGURED DIMENSIONS SHOWN ON THE PLANS, THE FIGURED DIMENSIONS SHALL GOVERN. THE CONTRACTOR SHALL BE RESPONSIBLE FOR CONFIRMING ALL DIMENSIONS.
7. BEFORE EXCAVATION IS STARTED, THE CONTRACTOR SHALL VERIFY THE LOCATION OF ALL UNDERGROUND UTILITIES. ALL EXISTING UTILITIES SHALL BE PROTECTED AND TEMPORARILY SUPPORTED OR RELOCATED AS NECESSARY TO COMPLETE THE WORK IN ACCORDANCE WITH THE PERTINENT OWNER/UTILITY COMPANY REQUIREMENTS. ANY UTILITIES DAMAGED BY THE CONTRACTOR SHALL BE PROMPTLY AND FULLY RESTORED TO THE SATISFACTION OF THE OWNER.
8. THE CONTRACTOR SHALL DESIGNATE A PERSON WHO SHALL BE RESPONSIBLE FOR IMPLEMENTING AND MAINTAINING THE EROSION AND SEDIMENT CONTROL PLANS, A PERSON WHO SHALL BE RESPONSIBLE FOR IMPLEMENTING AND MAINTAINING THE TRAFFIC CONTROL, AND A PERSON WHO SHALL BE RESPONSIBLE FOR WORKER SAFETY. THE PERSON RESPONSIBLE FOR IMPLEMENTING AND MAINTAINING THE EROSION AND SEDIMENT CONTROL PLANS SHALL BE CERTIFIED BY DNREC FOR EROSION AND SEDIMENT CONTROL RESPONSIBILITY (CERTIFIED CONSTRUCTION REVIEWER).
9. THE CONTRACTOR IS RESPONSIBLE FOR SECURING THE AREA WITHIN THE LIMITS OF CONSTRUCTION TO PROHIBIT PUBLIC ACCESS UNTIL COMPLETION OF THE PROJECT. THE CONTRACTOR'S PROCEDURE/METHOD FOR LIMITING ACCESS SHALL BE REVIEWED BY, AND COORDINATED WITH DNREC PRIOR TO THE START OF WORK. THE COST TO INSTALL, RELOCATE, AND MAINTAIN SITE SECURITY SHALL BE INCIDENTAL TO THE CONTRACT.
10. THE CONTRACTOR IS SOLELY RESPONSIBLE FOR OBTAINING OFF-SITE SPOIL AREAS FOR LEGAL DISPOSAL OF EXCESS MATERIAL NOT ACCEPTED BY THE PARK AND/OR UNSUITABLE MATERIALS AS NECESSARY IN ACCORDANCE WITH ALL FEDERAL, STATE, AND LOCAL REQUIREMENTS. ALL COST FOR RECYCLING, TRANSPORTING TO, PROCURING AND UTILIZING THE OFF-SITE SPOIL AREAS ARE TO BE INCIDENTAL TO THE CONTRACT.
11. IN CASE OF CONFLICT BETWEEN THE "MANUFACTURER'S RECOMMENDATIONS" FOR AN APPROVED MATERIAL AND THE GOVERNING "CONTRACT SPECIFICATIONS" FOR THE MATERIAL, THE MORE RESTRICTIVE OF THE TWO SHALL PREVAIL, UNLESS OTHERWISE DIRECTED BY THE ENGINEER.
12. THE CONSTRUCTION PLANS PRESENT A CONCEPT OF THE RELATIONSHIP BETWEEN TRAFFIC CONTROL, EROSION CONTROL, ETC. ANY REVISION TO THE DETAILS OR SEQUENCE SHOWN ON THE CONSTRUCTION PLANS SHALL BE PREPARED BY THE CONTRACTOR ON STANDARD DNREC PLAN SHEETS AND SUBMITTED FOR REVIEW AND APPROVAL BY THE ENGINEER. THE PLANS SHALL BE PREPARED IN ACCORDANCE WITH CURRENT DNREC STANDARDS FOR TRAFFIC CONTROL, EROSION AND SEDIMENT CONTROL (PREPARED BY A CERTIFIED CONSTRUCTION REVIEWER), STORM WATER MANAGEMENT, ETC. AND SHALL BE SIGNED AND SEALED BY A PROFESSIONAL ENGINEER REGISTERED IN THE STATE OF DELAWARE. ALL REQUIRED CALCULATIONS, REPORTS, ETC. SHALL ALSO ACCOMPANY THE SUBMISSION. THE NUMBER OF COPIES REQUIRED TO BE SUBMITTED FOR REVIEW SHALL BE DETERMINED BY DNREC, DEPENDING ON THE NATURE OF THE PROPOSED REVISION. THE CONTRACTOR SHALL NOTE THAT THE REVISIONS TO THE CONSTRUCTION PLANS, AS WELL AS REVIEW TIME BY DNREC, WILL NOT JUSTIFY A DELAY IN THE CONSTRUCTION SCHEDULE. REVISIONS INVOLVING UTILITIES WILL REQUIRE THE COMPLETION OF A UTILITY STATEMENT APPROVED BY THE RESPECTIVE UTILITIES AS PART OF THE PLAN DOCUMENTS. ALL COSTS INVOLVED IN PREPARING THE PLAN REVISIONS SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
13. THESE DRAWINGS DO NOT INCLUDE NECESSARY ELEMENTS OF CONSTRUCTION SAFETY. ALL CONSTRUCTION, INCLUDING EXCAVATION, MUST BE COMPLETED IN ACCORDANCE WITH THE RULES AND REGULATIONS OF THE OCCUPATIONAL SAFETY AND HEALTH ACT, CFR §1926.652(b)(2), AND ALL FEDERAL, STATE AND LOCAL REQUIREMENTS. CONTRACTOR IS SOLELY RESPONSIBLE FOR ALL SITE SAFETY.
14. NO DEBRIS SHALL BE BURIED OR BURNED ON THE SITE UNLESS SPECIFICALLY NOTED WITHIN THESE PLANS OR SPECIFICATIONS.
15. THE CONTRACTOR SHALL CONTACT MISS UTILITY TWO (2) CONSECUTIVE WORKING DAYS PRIOR TO EXCAVATION AT 1-800-282-8555.

SEQUENCE OF CONSTRUCTION

1. INSTALL ALL MAINTENANCE OF TRAFFIC, BARRICADES, TEMPORARY SIGNAGE AS REQUIRED TO PREVENT UNAUTHORIZED VEHICULAR, PEDESTRIAN, AND BICYCLE TRAFFIC INTO WORK ZONE.
2. NOTIFY THE DNREC SEDIMENT AND STORMWATER PROGRAM IN WRITING AT LEAST FIVE (5) DAYS PRIOR TO THE START OF CONSTRUCTION FAILURE TO DO SO CONSTITUTES A VIOLATION OF THE APPROVED SEDIMENT AND STORMWATER MANAGEMENT PLAN.
3. PRIOR TO ANY CLEARING, INSTALLATION OF SEDIMENT CONTROL MEASURES OR GRADING, A PRECONSTRUCTION MEETING MUST BE SCHEDULED AND CONDUCTED WITH THE AGENCY CONSTRUCTION SITE REVIEWER. THE LANDOWNER/DEVELOPER, CONTRACTOR, AND CERTIFIED CONSTRUCTION REVIEWER ARE REQUIRED TO BE IN ATTENDANCE AT THE PRE-CONSTRUCTION MEETING; THE DESIGNER IS RECOMMENDED TO ATTEND.
4. CLEAR AND GRUB AS REQUIRED TO INSTALL STABILIZED CONSTRUCTION ENTRANCE. INSTALL STABILIZED CONSTRUCTION ENTRANCE AND TRAFFIC DIVERSION BARRELS. CLEAR AND GRUB AS REQUIRED TO INSTALL SILT FENCE. INSTALL SILT FENCE. ALL PERIMETER CONTROLS ARE TO BE REVIEWED BY THE AGENCY CONSTRUCTION SITE REVIEWER AND APPROVED PRIOR TO PROCEEDING WITH FURTHER SITE DISTURBANCE OR CONSTRUCTION.
5. AT THE OWNER'S DIRECTION, THE CONTRACTOR SHALL PLACE SENSITIVE AREA PROTECTION AROUND ALL TREES WITHIN THE LIMITS OF DISTURBANCE THAT ARE TO REMAIN FOLLOWING CONSTRUCTION.
6. THE CONTRACTOR SHALL AT ALL TIMES PROTECT AGAINST SEDIMENT OR DEBRIS LADEN RUNOFF OR WIND FROM LEAVING THE SITE. PERIMETER CONTROLS SHOULD BE CHECKED DAILY AND ADJUSTED AND/OR REPAIRED TO FULLY CONTAIN AND CONTROL SEDIMENTATION ON THE SITE. ACCUMULATED SEDIMENT SHALL BE REMOVED WHEN IT HAS REACHED HALF OF THE EFFECTIVE CAPACITY OF THE CONTROL. IN ADDITION, THE CONTRACTOR MAY NEED TO ADJUST OR REPAIR MEASURES IN TIMES OF ADVERSE WEATHER CONDITIONS, OR AS DIRECTED BY THE AGENCY CONSTRUCTION SITE REVIEWER.
7. SAW CUT AND DEMO EXISTING ASPHALT TO BE REMOVED.
8. PERFORM ALL UTILITY WORK (ELECTRIC, WATER & SEWER) AS SHOWN ON PLAN SHEETS C8.1 – C8.6 & E1.1 – E1.3. ALL UNDERGROUND UTILITIES SHALL BE INSTALLED CONTINUOUSLY, BACKFILLING AND STABILIZING ALL DISTURBED TRENCH AREA AS UTILITY LINE IS PLACED.
8. PERFORM ROUGH GRADING FOR CONSTRUCTION OF THE EAST LOOP ROADWAY, NEW CAMPING SPACES, NEW PARKING AREA, AND SIDEWALKS. STOCKPILE ANY EXCESS SUBGRADE MATERIAL ONSITE IN DESIGNATED STOCKPILE AREAS SURROUNDED BY APPROVED PERIMETER CONTROLS.
9. INSTALL PCC AND/OR ASPHALT SIDEWALKS.
10. PLACE STONE BASE FOR ALL UNSTABILIZED AREAS TO BE PAVED.
11. PERMANENTLY GRADE AND STABILIZE ALL REMAINING DISTURBED AREAS.
12. PERFORM CRACK SEALING, PATCHING, AND PERFORM PAVING OF ALL SURFACES SHOWN.
13. PLACE PAVEMENT MARKINGS AND STRIPING.
14. PERFORM CLEANOUT & MAINTENANCE OF ALL EXISTING DRAINAGE PIPES. INSTALL RIP RAP AT EXISTING DRAINAGE OUTFALLS.
   14.1. ALL RIP RAP SHALL BE RIVER ROCK OF THE SIZE INDICATED ON THE STORMWATER MANAGEMENT PLANS AND DETAILS. THE USE OF GREY GRANITE RIP RAP SHALL NOT BE ALLOWED. SUBMIT RIP RAP COLOR SAMPLES FOR APPROVAL PRIOR TO INSTALLATION.
15. EROSION AND SEDIMENT CONTROL DEVICES SHALL BE REMOVED ONLY AFTER WORK IN AN AREA HAS BEEN COMPLETED AND STABILIZED, WITH WRITTEN APPROVAL FROM THE AGENCY CONSTRUCTION SITE REVIEWER.
16. THE TERMINATION OF THE CONSTRUCTION GENERAL PERMIT WILL REQUIRE SUBMISSION AND ACCEPTANCE OF THE POST CONSTRUCTION VERIFICATION DOCUMENTS, INCLUDING FINAL STABILIZATION THROUGHOUT THE SITE, AND ALL ELEMENTS OF THE SEDIMENT AND STORMWATER MANAGEMENT PLAN IMPLEMENTED.

FIRE MARSHAL NOTES

NAME OF PROJECT:	CAPE HENLOPEN STATE PARK CAMPGROUND IMPROVEMENTS
ADDRESS:	15099 CAPE HENLOPEN DRIVE LEWES, DE 19958
TAX MAP NUMBER:	3-35-5.00-12.00
OWNER'S NAME AND ADDRESS:	STATE OF DELAWARE DELAWARE STATE PARKS
ENGINEER:	CENTURY ENGINEERING, INC. 4134 N. DUPONT HWY. DOVER, DE 19901
APPLICANT:	WALTER J. HOEY, III, P.E. (CENTURY ENGINEERING, INC.)
INTENDED USE OF SITE:	RECREATIONAL VEHICLE (RV), TENT, AND CABIN CAMPING
WATER SUPPLIER:	CITY OF LEWES PUBLIC WORKS (FIRE HYDRANT TO BE INSTALLED AT REQUIRED DISTANCE TO CABINS IN THE UPCOMING PHASE 2 CONSTRUCTION.)
NUMBER OF FIRE HYDRANTS	4
MAXIMUM HEIGHT OF BUILDING:	NO NEW BUILDINGS PROPOSED
FIRE LANES:	NONE

NOTE:
1. ALL FIRE LANES, FIRE HYDRANTS, AND FIRE DEPARTMENT CONNECTIONS SHALL BE MARKED IN ACCORDANCE WITH THE STATE FIRE PREVENTION REGULATIONS.

CONTRACT NO.:

LOCATION PLAN SCALE: 1" = 12,000'

NOTES:

1. The purpose of this plan is to show control point locations and coordinate information within a portion of Cape Henlopen State Park Campground as requested by Cooper Aerial Surveys Co.
2. Date of Field Survey: May 6, 2015 and May 7, 2015.
3. Datum: Horizontal – Delaware State Plane Meridian – NAD 83' derived from network RTK GPS observations.

   Vertical – North American Vertical Datum – NAVD 88' referenced to NGS Benchmarks "Smith 2005," located as shown – Elevation = 5.14 feet, and "Henlo USCG 1995," located as shown – Elevation = 20.98 feet.
4. All measurements shown are in U.S. Survey feet, unless otherwise specified.
5. Aerial photograph is for visual presentation and does not make an attempt to depict with accuracy as to the location of dwellings and other notable physical features. Aerial photograph was obtained from the DEMAC Aerial Data Distribution website (http://demac.udel.edu/tiles/).

GENERAL NOTES – ELECTRICAL WORK

1. THE ELECTRICAL CONTRACTOR SHALL COORDINATE HIS WORK WITH THAT OF ALL OTHER TRADES. ALL OTHER TRADE'S DRAWINGS AND SPECIFICATIONS SHALL BE CONSULTED AND COORDINATED WITH PRIOR TO ROUGH–IN.
2. WHEREVER POSSIBLE, THE CONTRACTOR SHALL OBTAIN ACTUAL ROUGH–IN DRAWINGS FOR THE ACTUAL ITEM OF EQUIPMENT TO BE INSTALLED PRIOR TO ROUGH–IN. THIS SHALL APPLY TO ALL EQUIPMENT, WHETHER IT IS TO BE INSTALLED BY THE CONTRACTOR OR BY THE OWNER.
3. PROVIDE TYPED CIRCUIT DIRECTORIES FOR ALL PANELBOARDS TO INDICATE TYPE OF LOAD SERVED AND AREA SERVED (E.G. RV POWER POST A1).
4. UNLESS NOTED OTHERWISE, EVERY CONDUIT CONTAINING 120V OR GREATER WIRING SHALL CONTAIN A SEPARATE INSULATED GROUND WIRE RATED FOR 600V.
5. PROVIDE SEPARATE UNSHARED NEUTRAL CONDUCTOR(S) FOR ALL FEEDERS REQUIRING A NEUTRAL (I.E. 1 PHASE – 3 WIRE). SHARING OF NEUTRAL CONDUCTORS BETWEEN ANY CIRCUIT (FEEDER) IS NOT PERMITTED. MULTIWIRE FEEDER CIRCUITS ARE NOT PERMITTED.
6. CENTER EQUIPMENT OR DEVICES LOCATED ABOVE OPENINGS SUCH AS DOORS, LOUVER, ETC. ABOVE THE OPENING. THIS NOTE REFERS TO, BUT IS NOT LIMITED TO, CLOCKS, EXITS LIGHTS, EXTERIOR LIGHT FIXTURES, ETC.
7. CONFIRM ALL EQUIPMENT LOCATIONS PRIOR TO INSTALLATION.
8. PROVIDE WARNING LABELS FOR ALL PANELBOARDS AND METER SOCKET ENCLOSURES. WARNING LABELS SHALL READ AS FOLLOWS: "CAUTION. POTENTIAL ELECTRIC ARC FLASH HAZARD. WEAR PROPER PROTECTIVE CLOTHING WHILE EXAMINING, ADJUSTING, SERVICING OR MAINTAINING ENERGIZED EQUIPMENT." INSTALL WARNING LABELS ON EXTERIOR FRONT FACE OF ALL PANELBOARDS AND METER SOCKET ENCLOSURES LOCATED IN UNFINISHED/UTILITY TYPE SPACES. INSTALL WARNING LABELS ON INTERIOR FRONT FACE OF ALL PANELBOARDS LOCATED IN FINISHED SPACES. ENTIRE INSTALLATION SHALL COMPLY WITH THE REQUIREMENTS OF THE 2017 NEC, ARTICLE 110.16 (FLASH PROJECTION).
9. PROVIDE PANELBOARDS WITH THE NUMBER OF POLES INDICATED. EACH SPACE SHALL BE A FULLY PREPARED SPACE (I.E. COMPLETE WITH ALL PROVISIONS INCLUDING ALL HARDWARE REQUIRED TO MOUNT A FUTURE CIRCUIT BREAKER INCLUDING BUS CONNECTIONS, CIRCUIT BREAKER MOUNTING BRACKET, CIRCUIT BREAKER COVER AND COVER KNOCKOUTS, ETC.). PANELBOARDS SHALL BE NEMA 3R, LOCKABLE WITH THE SAME KEYING.
10. COORDINATE UNDERGROUND RUNS WITH EXISTING CONDITION AND TREE LOCATIONS.
11. VERIFY ELECTRICAL SYSTEM PHASING AND ROTATION WITH UTILITY COMPANY.
12. COMPLY WITH LEWES BOARD OF PUBLIC WORKS' ELECTRIC UTILITY SPECIFICATION FOR DEVELOPER DOCUMENT. COORDINATE PRIMARY, TRANSFORMER, SECONDARY, AND METERING WORKS WITH LEWES BOARD OF PUBLIC WORKS.
13. COMPLY WITH CURRENT NATIONAL, STATE, AND LOCAL ADOPTED CODES.
14. ALL DISTURBED AREAS SHALL BE RESTORED TO THE ORIGINAL CONDITIONS.
15. SAW CUT PAVED AREAS IN ACCORDANCE WITH CONSTRUCTION DETAILS.
16. RESTORE DISTURBED PAVED AREAS IN ACCORDANCE WITH CONSTRUCTION DETAILS.
17. CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING TEMPORARY POWER (PORTABLE GENERATORS, TEMPORARY SERVICES, ETC.).
18. ALL CONDUITS SHALL BE SCHEDULE 80 PVC, UNLESS NOTED OTHERWISE.
19. UNLESS OTHERWISE INDICATED, ALL CABLES/CONDUCTORS SHALL BE COPPER TYPE. ALUMINUM CABLES/CONDUCTORS SHALL ONLY BE ALLOW FOR USE FOR PRIMARY AND SECONDARY RUNS IN ACCORDANCE WITH LEWES BOARD OF PUBLIC WORKS' REQUIREMENTS.
20. UTILITY SERVICE POLE, FUSE CUTOUTS, OVERHEAD LINES UPSTREAM OF UTILITY SERVICE POLE, AND METERS TO BE PROVIDED BY LEWES BOARD OF PUBLIC WORKS' ELECTRIC DEPARTMENT.
21. FURNISH AND INSTALL TREATED LUMBER BOARDS ON BACK OF EXISTING METER STANDS TO ALLOW FOR INSTALLATION OF NEW PANELBOARDS. RUN SERVICE ENTRANCE WIRING AND CONDUITS AS INDICATED FROM EXISTING METERS TO NEW PANELBOARDS. COORDINATE WITH LEWES BOARD OF PUBLIC WORKS FOR INSTALLATION OF NEW METERS.

CONTRACT NO.:

GENERAL NOTES

1. UTILITY RELATED WORK SHALL BE PROVIDED IN ACCORDANCE WITH LEWES BOARD OF PUBLIC WORKS – ELECTRICAL UTILITY SPECIFICATION FOR DEVELOPERS. CONTACT BOB BARNES AT 302-462-0269.
2. GROUNDING AND BONDING SHALL BE IN ACCORDANCE WITH THE NATIONAL ELECTRICAL CODE.
3. ALL WORK SHALL BE ADHERED STATE PARK'S RULES. NO TREE REMOVAL SHALL BE ALLOWED. ROUTE UNDERGROUND RUNS TO AVOID TREES. REFER TO EARTH MOVING SPECIFICATION SECTION FOR EXCAVATION, TRENCHING, AND TREE PROTECTION REQUIREMENTS.
4. RUN UNDERGROUND CONDUITS WITH LONG SWEEPS AND PULL WIRES BETWEEN CONDUIT RUNS AS MUCH AS POSSIBLE TO MINIMIZE THE USE OF HANDHOLES.
5. COORDINATE WITH SITE CONDITIONS AND MAKE NECESSARY FIELD ADJUSTMENTS TO EQUIPMENT'S LOCATIONS TO MAINTAIN PROPER CLEARANCES.
6. SEE E1.1 FOR TRANSFORMER SCHEDULE.
7. SEE E3.1 FOR FEEDER REQUIREMENTS.
8. SEE E4.1 FOR DISTRIBUTION CENTER STAND DETAILS, RV POWER POST DETAIL, AND NON-ENCASED/DIRECT BURIED CONDUIT DETAILS.
9. SEE E4.2 FOR TRANSFORMER DETAIL AND HANDHOLE DETAIL.
10. SEE E5.1 AND E5.2 FOR PANEL SCHEDULES.

REFERENCED NOTES:

1. PROVIDE FEED-THRU INSERTS AS REQUIRED TO ALLOW FOR LOOP FEEDING EXISTING TRANSFORMER. PROVIDE 15KV, #1/0 SOLID AL WITH CONCENTRIC CU WIRES.
2. ALTERNATELY, PROVIDE 15KV, #1/0 SOLID AL WITH CONCENTRIC CU WIRES FROM TRANSFORMER T11 UP TO POLE HEIGHT + 20' SLACK.

19. REVIEW AGENCY: DNREC, DIVISION OF WATERSHED STEWARDSHIP, 89 KINGS HIGHWAY, DOVER, DE 19901, PHONE: (302) 739-9921, FAX: (302) 739-6724
20. CIVIL ENGINEER: CENTURY ENGINEERING, INC., 4134 NORTH DUPONT HIGHWAY, DOVER, DE 19901, ALEX SCHMIDT, P.E., PHONE: (302) 734-9188, FAX: (302) 734-4589

GENERAL NOTES

1. THE DNREC SEDIMENT AND STORMWATER MANAGEMENT PROGRAM MUST BE NOTIFIED IN WRITING FIVE (5) DAYS PRIOR TO COMMENCING WITH CONSTRUCTION. FAILURE TO DO SO CONSTITUTES A VIOLATION OF THE APPROVED SEDIMENT AND STORMWATER MANAGEMENT PLAN.
2. REVIEW AND APPROVAL OF THE SEDIMENT AND STORMWATER MANAGEMENT PLAN SHALL NOT RELIEVE THE CONTRACTOR FROM HIS OR HER RESPONSIBILITIES FOR COMPLIANCE WITH THE REQUIREMENTS OF THE DELAWARE SEDIMENT AND STORMWATER REGULATIONS, NOR SHALL IT RELIEVE THE CONTRACTOR FROM ERRORS OR OMISSIONS IN THE APPROVED PLAN.
3. IF THE APPROVED PLAN NEEDS TO BE MODIFIED, ADDITIONAL SEDIMENT AND STORMWATER CONTROL MEASURES MAY BE REQUIRED AS DEEMED NECESSARY BY DNREC.
4. FOLLOWING THE SOIL DISTURBANCE OR REDISTURBANCE, PERMANENT OR TEMPORARY STABILIZATION SHALL BE COMPLETED FOR ALL PERIMETER SEDIMENT CONTROLS, SOIL STOCKPILES, AND ALL OTHER DISTURBED OR GRADED AREAS ON THE PROJECT SITE WITHIN 14 CALENDAR DAYS UNLESS MORE RESTRICTIVE FEDERAL REQUIREMENTS APPLY.
5. ALL EROSION AND SEDIMENT CONTROL PRACTICES SHALL COMPLY WITH THE DELAWARE EROSION AND SEDIMENT CONTROL HANDBOOK, LATEST EDITION.
6. AT ANY TIME A DEWATERING OPERATION IS USED, IT SHALL BE PREVIOUSLY APPROVED BY THE AGENCY CONSTRUCTION SITE REVIEWER FOR A NON-EROSIVE POINT OF DISCHARGE, AND A DEWATERING PERMIT SHALL BE APPROVED BY THE DNREC WELL PERMITTING BRANCH.
7. APPROVED PLANS REMAIN VALID FOR 3 YEARS FROM THE DATE OF APPROVAL.
8. POST CONSTRUCTION VERIFICATION DOCUMENTS ARE TO BE SUBMITTED TO THE DNREC SEDIMENT AND STORMWATER PROGRAM WITHIN 60 DAYS OF STORMWATER MANAGEMENT FACILITY COMPLETION.
9. APPROVAL OF A SEDIMENT AND STORMWATER PLAN DOES NOT GRANT OR IMPLY A RIGHT TO DISCHARGE STORMWATER RUNOFF. THE OWNER/DEVELOPER IS RESPONSIBLE FOR ACQUIRING ANY AND ALL AGREEMENTS, EASEMENTS, ETC., NECESSARY TO COMPLY WITH STATE DRAINAGE AND OTHER APPLICABLE LAWS.
10. THE NOTICE OF INTENT FOR STORM WATER DISCHARGES ASSOCIATED WITH CONSTRUCTION ACTIVITY UNDER NPDES GENERAL PERMIT FOR THIS PROJECT IS PENDING ID #406. AT ANY TIME THE OWNERSHIP FOR THIS PROJECT CHANGES, A TRANSFER OF AUTHORIZATION OR A CO-PERMITEE APPLICATION MUST BE SUBMITTED TO DNREC. THE PERMITTEE OF RECORD SHALL NOT BE RELIEVED OF THEIR RESPONSIBILITIES UNTIL A NOTICE OF TERMINATION HAS BEEN PROCESSED BY DNREC.
11. THE OWNER SHALL BE FAMILIAR WITH AND COMPLY WITH ALL ASPECTS OF THE NPDES CONSTRUCTION GENERAL PERMIT ASSOCIATED WITH THE PROJECT, INCLUDING, BUT NOT LIMITED TO, PERFORMING WEEKLY SITE INSPECTIONS DURING CONSTRUCTION AND AFTER RAIN EVENTS, AND MAINTAINING WRITTEN LOGS OF THESE INSPECTIONS.
12. BEFORE ANY EARTHWORK OR EXCAVATION TAKES PLACE, THE CONTRACTOR SHALL CALL MISS UTILITY AT 811 OR 1.800.282.8555 AT LEAST 48 HOURS PRIOR TO CONSTRUCTION, TO HAVE ALL EXISTING UTILITIES MARKED ONSITE.
13. THE CONTRACTOR SHALL AT ALL TIMES PROTECT AGAINST SEDIMENT OR DEBRIS LADEN RUNOFF OR WIND FROM LEAVING THE SITE. PERIMETER CONTROLS SHALL BE CHECKED DAILY AND ADJUSTED AND/OR REPAIRED TO FULLY CONTAIN AND CONTROL SEDIMENT FROM LEAVING THE SITE. ACCUMULATED SEDIMENT SHALL BE REMOVED WHEN IT HAS REACHED HALF OF THE EFFECTIVE CAPACITY OF THE CONTROL. IN ADDITION, THE CONTRACTOR MAY NEED TO ADJUST OR ALTER MEASURES IN TIMES OF ADVERSE WEATHER CONDITIONS, OR AS DIRECTED BY THE AGENCY CONSTRUCTION SITE REVIEWER.
14. BEST AVAILABLE TECHNOLOGY (BAT) SHALL BE EMPLOYED TO MANAGE TURBID DISCHARGES IN ACCORDANCE WITH REQUIREMENTS OF 7 DEL C. CHAPTER 60, REGULATIONS GOVERNING THE CONTROL OF WATER POLLUTION, SECTION 9.1.02, KNOWN AS SPECIAL CONDITIONS FOR STORMWATER DISCHARGES ASSOCIATED WITH CONSTRUCTION ACTIVITIES AND DEPARTMENT POLICIES, PROCEDURES, AND GUIDANCE.
15. DOCUMENTATION OF SOIL TESTING AND MATERIALS USED FOR TEMPORARY OR PERMANENT STABILIZATION INCLUDING BUT NOT LIMITED TO SOIL TEST RESULTS, SEED TAGS, SOIL AMENDMENT TAGS, ETC. SHALL BE PROVIDED TO THE DEPARTMENT OR DELEGATED AGENCY TO VERIFY THAT THE PERMANENT OR TEMPORARY STABILIZATION HAS BEEN COMPLETED IN ACCORDANCE WITH THE APPROVED PLAN. THE DEPARTMENT OR DELEGATED AGENCY MAY REQUIRE ADDITIONAL SOIL TESTING AND REAPPLICATION OF PERMANENT OR TEMPORARY STABILIZATION IN ACCORDANCE WITH SPECIFICATIONS PROVIDED IN THE DELAWARE EROSION AND SEDIMENT CONTROL HANDBOOK, OR ALTERNATIVE MEASURES THAT PROVIDE FUNCTIONAL EQUIVALENCY.

APPROVAL STAMP

OWNER/DEVELOPER CERTIFICATION

I, THE UNDERSIGNED, CERTIFY THAT ALL LAND CLEARING, CONSTRUCTION AND DEVELOPMENT SHALL BE DONE PURSUANT TO THE APPROVED PLAN AND THAT RESPONSIBLE PERSONNEL (I.E. BLUE CARD HOLDER) INVOLVED IN THE LAND DISTURBANCE WILL HAVE A CERTIFICATION OF TRAINING PRIOR TO INITIATION OF THE PROJECT, AT A DNREC SPONSORED OR APPROVED TRAINING COURSE FOR THE CONTROL OF EROSION AND SEDIMENT DURING CONSTRUCTION. IN ADDITION, I GRANT THE DNREC SEDIMENT AND STORMWATER PROGRAM AND/OR THE RELEVANT DELEGATED AGENCY THE RIGHT TO CONDUCT ON-SITE REVIEWS, AND I UNDERSTAND MY RESPONSIBILITIES UNDER THE NPDES CONSTRUCTION GENERAL PERMIT, AS REFERENCED ON THIS COVERSHEET.

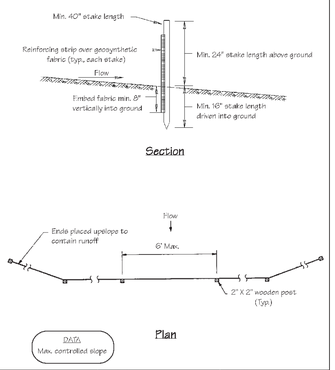
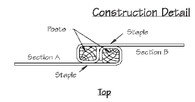
Standard Detail & Specifications
Silt Fence



Source:	Symbol:	Detail No.
Adapted form MD Stds. & Specs. for ESC	SF	DE-ESC-3.1.2.1 Sheet 1 of 2

Effective October 2015

Standard Detail & Specifications
Silt Fence



Construction Notes:

1. Geosynthetic fabric to be fastened securely to fence posts with wire ties or staples.
2. When two sections of filter cloth adjoin each other they shall be overlapped by six inches and folded.
3. Maintenance shall be performed as needed and material removed when "bulges" develop in the silt fence.

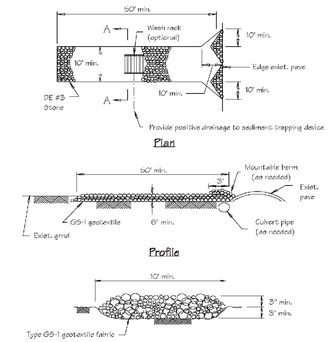
Materials:

1. Stakes: Steel (either T or U) or 2" x 2" hardwood
2. Geosynthetic Fabric: Type GD-I
3. Reinforcing strip: Wooden lath, plastic strip or other approved equivalent
4. Prefabricated Unit: Geofab, Enviofence, or approved equivalent

Source:	Symbol:	Detail No.
Adapted from MD Stds. & Specs. for ESC	SF	DE-ESC-3.1.2.1 Sheet 2 of 2

Effective October 2015

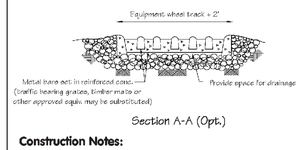
Standard Detail & Specifications
Stabilized Construct. Entrance



Source:	Symbol:	Detail No.
Adapted from VA ESC Handbook	SCE	DE-ESC-3.4.7 Sheet 1 of 2

Effective October 2015

Standard Detail & Specifications
Stabilized Construct. Entrance



Construction Notes:

1. Stone size - Use DE#3 stone.
2. Length - As required, but not less than 50 feet (except on a single residence lot where a 30 foot minimum length would apply).
3. Thickness - Not less than six (6) inches.
4. Width - Ten (10) foot minimum, but not less than the full width at points where ingress or egress occurs.
5. Geotextile - Type GS-I placed over the entire area prior to placing of stone.
6. Surface Water - All surface water flowing or diverted toward construction entrances shall be piped across the entrance. If piping is impractical, a mountable berm with 5:1 slopes will be permitted.
7. Maintenance - The entrance shall be maintained in a condition which will prevent tracking or flowing of sediment onto public rights-of-way. This may require periodic top dressing with additional stone as conditions demand and repair and/or cleanout of any measures used to trap sediment. All sediment spilled, dropped, washed or tracked onto public rights-of-way must be removed immediately.
8. Washing - Vehicle wheels shall be cleaned to remove sediment prior to entrance onto public rights-of-way. When washing is required, it shall be done on an area stabilized with stone and which drains into an approved sediment trapping device.
9. Inspection - Periodic inspection and needed maintenance shall be provided after each rain.

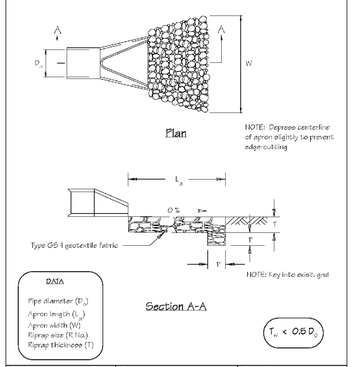
Effective October 2015

Standard Detail & Specifications
Riprap Outlet Protection - 1



Source:	Symbol:	Detail No.
Adapted from MD Stds. & Specs. for ESC	ROP-1	DE-ESC-3.3.10.1 Sheet 1 of 2

Effective October 2015

Standard Detail & Specifications
Riprap Outlet Protection - 1

Construction Notes:

1. The subgrade for the riprap shall be prepared to the required lines and grades as shown on the plan. Any fill required in the subgrade shall be compacted to a density of approximately that of the surrounding undisturbed material.
2. The riprap shall conform to the grading limits as shown on the plan.
3. Filter cloth shall be protected from punching, cutting or tearing. Any damage other than an occasional small hole shall be repaired by placing another piece of cloth over the damaged area. All connecting joints should overlap a minimum of 1 ft. If the damage is extensive, replace the entire filter cloth.
4. Stone for the riprap or gabion outlets may be placed by equipment. Riprap shall be placed in a manner to prevent damage to the filter cloth. Hand placement will be required to the extent necessary to prevent damage to the conduits, structures, etc.

Source:	Symbol:	Detail No.

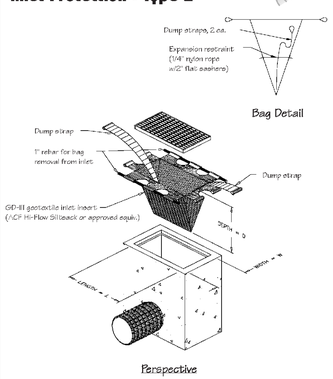
Effective October 2015

Standard Detail & Specifications
Inlet Protection - Type 2



Source:	Symbol:	Detail No.
Adapted from ACF Products, Inc.	IP-2	DE-ESC-3.1.5.2 Sheet 1 of 2

Effective October 2015

Standard Detail & Specifications
Inlet Protection - Type 2

Notes:

1. This practice shall only be used in situations in which Inlet Protection - Type 1 cannot be used due to site constraints. These include, but are not limited to partially completed parking areas, streets, roads, etc.
2. It may be necessary to transition from Type 1 to Type 2 Inlet Protection as construction proceeds.
3. For areas where there is a concern for oil run-off or spills, insert shall meet one of the above specifications with an oil-absorbant pillow that is removable completely from an oil-absorbant material with a woven pillow.

Materials:

The geotextile inlet insert shall meet or exceed the specifications of Type GD-III geotextile in accordance with Appendix A-3 of the Delaware Erosion & Sediment Control Handbook.

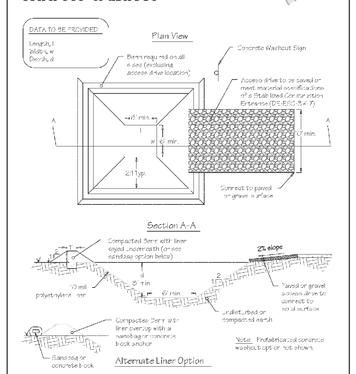
Effective October 2015

Standard Detail & Specifications
Concrete Washout



Source:	Symbol:	Detail No.
Adapted from Colorado Urban Storm Drainage Criteria Manual, Vol 3	CW	DE-ESC-3.6.2 Sheet 1 of 2

Effective October 2015

Standard Detail & Specifications
Concrete Washout

Construction Notes:

1. Locate washout area a minimum of 50 feet from open channels, stormdrain inlets, wetlands or waterbodies.
2. Locate washout area so that it is accessible to concrete equipment (service with a minimum 10 foot wide gravel accessway), but so it is not in a highly active construction area causing accidental damage.
3. Minimum dimensions for prefabricated units are 4 feet by 4 feet by 1 foot deep with a minimum 4mil polyethylene plastic liner. Minimum dimensions for constructed concrete washout areas are 6 feet by 6 feet by 3 feet deep, with a minimum 10mil polyethylene liner, 2:1 side slopes, and a 1 foot high by 1 foot wide compacted fill berm.
4. The liner must be free of tears or holes and placed over smooth surfaces to prevent puncturing. For excavated washouts, anchor the liner underneath the berm or overlap with sandbags or concrete blocks to hold in place.
5. Provide a sign designating the washout area, and for large construction sites, provide signs throughout directing traffic to its location.
6. Allow washed out concrete mixture to harden through evaporation of the wastewater. Once the facility has reached 75 percent of its capacity, remove the hardened concrete by reusing the broken aggregate onsite, recycling, or disposing of offsite. The hardened material can be buried on site with minimum of 1 foot of clean, compacted fill.
7. Apply a new liner before reusing the station for additional washouts after maintenance has occurred.

Effective October 2015

NOT FOR CONSTRUCTION
IN PROGRESS - NOT FOR CONSTRUCTION

PROJECT NOTES

1. TOTAL LOD AREA = 11.20 ACRES (488,029± S.F.)
2. TOTAL WETLAND AREA WITHIN LOD = 0.0 ACRES (0.0± S.F.)
3. THE ENTIRE LOD IS OUTSIDE THE 100-YR FLOODPLAIN.
4. EXCAVATION VOLUMES: SPOIL: 0 CF / BORROW: 0 CF
5. GEOTEXTILE FOR THE STABILIZED CONSTRUCTION ENTRANCE SHALL MEET DNREC TYPE GS-1 SPECIFICATIONS.
   EXAMPLE PRODUCTS INCLUDE: MIRAFI 600X, AMOCO 2006, AND GEOTEX 315ST
6. SPRINKLING SHALL BE THE STABILIZATION MEASURE INITIATED IF DUST CONTROL BECOMES A PROBLEM.
7. DUE TO THE ABSENCE OF NATIVE VEGETATION AND TOPSOIL, NO SEEDING, MULCHING, & TOPSOILING IS SPECIFIED.
8. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO MAINTAIN AND REPAIR ALL EROSION AND SEDIMENT CONTROL PRACTICES DURING CONSTRUCTION.
9. LOCATIONS OF DUMPSTER AND CONCRETE WASHOUT AREAS ARE SHOWN ON PLANS. IF THESE LOCATIONS MUST BE MOVED, THE NEW LOCATION SHALL BE APPROVED BY THE AGENCY CONSTRUCTION SITE REVIEWER.
10. STOCKPILE AREAS SHOWN FOR BIDDING/INFORMATIONAL PURPOSES ONLY. STOCKPILE LOCATIONS MAY BE ADJUSTED AS REQUIRED. CONTRACTOR SHALL COORDINATE ALL STOCKPILE LOCATIONS WITH THE OWNER TO AVOID EXISTING TREES AND OTHER ITEMS TO REMAIN.

SEQUENCE OF CONSTRUCTION

1. NOTIFY THE DNREC SEDIMENT AND STORMWATER PROGRAM IN WRITING AT LEAST FIVE (5) DAYS PRIOR TO THE START OF CONSTRUCTION FAILURE TO DO SO CONSTITUTES A VIOLATION OF THE APPROVED SEDIMENT AND STORMWATER MANAGEMENT PLAN.
2. PRIOR TO ANY CLEARING, INSTALLATION OF SEDIMENT CONTROL MEASURES OR GRADING, A PRECONSTRUCTION MEETING MUST BE SCHEDULED AND CONDUCTED WITH THE AGENCY CONSTRUCTION SITE REVIEWER. THE LANDOWNER/DEVELOPER, CONTRACTOR, AND CERTIFIED CONSTRUCTION REVIEWER ARE REQUIRED TO BE IN ATTENDANCE AT THE PRE-CONSTRUCTION MEETING; THE DESIGNER IS RECOMMENDED TO ATTEND.
3. CLEAR AND GRUB AS REQUIRED TO INSTALL STABILIZED CONSTRUCTION ENTRANCE. INSTALL STABILIZED CONSTRUCTION ENTRANCE AND TRAFFIC DIVERSION BARRELS. CLEAR AND GRUB AS REQUIRED TO INSTALL SILT FENCE. INSTALL SILT FENCE. ALL PERIMETER CONTROLS ARE TO BE REVIEWED BY THE AGENCY CONSTRUCTION SITE REVIEWER AND APPROVED PRIOR TO PROCEEDING WITH FURTHER SITE DISTURBANCE OR CONSTRUCTION.
4. AT THE OWNER'S DIRECTION, THE CONTRACTOR SHALL PLACE SENSITIVE AREA PROTECTION AROUND ALL TREES WITHIN THE LIMITS OF DISTURBANCE THAT ARE TO REMAIN FOLLOWING CONSTRUCTION.
5. THE CONTRACTOR SHALL AT ALL TIMES PROTECT AGAINST SEDIMENT OR DEBRIS LADEN RUNOFF OR WIND FROM LEAVING THE SITE. PERIMETER CONTROLS SHOULD BE CHECKED DAILY AND ADJUSTED AND/OR REPAIRED TO FULLY CONTAIN AND CONTROL SEDIMENTATION ON THE SITE. ACCUMULATED SEDIMENT SHALL BE REMOVED WHEN IT HAS REACHED HALF OF THE EFFECTIVE CAPACITY OF THE CONTROL. IN ADDITION, THE CONTRACTOR MAY NEED TO ADJUST OR REPAIR MEASURES IN TIMES OF ADVERSE WEATHER CONDITIONS, OR AS DIRECTED BY THE AGENCY CONSTRUCTION SITE REVIEWER.
6. SAW CUT AND DEMO EXISTING ASPHALT TO BE REMOVED.
7. PERFORM ALL UTILITY WORK (ELECTRIC, WATER & SEWER) AS SHOWN ON PLAN SHEETS C8.1 – C8.6 & E1.1 – E8.1. ALL UNDERGROUND UTILITIES SHALL BE INSTALLED CONTINUOUSLY, BACKFILLING AND STABILIZING ALL DISTURBED TRENCH AREA AS UTILITY LINE IS PLACED.
8. PERFORM ROUGH GRADING FOR CONSTRUCTION OF THE EAST LOOP ROADWAY, NEW CAMPING SPACES, NEW PARKING AREA, AND SIDEWALKS. STOCKPILE ANY EXCESS SUBGRADE MATERIAL ONSITE IN DESIGNATED STOCKPILE AREAS SURROUNDED BY APPROVED PERIMETER CONTROLS.
9. INSTALL PCC SIDEWALK.
10. PLACE STONE BASE FOR ALL UNSTABILIZED AREAS TO BE PAVED.
11. PERMANENTLY GRADE AND STABILIZE ALL REMAINING DISTURBED AREAS.
12. PERFORM PAVING OF ALL SURFACES SHOWN. PLACE PAVEMENT MARKINGS AND STRIPING.
13. PERFORM CLEANOUT & MAINTENANCE OF ALL EXISTING DRAINAGE PIPES. INSTALL RIP RAP AT EXISTING DRAINAGE OUTFALLS.
14. EROSION AND SEDIMENT CONTROL DEVICES SHALL BE REMOVED ONLY AFTER WORK IN AN AREA HAS BEEN COMPLETED AND STABILIZED, WITH WRITTEN APPROVAL FROM THE AGENCY CONSTRUCTION SITE REVIEWER.
15. THE TERMINATION OF THE CONSTRUCTION GENERAL PERMIT WILL REQUIRE SUBMISSION AND ACCEPTANCE OF THE POST CONSTRUCTION VERIFICATION DOCUMENTS, INCLUDING FINAL STABILIZATION THROUGHOUT THE SITE, AND ALL ELEMENTS OF THE SEDIMENT AND STORMWATER MANAGEMENT PLAN IMPLEMENTED.

Standard Detail & Specifications

Construction Site Waste Mgt & Spill Control

Pollution Prevention – Spill Prevention

1. Fueling should only take place in signed designated areas, away from downstream drainage facilities and watercourses.
2. Fueling must be with nozzles equipped with automatic shut-off to control drips. Do not top off.
3. Protect the areas where equipment or vehicles are being repaired, maintained, fueled or parked from storm water run-on and runoff.
4. Use barriers such as berms to prevent storm water run-on and runoff, and to contain spills.
5. Place a "Fueling Area" sign next to each fueling area.
6. Store hazardous materials such as fuel, solvents, oil and chemicals in secondary containment.
7. Inspect vehicles and equipment for leaks on each day of use. Repair fluid and oil leaks immediately.
8. Absorbent spill clean-up materials and spill kits must be available in fueling areas and on fuel trucks.
9. If fueling is to take place at night, make sure the fueling area is sufficiently illuminated.
10. Properly dispose of used oil, fluids, lubricants and spill clean-up materials.

CLEAN UP SPILLS

1. If it is safe to do so, immediately contain and clean up any chemical and/or hazardous material spills.
2. Properly dispose of used oil, fluids, lubricants and spill clean-up materials.
3. Do not bury spills or wash them down with water.

LEAKS AND DRIPS

1. Use drip pans or absorbent pads at all times. Place under and around leaky equipment.
2. Do not allow oil, grease, fuel or chemicals to drip onto the ground.
3. Have spill kits and clean up material on-site.
4. Repair leaky equipment promptly or remove problem vehicles and equipment from the site. Clean up contaminated soil immediately.
5. Store contaminated waste in sealed containers constructed of suitable material. Label these containers properly.
6. Clean up all spills and leaks. Promptly dispose of waste and spent clean up materials.

Delaware ESC Handbook		**DE-ESC-3.6.1** Sheet 2 of 5

Effective October 2015

Standard Detail & Specifications

Construction Site Waste Mgt & Spill Control

Notes:

The Construction Site Pollution Prevention Plan should include the following elements:

1. Material Inventory

Document the storage and use of the following materials:

a. Concrete
b. Detergents
c. Paints (enamel and latex)
d. Cleaning solvents
e. Pesticides
f. Wood scraps
g. Fertilizers
h. Petroleum based products

2. Good housekeeping practices

a. Store only enough product required to do the job.
b. All materials shall be stored in a neat, orderly manner in their original labeled containers and covered.
c. Substances shall not be mixed.
d. When possible, all of a product shall be used up prior to disposal of the container.
e. Manufacturers' instructions for disposal shall be strictly adhered to.
f. The site foreman shall designate someone to inspect all BMPs daily.

3. Waste management practices

a. All waste materials shall be collected and stored in securely lidded dumpsters in a location that does not drain to a waterbody.
b. Waste materials shall be salvaged and/or recycled whenever possible.
c. The dumpsters shall be emptied a minimum of twice per week, or more if necessary. The licensed trash hauler is responsible for cleaning out dumpsters.

Source:	Symbol:	Detail No.
Adapted from USEPA Pub. 840-B-92-002		**DE-ESC-3.6.1** Sheet 3 of 5

Effective October 2015

Standard Detail & Specifications

Construction Site Waste Mgt & Spill Control

Notes (cont.)

d. Trash shall be disposed of in accordance with all applicable Delaware laws.
e. Trash cans shall be placed at all lunch spots and littering is strictly prohibited. Recycle bins shall be placed near the construction trailer.
f. If fertilizer bags cannot be stored in a weather-proof location, they shall be kept on a pallet and covered with plastic sheeting which is overlapped and anchored.

4. Equipment maintenance practices

a. If possible, equipment should be taken to off-site commercial facilities for washing and maintenance.
b. If performed on-site, vehicles shall be washed with high-pressure water spray without detergents in an area contained by an impervious berm.
c. Drip pans shall be used for all equipment maintenance.
d. Equipment shall be inspected for leaks on a daily basis.
e. Washout from concrete trucks shall be disposed of in a temporary pit for hardening and proper disposal.
f. Fuel nozzles shall be equipped with automatic shut-off valves.
g. All used products such as oil, antifreeze, solvents and tires shall be disposed of in accordance with manufacturers' recommendations and local, state and federal laws and regulations.

5. Spill prevention practices

a. Potential spill areas shall be identified and contained in covered areas with no connection to the storm drain system.
b. Warning signs shall be posted in hazardous material storage areas.
c. Preventive maintenance shall be performed on all tanks, valves, pumps, pipes and other equipment as necessary.
d. Low or non-toxic substances shall be prioritized for use.

Effective October 2015

Standard Detail & Specifications

Construction Site Waste Mgt & Spill Control

Notes (cont.)

e. Contact information for reporting spills through the DNREC 24-Hour Toll Free Number shall be prominently posted.

6. Education

a. Best management practices for construction site pollution control shall be a part of regular progress meetings.
b. Information regarding waste management, equipment maintenance and spill prevention shall be prominently posted in the construction trailer.

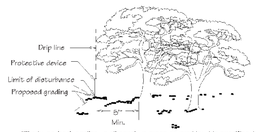
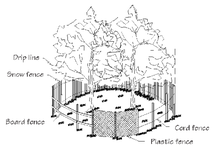
Sensitive Area Protection



"B" min. setback applies to all sensitive areas covered by this specification.

Location of Sensitive Area Protection



Methods of Sensitive Area Protection

Source:	Symbol:	Detail No.
Adapted from VA ESC Handbook	SAP	**DE-ESC-3.7.2** Sheet 1 of 3

Effective October 2015

Standard Detail & Specifications

Sensitive Area Protection

Construction Notes:

Fencing shall be installed at the extents of all sensitive areas. For trees, the fencing shall be installed outside the dripline (mature canopy) and at no time within 5 feet of the trunk. Personnel must be instructed to honor protective devices. The devices described are suggested only, and are not intended to exclude the use of other devices which will protect the trees to be retained. If silt fence is to be used for demarcation purposes, appropriate signage shall be provided a minimum of every 20 feet denoting the area as a sensitive area protection zone.

Materials:

1. Snow Fence - Standard 40-inch high snow fence shall be placed at the limits of clearing or construction on standard steel posts set 6 feet apart.
2. Board Fence - Board fencing consisting of 4-inch square posts set securely in the ground and protruding at least 4 feet above the ground shall be placed at the limits of clearing with a minimum of two horizontal boards between posts. For tree protection, if it is not practical to erect a fence at the drip line, construct a triangular fence nearer the trunk. The limits of clearing will still be located at the drip line, since the root zone within the drip line will still require protection.
3. Plastic Fencing - 40-inch high "international orange" plastic (polyethylene) web fencing secured to conventional metal "T" or "U" posts driven to a minimum depth of 18 inches on 6-foot minimum centers shall be installed at the limits of clearing. The fence should have the following minimum physical qualities:

a.	Tensile yield:	Average 2,000 lbs. per 4-foot width (ASTM D638)
b.	Ultimate tensile yield:	Average 2,900 lbs. per 4-foot width (ASTM D638)
c.	Elongation at break (%):	Greater than 1000% (ASTM D638)
d.	Chemical resistance:	Inert to most chemicals and acids

Source:	Symbol:	Detail No.
Adapted from VA ESC Handbook	SAP	**DE-ESC-3.7.2** Sheet 2 of 3

Effective October 2015

Standard Detail & Specifications

Sensitive Area Protection

4. Cord Fence - Posts with a minimum size of 2 inches square or 2 inches in diameter set securely in the ground and protruding at least 4 feet above the ground shall be placed at the limits of clearing with two rows of cord 1/4-inch or thicker at least 2 feet apart running between posts with strips of colored surveyor's flagging tied securely to the string at intervals no greater than [illegible] feet.
5. Earth Berms - Temporary earth berms shall be constructed according to specifications for a Temporary Earth Dike with the base of the berm on the sensitive area side located at the limits of clearing. Earth berms may not be used for this purpose if their presence will conflict with drainage patterns.
6. Trunk Armoring (Tree Protection Only) - As a last resort, a tree trunk can be armored with burlap wrapping and 2-inch studs wired vertically no more than 2 inches apart to a height of 5 feet encircling the trunk. If this alternative is used, the root zone within the drip line will still require protection. Nothing should ever be nailed to a tree.

Maintenance:

Fencing and armoring devices shall be in place before any excavation or grading is begun, shall be kept in good repair for the duration of construction activities, and shall be the last items removed during the final cleanup after the completion of the project.

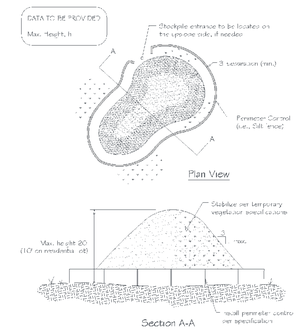
Standard Detail & Specifications

Soil Stockpile



Source:	Symbol:	Detail No.
Adapted from Colorado Urban Storm Drainage Criteria Manual, Vol 3	SP	**DE-ESC-3.7.3** Sheet 1 of 2

Effective October 2015

Standard Detail & Specifications

Soil Stockpile

Construction Notes:

1. Locate stockpiles so that they are 50 feet from any storm drain inlet, open channel, wetland or waterbody. Redirect any concentrated flow around the stockpile using an approved erosion and sediment control measure.
2. Secure the perimeter of the stockpile with an approved erosion and sediment control perimeter device.
3. If stockpile is to remain inactive for more than 14 calendar days, the stockpile must be vegetated. Follow the temporary vegetation specifications. The vegetation chosen shall last the duration of the stockpile; the stockpile shall be restabilized if the temporary vegetation dies or erosion results.

Source:	Symbol:	Detail No.
Adapted from Colorado Urban Storm Drainage Criteria Manual, Vol 3	SP	**DE-ESC-3.7.3** Sheet 2 of 2

Effective October 2015

Standard Detail & Specifications

Dust Control

Temporary Methods:

1. Mulches - See **DE-ESC-3.4.5**, Standard Detail and Specifications for Mulching.
2. Vegetative cover - See **DE-ESC-3.4.3**, Std. Detail and Specifications for Vegetative Stabilization.
3. Adhesives - Use on mineral soils only (not effective on muck soils). Keep traffic off these areas. The following table may be used for general guidance.

Type of Emulsion	Water Dilution	Type of Nozzle	Apply Gal/Ac.
Latex emulsion	12.5:1	Fine spray	235
Resin-in-water emulsion	4:1	Fine spray	300
Acrylic emulsion (non-traffic)	7:1	Coarse spray	450
Acrylic emulsion (traffic)	3.5:1	Coarse spray	350

4. Tillage - For emergency temporary treatment, scarify the soil surface to prevent or reduce the amount of blowing dust until a more appropriate solution can be implemented. Begin the tillage operation on the windward side of the site using a chisel-type plow for best results.
5. Sprinkling - Sprinkle site with water until the surface is moist . Repeat as needed.
6. Calcium Chloride - Apply as flakes or granular material with a spreader at a rate that will keep the soil surface moist. Re-apply as necessary.
7. Barriers - Place barriers such as solid board fences, snow fences, hay bales, etc. at right angles to the prevailing air currents at intervals of approx. 10X their height.

Permanent Methods:

1. Vegetative cover - See **DE-ESC-3.4.3**, Std. Detail and Specifications for Vegetative Stabilization.
2. Stone - Apply layer of crushed stone or coarse gravel to protect soil surface.

GENERAL NOTES

1. THE DNREC SEDIMENT AND STORMWATER PROGRAM RESERVES THE RIGHT TO ENTER PRIVATE PROPERTY FOR PURPOSES OF PERIODIC SITE REVIEWS.
2. THE DNREC SEDIMENT AND STORMWATER PROGRAM SHALL BE NOTIFIED WITHIN 30 BUSINESS DAYS IF THE PROPERTY OWNERSHIP IS TRANSFERRED TO A NEW PERSON OR ENTITY.
3. THE DNREC SEDIMENT AND STORMWATER PROGRAM MAY SEEK ENFORCEMENT ACTION AGAINST ANY OWNER DEEMED NEGLIGENT IN FULFILLING THE OPERATION AND MAINTENANCE REQUIREMENTS OF THE DELAWARE SEDIMENT AND STORMWATER REGULATIONS.
4. THE DNREC SEDIMENT AND STORMWATER PROGRAM SHALL BE CONTACTED IF A CONCERN ARISES REGARDING A STORMWATER MANAGEMENT FACILITY, BEFORE ANY NON-ROUTINE MAINTENANCE, OR IF MODIFICATIONS TO THE FACILITY ARE DESIRED.
5. ANY DESIGN MODIFICATIONS MADE TO THE STORMWATER SYSTEM SHALL REQUIRE THE CREATION OF A NEW POST CONSTRUCTION STORMWATER MANAGEMENT PLAN AND/OR OPERATIONS AND MAINTENANCE PLAN, WITH APPROVAL OF THE PLAN(S) BY THE DNREC SEDIMENT AND STORMWATER PROGRAM.
6. FOR ALL STORMWATER EASEMENT AREAS (I.E., ACCESS, MAINTENANCE, OR OFFSITE) AND THE MINIMUM 10-FOOT WIDE ACCESSWAYS TO ALL STORMWATER FACILITIES AND THEIR STRUCTURAL COMPONENTS, REGULAR MOWING SHALL BE PERFORMED TO KEEP THE GRASS 6" OR LESS; NO TREES OR SHRUBS SHALL BE PLANTED, AND ANY FOUND GROWING SHALL BE REMOVED; AND NO PERMANENT STRUCTURES, SUCH AS FENCES OR SHEDS, SHALL BE LOCATED WITHIN THE EASEMENT OR ACCESSWAY.
7. TREES SHALL NOT BE PLANTED, AND SHALL BE REMOVED IF FOUND GROWING, ON AND WITHIN 15 FEET OF ALL POND EMBANKMENTS, ON POND SLOPES OR SAFETY BENCHES, AND WITHIN 10 FEET OF STRUCTURAL COMPONENTS, SUCH AS PIPE INLETS.
8. WHEN THE FACILITY IS EXCAVATED TO REMOVE ACCUMULATED SEDIMENT, THE DISPOSAL AREA SHALL BE PERMANENTLY STABILIZED SO THAT IT DOES NOT RECREATE AN EROSION PROBLEM. ANY MATERIAL TAKEN OFF-SITE SHALL STILL BE UTILIZED OR DISPOSED OF IN AN APPROVED DNREC MANNER.
9. BEFORE ANY EARTHWORK OR EXCAVATION TAKES PLACE, THE CONTRACTOR SHALL CALL MISS UTILITY AT 811 OR 1.800.282.8555 AT LEAST 48 HOURS PRIOR TO CONSTRUCTION, TO HAVE ALL EXISTING UTILITIES MARKED ONSITE.

INFILTRATION BASIN MAINTENANCE

FUNCTION:
THESE STORMWATER FACILITIES ARE DESIGNED TO INFILTRATE STORMWATER AND SHOULD NOT HOLD WATER FOR MORE THAN 48 HOURS.

INSPECTION:
SELF INSPECT SEMI-ANNUALLY (SPRING AND FALL) AND AFTER STORM EVENTS OF 2 INCHES OR MORE. CLEAN OUT ACCUMULATED SEDIMENT TO MAINTAIN PRE-DEVELOPMENT STORAGE VOLUME.

TRASH AND DEBRIS:
REMOVE TRASH AND DEBRIS ON A REGULAR BASIS. IT IS ESPECIALLY IMPORTANT TO REMOVE DEBRIS FROM ALL INLETS AND OUTFALL STRUCTURES.

FENCING:
PERMANENT FENCING IS NOT RECOMMENDED AND NOT REQUIRED; HOWEVER, IF A FENCE IS PREFERRED, ENSURE THAT IT IS IN GOOD REPAIR AND PROVIDES ACCESS FOR MAINTENANCE AND INSPECTIONS. CONSTRUCTION SAFETY FENCE SHALL BE INSTALLED AROUND THE PERIMETER OF THE FACILITY DURING CONSTRUCTION.

SPECIAL CONSIDERATIONS:
INFILTRATION BASINS ARE DESIGNED TO INFILTRATE WATER AND REMOVE POLLUTANTS FROM STORMWATER. DO NOT COMPACT FACILITY IN ANY WAY. THIS INCLUDES THE USE OF HEAVY EQUIPMENT OR MACHINERY. COMPACTION MAY LEAD TO SYSTEM FAILURE.

HIRE A PROFESSIONAL:
IF FACILITY DOES NOT DRAIN WITHIN 48 HOURS; REPAIR OF SEVERE EROSION; REPLACEMENT OF DETERIORATING PIPES OR STRUCTURAL COMPONENTS; IF MOSQUITOES ARE SUSPECTED TO BE PROBLEMATIC; RECONSTRUCTION OF EMBANKMENT AND OUTLET STRUCTURE; REMOVAL OF ACCUMULATED SEDIMENT; AQUATIC VEGETATION CONTROL (CHEMICAL APPLICATION) IF LICENSING REQUIRED BY DE DEPARTMENT OF AGRICULTURE; IF DREDGING (SEDIMENT REMOVAL) IS REQUIRED.

RPv COMPLIANCE DATA TABLE

Summary Table for Sub-Areas Draining to a Common Point of Interest (POI)[1]

POI: Projectwide RPV Compliance Summary

Ref. #	Sub. Area ID[2]	Contributing Area (ac)	RPv Runoff Reduction Shortfall(+) or Credit(-)	Adjusted RPv CN after all reductions[4]	Cv RCN for H&H Modeling[4]	Fv RCN for H&H Modeling[4]	TN Pollutant Load (lb/yr)	TP Pollutant Load (lb/yr)	TSS Pollutant Load (lb/yr)
1	POA 1	3.89	-12	47.42	47.42	47.42	5.18	0.70	155.39
2	POA 2	1.97	826	47.76	47.76	47.76	2.69	0.36	80.69
4	POA 3	19.32	-9101	40.61	47.09	48.82	14.95	2.02	448.62
4	POA 4	3.06	345	56.93	56.93	56.93	7.73	1.04	231.75
Totals to Common POI		**28.24 ac**	**-7943 cu.ft.**	**43.82**	**48.25**	**49.43**	**30.55 lb/yr**	**4.12 lb/yr**	**916.45 lb/yr**
RPv Runoff Reduction Goal Met?			**YES**						
If Not, Total Offset Volume Required			**N/A**						

Notes:

1. As long as the site lies within the same watershed, all sub-areas within the site can be tallied to reflect global site conditions; or, the summary table can be used to show conditions to a specific POI.
2. Only the most downstream sub-area information should be entered for a series of sub-areas that drain directly into each other, as the upstream areas will already be accounted for in the DURMM computations.
3. A RPv runoff reduction shortfall should be entered as a positive number, as it is the runoff volume still needed to be reduced. A RPv credit should be entered as a negative number, as it indicates the additional volume that was reduced past the requirement.
4. To portray an accurate total weighted CN value for the RPv, Cv and Fv events, an entry must be made for every defined sub-area. If a sub-area's contributing drainage acreage is entered, but not its corresponding CN value, then the total weighted CN will be skewed.

N

1 AD-1 DEMOLITION PLAN

SCALE: $\frac{1}{4}$" = 1'-0"

PROGRESS - NOT FOR CONSTRUCTION

DEMOLITION PLAN LEGEND

EXISTING CONSTRUCTION TO BE REMOVED. REFER TO DEMOLITION PLAN FOR ITEMS TO BE SAVED, STORED AND RECONDITIONED FOR REUSE

EXISTING CONSTRUCTION TO REMAIN. PATCH AND REPAIR AS REQUIRED FOR NEW CONSTRUCTION

DEMOLITION NOTES

1. AREAS DESIGNATED BY DASHED LINES SHALL BE REMOVED. CONTRACTOR SHALL VERIFY THESE CONDITIONS PRIOR TO COMMENCEMENT OF WORK.
2. AREAS AND PARTITIONS NOT DASHED OR NOTED TO BE REMOVED SHALL STAY INTACT. REFER TO ARCHITECTURAL FLOOR PLAN FOR MORE INFORMATION. PATCH AND REPAIR ADJACENT AREAS AS REQUIRED AFTER DEMOLITION IN ACCORDANCE WITH RENOVATIONS.
3. PROVIDE INTERIOR AND EXTERIOR SHORING, BRACING, OR OTHER SUPPORT TO PREVENT MOVEMENT, SETTLEMENT OR COLLAPSE OF ELEMENTS TO BE DEMOLISHED AND ADJACENT WORK TO REMAIN.
4. PROVIDE TEMPORARY WEATHER PROTECTION DURING INTERVAL BETWEEN DEMOLITION AND INSTALLATION OF NEW CONSTRUCTION TO ENSURE THAT WATER LEAKAGE DOES NOT DAMAGE THE STRUCTURE.
5. LOCATE AND IDENTIFY EXISTING UTILITIES AND ASCERTAIN THEIR CONDITION TO ENSURE ADEQUATE PERFORMANCE OF ALL UTILITIES IN NEW CONSTRUCTION. PROTECT UTILITY LINES AND DEVICES DURING CONSTRUCTION AND DEMOLITION PHASES.
6. DEMOLISH CONCRETE AND MASONRY IN SMALL SECTIONS. CUT CONCRETE AND MASONRY AT JUNCTURES WITH OTHER ELEMENTS TO REMAIN USING POWER-DRIVEN MASONRY SAW OR HAND TOOLS; DO NOT USE POWER-DRIVEN IMPACT TOOLS.
7. REMOVE FROM BUILDING SITE DEBRIS, TRASH, AND OTHER MATERIALS RESULTING FROM DEMOLITION OPERATIONS. TRANSPORT AND LEGALLY DISPOSE OF OFF SITE.
8. IT IS NOT EXPECTED THAT HAZARDOUS MATERIALS WILL BE ENCOUNTERED IN THE WORK. IF MATERIALS SUSPECTED OF BEING HAZARDOUS ARE ENCOUNTERED, DO NOT DISTURB. IMMEDIATELY NOTIFY ARCHITECT AND OWNER. HAZARDOUS MATERIALS WILL BE REMOVED BY OWNER UNDER SEPARATE CONTRACT.
9. BURNING OF REMOVED MATERIALS IS NOT PERMITTED ON PROJECT SITE.
10. STORE ITEMS TO BE RELOCATED. DO NOT DAMAGE ANY MATERIALS. COORDINATE RELOCATION OF EXISTING MATERIALS WITH DRAWINGS.
11. COORDINATE DEMOLITION WITH BUILDING OWNER AND OTHER TRADES. CONFIRM EXTENT, TIMING, AND ITEMS TO BE SALVAGED BY BUILDING OWNER.

DEMOLITION PLAN KEY NOTES

1. REMOVE CMU WALL FULL HEIGHT.
2. PARTIALLY REMOVE MASONRY WALL FOR NEW OPENING.
3. REMOVE CMU SHOWER COMPARTMENT INCLUDING BENCHES, ACCESSORIES, SHOWERHEAD, PLUMBING, ETC. CAP WATER LINES AT SOURCE.
4. REMOVE CERAMIC WALL TILE.
5. REMOVE PLUMBING FIXTURE CARRIER & WATER LINES. CAP WATER LINES AT SOURCE. CAP SEWER LINE BELOW CONC. FLOOR SLAB. TURN OVER TO OWNER TOILETS AND FLUSH VALVES, URINALS ANDWALL-MOUNTED LAVATORIES.
6. REMOVE TOILET PARTITION AND ALL ACCESSORIES.
7. REMOVE COUNTER TOP AND ALL SUPPORTS.
8. REMOVE HAND DRYER. REMOVE POWER BACK TO SOURCE.
9. EXISTING WASHER AND DRYER TO BE REMOVED BY OTHERS. CONTRACTOR TO REMOVE WATER & POWER CONNECTIONS BACK TO SOURCE. PROVIDE BLANK RECEPTACLE COVERS ON ELEC. BOXES TO REMAIN THAT ARE IN CMU PARTITION.
10. REMOVE DOOR & FRAME.
11. REMOVE FLOOR DRAIN & CAP SEWER PIPE BELOW SLAB.
12. RAISE FLOOR DRAIN AS REQUIRED FOR NEW TOPPING.
13. REMOVE FLOOR SLAB & TILE FINISH.
14. REMOVE & REINSTALL EXISTING FIRE EXTINGUISHER.
15. REMOVE ABANDONED EXHAUST SYST. PATCH ROOF WITH $\frac{5}{8}$" EXT. PLYWOOD & ASPHALT SHINGLES TO MATCH.
16. REMOVE THREE INSTANTANEOUS WATER HEATERS. RELOCATE AND REINSTALL ONE. HAND OVER REMAINING TWO TO OWNER.
17. EXISTING ELECTRICAL PANELS TO REMAIN.
18. EXISTING STACK TO REMAIN.

PARKS PROJECT #: CH-44

CONTRACT #: 2015-CH-300

GENERAL PLUMBING NOTES

1. Plumbing plans are schematic representation of what is intent of the plumbing systems only. All work shall be done in accordance with the relevant plumbing code and in good installation practice. The plumbing contractor is responsible to make sure that they are completely aware of the local code, the requirements on these plans and the owners recommendations prior to submitting bids. There will be no additional compensation made for lack of knowledge of any requirements after the contracts have been awarded.
2. Contractor is responsible for safety including all necessary barricades, signs, fire extinguishers, etc. All applicable OSHA regulations shall apply to this work.
3. All work shall conform to the international mechanical code, international plumbing code and all local codes.
4. Contractor to supply all hangers, nuts, bolts, and gaskets.
5. Contractor shall field verify all existing conditions before beginning new work.
6. Provide all labor, material, equipment, incidentals, methods and services required to install all work indicated completely and in full operation.
7. Prior to acceptance of the project, all systems shall be tested, balanced and operated to demonstrate to the owner or his designated representative that the installation and performance of these systems and/or parts thereof conform to design intent.
8. Contractor shall submit shop drawings for all new equipment, materials, sheet metal layout and controls.
9. Upon completion of the contract the contractor shall provide the owner with (3) complete sets of manufacturers' operating, maintenance and preventive maintenance instructions (in bound book form) including parts lists and complete procurement information including equipment numbers and descriptions. Operating staff persons shall be instructed in proper operating and service requirements of the systems and equipment.
10. Each contractor shall review "all" project documents of "all" trades reviewing all of the project requirements prior to bidding. Discrepancies between documents shall be reported at the time of bid.
11. Verify all field conditions, access ways, dimensions and details in the field prior to bid and prior to fabrication. Include in bid all work necessary to cover costs resulting from field conditions.
12. All work shall be in conformance with all applicable laws, codes and regulations adopted by municipal, county, state and federal authorities, utility companies, insurance agencies and other authorities having jurisdiction over the work.
13. The contractor shall apply for, secure and pay for all permits and/or certificates of inspection required in the performance of the work by all authorities having jurisdiction.
14. The contractor shall guarantee the entire installation for period of one year except where extensions of this one year period are noted from the date of acceptance of the system as a whole. Any defects in workmanship, materials, malfunction of equipment or unsatisfactory performance and all other work or parts of the building damaged thereby, shall be repaired, replaced or otherwise remedied without expense to the owner. Such repairs or replacements shall be made in a timely manner and at the convenience of the owner.
15. All work shall be scheduled and coordinated with the owner so that disruption to the areas involved is kept to a minimum. Contractor shall give owner a minimum of 10 working days notice of any and all work that will interfere with the owner's operation so a schedule suitable to the owner can be arranged. Any accidental interruptions to services shall be repaired immediately by the contractor without additional cost to the owner.
16. In addition to specifics as may be defined hereinafter the contractor shall protect the work site and all his work against damage from any source (including but not limited to water, dust, heat, freezing etc.) until final completion and acceptance by the owner.
17. Contractor shall upon completion of the work submit a set of record drawings showing all changes from the contract drawing made in the installation and showing dimensioned locations of buried or concealed equipment or parts of the work.
18. Prior to delivery of materials to the site contractor shall provide material safety data sheets for all items and materials used in the work.
19. All equipment shall have its manufacturer's nameplate securely attached giving design and operating characteristics. Name plates shall not be covered or obstructed from view. Electrical panel schedules shall be provided and/or where existing they shall be amended to reflect the new work. Piping and conduit systems shall be labeled and valves shall be tagged.
20. All work shall be performed in compliance with current environmental regulations.
21. Unless otherwise noted, all parts, equipment and materials shall be new and shall be ASME and/or UL approved.
22. Contractor shall complete all cutting and patching required for the installation of the work. Cutting and patching shall be completed in a neat and workmanlike manner. Patching materials shall match existing materials to the greatest extent possible. provide touch-up paint to match existing surrounding areas of cutting and patching work.
23. Upon completion of all construction work, all piping systems shall be cleaned by the installing contractor using appropriate chemicals. The cleaning work shall be deemed completed only when agreed upon by a representative of the owner.

GENERAL PLUMBING SPECIFICATIONS

1. All plumbing shall comply with the 2012 edition of the International Plumbing Code.
2. Work shall be performed by mechanics skilled in particular trade involved. That is, plumbing work shall be performed by plumbers, electrical work shall be performed by electricians, mechanical work performed by sheet metal mechanics.
3. All work shall be inspected, tested and approved by the proper authorities having jurisdiction. Certified copies of these approvals shall be delivered to the owner before final payment.
4. Escutcheon plates shall be provided on all pipe which pass through wall partitions, floors or ceilings. Plates shall be one piece, chrome finished bronze.
5. Dielectric coupling shall be used where dissimilar metals are joined.
6. Core drilling shall be accomplished by mechanical means in a manner that will not affect the integrity of the structure. After installation of piping thru the core drill, pack the annular space with oakum or fibrous glass, leaving a minimum of two inches at each end to be filled and finished with sealant.
7. If conflict arises between items shown on drawings and items specified, the most stringent item shall be used.
8. The installation of all insulation shall be performed by an experienced craftsman in a neat workman-like manner and shall be in accordance with the manufacturer's published recommendations for service intended.
9. All new plumbing fixtures shall meet the appropriate ANSI standards listed in the plumbing subcode. Use of substandard and non-conforming foreign made products is prohibited.
10. If leaks occur during system testing, repairs shall be made and system retested until no evidence of leaks exist for the duration of the test.
11. All plumbing systems and valves shall be labeled for proper identification. Name plates, metal tags, plastic pipe markers in accordance with Seton Name Plate Corp.
12. provide insulation or ADA compliant barriers on undercounter plumbing in accordance with ADA requirements.
13. Handicapped fixture heights shall be in accordance with CABO/ANSI A-117.1.
14. Plumbing fixtures shall be as scheduled. Equivalent as listed are acceptable. Where manufacturer's product line permits, all fixtures shall be from a single manufacturer. All plumbing fixtures shall be provided with shutoff valves.
15. All plumbing fixtures shall be provided with chrome-plated shut off valves (angle stops, chrome plated supplies and p-traps).

CONTINUITY OF EXIST. SYSTEMS AND SERVICES

1. All work shall be performed at such time and in such manner as will least interfere with maintenance and operation of owner's activities. Provisions shall be made to permit owner's use of all the building and of existing systems at all times. Provide temporary facilities to secure these conditions. Remove temporary facilities when permanent work has been placed into service.
2. Fully coordinate with owner and all other tirades, all work involving shut-down and interruption of existing systems and service. Ten (10) business days notice must be given to the owner before any required utility shut-down.
3. Existing systems and services that are temporarily disconnected, but are to remain in use, shall be permanently reconnected and returned to proper operation.
4. Fully coordinate with owner and other trades to insure complete continuity of all systems and services.

DOMESTIC WATER SPECIFICATIONS

1. Domestic water pipe for above ground use shall be ASTM B88 "Type "K" seamless copper tube with solder joint fittings using 95-5 solder per ASTM B32. All water distribution piping shall be water rated for not less than 100 psi @ 190-degree F. Dielectric coupling shall be used where dissimilar metals are joined. Piping materials for use on domestic water systems including fixtures & valves shall not contain more than 8 percent lead.
2. All hot and cold water piping shall be IJ-inch minimum.
3. Prior to disinfection, potable water piping shall be flushed with water until no dirty water appears at the points of outlets.
4. Potable water piping shall be disinfected prior to use per national standard plumbing code. The piping shall be filled with a water chlorine solution containing at least 50 parts per million of chlorine and shall be valved off for 24 hours or filled with a water chlorine solution containing at least 200 parts per million of chlorine and allowed to stand for at least 3 hours. Following the allowed standing time, the system shall be flushed with potable water until no chlorine remains in the system. Provide results of disinfection to owner when complete.
5. Domestic water pipe shall consist of a hydrostatic pressure test of 25 psig above the working pressure under which it is operated for not less than 60 minutes.
6. If leaks occur during testing, repairs shall be made and system retested until no evidence of leaks exist for the duration of the test.
7. Domestic water pipe shall be insulated with 1" thick fiberglass preformed insulation with vapor jacket and self-sealing tape, equal to Owens-Corning ASJ/SSL-2. Cover insulation with white PVC sealed jacket system.
8. Ball valves shall be equal to Conbraco Apollo series 82-100 or 82-200 rated for 150 psig w.o.g. or equal.
9. Approved water hammer arresters shall be installed on water distribution systems where quick closing valves are installed. Water hammer arresters shall be placed as close as possible to the quick closing valve or at the end of long piping runs. Arresters shall be accessible for replacement.
10. Provide not less then 1 IJ-inch insulation to piping subject to freezing area.

SANITARY WASTE SPECIFICATIONS

1. Sanitary waste and vent pipe & fittings shall be service weight hubless cast iron ASTM A-888, with hubless coupling gaskets in accordance with ASTM C564 & CISPL-301 for above ground and hub and spigot pipe & fittings ASTM A-74, with compression type gaskets per ASTM C-564 for below slab.
2. Sanitary waste & vent pipe shall be air tested to not less than 5 psig pressure in the system. Piping system shall sustain a constant pressure for no less than 15 minutes.
3. Drainage specialties (clean outs and floor drains) shall be from a single manufacturer as noted in the plumbing fixture schedule or approved equal. Contractor shall coordinate top shape for floor drains and clean outs with final floor finishes. In general, provide square tops in tile floors, and round tops in other areas.
4. Horizontal drain piping shall be installed at uniform slope not less than 1/4" per foot for 3" and smaller and not less than 1/8" per foot for 4" and larger. Lesser slope may be permitted as approved by local administrative authority.
5. All new floor drains shall have deep seal traps, except where noted.
6. In the removal of any part of a drainage system, dead ends shall be avoided except where necessary to extend to a cleanout so as to be accessible.
7. Provide all necessary temporary or permanent caps or plugs for piping. Do not leave piping open ended.
8. All excavation shall be performed in strict compliance with OSHA occupational safety and health association regulations.

HANGERS & SUPPORTS

1. Hangers and anchors shall be securely attached to building construction at sufficiently close intervals to support piping and its contents.
2. In the removal of any part of a drainage system, dead ends shall be avoided except where necessary to extend to a cleanout so as to be accessible.

   A. Vertical piping for cast iron shall be supported at base and at each story height.
   B. Vertical piping for copper shall be supported at each story height but not more than 10 foot intervals.
   C. Horizontal piping for cast iron shall be supported with minimum one hanger located within 18" of each joint, at changes in direction, and at each branch connection. Where pipe is suspended by non-rigid hangers more than 18" long provide lateral support.
   D. Horizontal piping for copper shall be supported at 6 foot intervals for pipe sizes 1-1/4" and smaller and at 10 foot intervals for pipe sizes 1-1/2" and larger.
   E. All supports coming in contact with copper piping shall be plastic coated.
   F. Install metal shields on hangers supporting insulated pipe.
   G. Provide hangers that are u.l. listed and labeled. All domestic water, storm & sanitary waste pipe supports shall be in accordance with the 2012 IPC.

PARKS PROJECT #: CH-44
CONTRACT #: 2015-CH-300

ELECTRICAL GENERAL NOTES

1. The contract documents are schematic. The electrical contractor is to provide a fully functional power and lighting system for existing devices and fixtures.
2. The contractor is to provide all labor and material required for a complete installation that is fully warranted by the product manufacturer. Any details or work required, but not shown or specified are to be provided in accordance with the products manufacturer's recommendations and/or requirements at no additional cost to the owner.
3. Contractor shall keep work area clean and orderly.
4. The contractor is responsible for site safety and shall follow safety rules and conditions for contractors.
5. The electrical contractor is responsible for providing temporary lighting adequate in all areas of construction providing a coverage of .25 watts per square foot. Temporary lights shall be of the OSHA approved type.
6. All penetrations of roof and exterior walls shall be weathertight.
7. All electrical work to be done in a safe and orderly manner and in accordance with all state fire regulations, local codes and nec. Contractor shall arrange for all work to be inspected in accordance with Delaware State Law.
8. Contractor shall provide catalog cut sheet submittals for all equipment and materials under contractors scope of supply, submit with approval stamp affixed.
9. All electrical material and equipment shall be new, UL listed and bear the UL label. The exception is the existing electrical panels which shall remain.
10. All electrical material and equipment shall be as specified or approved equal.
11. All work shall comply with the latest edition of the National Electric Code (NEC) and all local codes.
12. The electrical contractor shall furnish and install all incidental accessories necessary to make the electrical work complete and ready for operation.
13. Conduit types shall be as follows, unless otherwise specified on the drawings:
    - A. Schedule 40 pvc - all underground conduit. Underground conduit shall transition to RGS conduit 1 '-0" (min.) prior to surfacing above ground.
    - B. Rigid Galvanized Steel (RGS) - all above ground outdoor conduit, and all indoor conduit subject to damage.
    - C. Electrical Metallic Tubing (EMT) - all above ground indoor conduit not subject to damage.
    - D. Liquidtight Flexible Metal Conduit - at final termination, not to exceed 18", to equipment subject to vibration.
    - E. MC cable may be used for power whips to light fixtures.
14. Contractor to coordinate conduit installation with piping and mechanical installation on this project.
15. All wire type shall be copper, with thhn/thwn, 75°c insulation. #4 awg and larger shall be XHHW insulation.
16. Contractor shall furnish and install permanent Brady heat shrink wire labels, with unique wire numbers, for all wires.
17. Contractor shall furnish and install new typewritten panel schedules and engraved name plates for all existing power panels and panel boards.
18. Coordinate electrical equipment installation locations with other disciplines and contractors.
19. All neutral conductors shall be rated at 100%, except as noted, of the ampacity of the circuit it is serving. Common neutrals and downsizing of neutral conductors shall not be permitted.
20. A green insulated equipment grounding conductor shall be run to each piece of equipment. Combining grounding conductors or the use of conduit as an equipment ground shall not be permitted.
21. All lighting branch circuit wiring shall be 2 #12 with 1 #12 green insulated ground in conduit not less than ¾-inches where specified. Type MC cable may be used as follows.
22. Contractor shall furnish all equipment, materials and hardware required to furnish a complete and operational electrical installation.
23. All underground conduit shall be at a minimum depth of 36" below finished grade. Areas where conduit is run under the building minimum depth shall be 24" below finished floor. A warning tape shall be installed inside the underground conduit trench at a maximum 12" below grade.
24. Where power connections are shown to disconnect switches, junction boxes, etc. This contractor shall also be responsible for all final connections to equipment.
25. This contractor shall field verify all dimensions and existing conditions prior to proceeding with any work. Where discrepancies occur between these documents and existing conditions, the discrepancy shall be reported to the owner for expediting and resolution.
26. All devices shall be white in color. Convenience receptacles shall be Hubbell 120v, 20amp, grounding type, NEMA 5-20r units. light switches shall be quiet type, snap action, 277 volt, 20 amp units. Cover plates shall be stainless steel.
27. This contractor shall verify all equipment voltage, phase and power requirements prior to connection of the equipment. Where discrepancies occur between these requirements and power supply, the discrepancy shall be reported to the project engineer for expediting and resolution.
28. All electrical devices shall be recessed in the new GWB partitions. All conduit and wiring shall be concealed in the new GWB partitions and/or new concrete slabs. Conduit at existing CMU partitions and in unfinished areas may by run exposed. The complete installation of devices, wiring and conduit shall be coordinated with the owner.
29. Unless noted otherwise, all light switches shall be mounted +48-inches A.F.F. and all receptacles and voice/data outlet boxes shall be mounted +18-inches A.F.F.

ELECTRICAL SYMBOLS

R — NEMA type 5-20r duplex receptacle outlet - Provide extra heavy duty specification grade, straight blade, 20 ampere, 125 volt, 2 pole, 3 wire grounding type with gray color (Hubbell cat. no. HBL5362GY or approved equal by Bryant, Cooper, Leviton or Pass & Seymour). Mount 18" A.F.F. unless otherwise noted.

R1 — NEMA type 5-2dr surge-protection duplex receptacle outlet - Provide specification grade, straight blade, 20 ampere, 125 volt, 2 pole, 3 wire grounding type, 240 joules/15000a per mode with blue color, indicator light and audible alarm (Hubbell cat. no. HBL5362SA or approved equal by Bryant, Cooper, Leviton or Pass & Seymour). Mount 18" A.F.F. unless otherwise noted.

R2 — NEMA type 14-30r receptacle outlet - Provide straight blade, 30 ampere, 125/250 volt, 3 pole, 4 wire grounding type (hubbell cat. no. HBL9430A or approved equal by Bryant, Cooper, Leviton or Pass & Seymour). Mounting height as indicated.

G WP — GFCI receptacle outlet as above with horizontal weatherproof while-in-use device cover. Device cover shall be heavy duty gray die-cast aluminum or zinc (Hubbell cat. no. WP826H or approved equal by Pass & Seymour). Mount 24" A.F.F. unless otherwise noted.

▶ Provide ¾" conduit with pull string & back box for owner installed it. Conduit is to extend to Housekeeping 103.

CONTRACT #: 2015-CH-300

GENERAL PLUMBING NOTES

1. Plumbing plans are schematic representation of what is intent of the plumbing systems only. All work shall be done in accordance with the relevant plumbing code and in good installation practice. The plumbing contractor is responsible to make sure that they are completely aware of the local code, the requirements on these plans and the owners recommendations prior to submitting bids. There will be no additional compensation made for lack of knowledge of any requirements after the contracts have been awarded.
2. Contractor is responsible for safety including all necessary barricades, signs, fire extinguishers, etc. All applicable OSHA regulations shall apply to this work.
3. All work shall conform to the international mechanical code, international plumbing code and all local codes.
4. Contractor to supply all hangers, nuts, bolts, and gaskets.
5. Contractor shall field verify all existing conditions before beginning new work.
6. Provide all labor, material, equipment, incidentals, methods and services required to install all work indicated completely and in full operation.
7. Prior to acceptance of the project, all systems shall be tested, balanced and operated to demonstrate to the owner or his designated representative that the installation and performance of these systems and/or parts thereof conform to design intent.
8. Contractor shall submit shop drawings for all new equipment, materials, sheet metal layout and controls.
9. Upon completion of the contract the contractor shall provide the owner with (3) complete sets of manufacturers' operating, maintenance and preventive maintenance instructions (in bound book form) including parts lists and complete procurement information including equipment numbers and descriptions. Operating staff persons shall be instructed in proper operating and service requirements of the systems and equipment.
10. Each contractor shall review "all" project documents of "all" trades reviewing all of the project requirements prior to bidding. Discrepancies between documents shall be reported at the time of bid.
11. Verify all field conditions, access ways, dimensions and details in the field prior to bid and prior to fabrication. Include in bid all work necessary to cover costs resulting from field conditions.
12. All work shall be in conformance with all applicable laws, codes and regulations adopted by municipal, county, state and federal authorities, utility companies, insurance agencies and other authorities having jurisdiction over the work.
13. The contractor shall apply for, secure and pay for all permits and/or certificates of inspection required in the performance of the work by all authorities having jurisdiction.
14. The contractor shall guarantee the entire installation for period of one year except where extensions of this one year period are noted from the date of acceptance of the system as a whole. Any defects in workmanship, materials, malfunction of equipment or unsatisfactory performance and all other work or parts of the building damaged thereby, shall be repaired, replaced or otherwise remedied without expense to the owner. Such repairs or replacements shall be made in a timely manner and at the convenience of the owner.
15. All work shall be scheduled and coordinated with the owner so that disruption to the areas involved is kept to a minimum. Contractor shall give owner a minimum of 10 working days notice of any and all work that will interfere with the owner's operation so a schedule suitable to the owner can be arranged. Any accidental interruptions to services shall be repaired immediately by the contractor without additional cost to the owner.
16. In addition to specifics as may be defined hereinafter the contractor shall protect the work site and all his work against damage from any source (including but not limited to water, dust, heat, freezing etc.) until final completion and acceptance by the owner.
17. Contractor shall upon completion of the work submit a set of record drawings showing all changes from the contract drawing made in the installation and showing dimensioned locations of buried or concealed equipment or parts of the work.
18. Prior to delivery of materials to the site contractor shall provide material safety data sheets for all items and materials used in the work.
19. All equipment shall have its manufacturer's nameplate securely attached giving design and operating characteristics. Name plates shall not be covered or obstructed from view. Electrical panel schedules shall be provided and/or where existing they shall be amended to reflect the new work. Piping and conduit systems shall be labeled and valves shall be tagged.
20. All work shall be performed in compliance with current environmental regulations.
21. Unless otherwise noted, all parts, equipment and materials shall be new and shall be ASME and/or UL approved.
22. Contractor shall complete all cutting and patching required for the installation of the work. Cutting and patching shall be completed in a neat and workmanlike manner. Patching materials shall match existing materials to the greatest extent possible. provide touch-up paint to match existing surrounding areas of cutting and patching work.
23. Upon completion of all construction work, all piping systems shall be cleaned by the installing contractor using appropriate chemicals. The cleaning work shall be deemed completed only when agreed upon by a representative of the owner.

GENERAL PLUMBING SPECIFICATIONS

1. All plumbing shall comply with the 2012 edition of the International Plumbing Code.
2. Work shall be performed by mechanics skilled in particular trade involved. That is, plumbing work shall be performed by plumbers, electrical work shall be performed by electricians, mechanical work performed by sheet metal mechanics.
3. All work shall be inspected, tested and approved by the proper authorities having jurisdiction. Certified copies of these approvals shall be delivered to the owner before final payment.
4. Escutcheon plates shall be provided on all pipe which pass through wall partitions, floors or ceilings. Plates shall be one piece, chrome finished bronze.
5. Dielectric coupling shall be used where dissimilar metals are joined.
6. Core drilling shall be accomplished by mechanical means in a manner that will not affect the integrity of the structure. After installation of piping thru the core drill, pack the annular space with oakum or fibrous glass, leaving a minimum of two inches at each end to be filled and finished with sealant.
7. If conflict arises between items shown on drawings and items specified, the most stringent item shall be used.
8. The installation of all insulation shall be performed by an experienced craftsman in a neat workman-like manner and shall be in accordance with the manufacturer's published recommendations for service intended.
9. All new plumbing fixtures shall meet the appropriate ANSI standards listed in the plumbing subcode. Use of substandard and non-conforming foreign made products is prohibited.
10. If leaks occur during system testing, repairs shall be made and system retested until no evidence of leaks exist for the duration of the test.
11. All plumbing systems and valves shall be labeled for proper identification. Name plates, metal tags, plastic pipe markers in accordance with Seton Name Plate Corp.
12. provide insulation or ADA compliant barriers on undercounter plumbing in accordance with ADA requirements.
13. Handicapped fixture heights shall be in accordance with CABO/ANSI A-117.1.
14. Plumbing fixtures shall be as scheduled. Equivalent as listed are acceptable. Where manufacturer's product line permits, all fixtures shall be from a single manufacturer. All plumbing fixtures shall be provided with shutoff valves.
15. All plumbing fixtures shall be provided with chrome-plated shut off valves (angle stops, chrome plated supplies and p-traps).

CONTINUITY OF EXIST. SYSTEMS AND SERVICES

1. All work shall be performed at such time and in such manner as will least interfere with maintenance and operation of owner's activities. Provisions shall be made to permit owner's use of all the building and of existing systems at all times. Provide temporary facilities to secure these conditions. Remove temporary facilities when permanent work has been placed into service.
2. Fully coordinate with owner and all other tirades, all work involving shut-down and interruption of existing systems and service. Ten (10) business days notice must be given to the owner before any required utility shut-down.
3. Existing systems and services that are temporarily disconnected, but are to remain in use, shall be permanently reconnected and returned to proper operation.
4. Fully coordinate with owner and other trades to insure complete continuity of all systems and services.

DOMESTIC WATER SPECIFICATIONS

1. Domestic water pipe for above ground use shall be ASTM B88 "Type "K" seamless copper tube with solder joint fittings using 95-5 solder per ASTM B32. All water distribution piping shall be water rated for not less than 100 psi @ 190-degree F. Dielectric coupling shall be used where dissimilar metals are joined. Piping materials for use on domestic water systems including fixtures & valves shall not contain more than 8 percent lead.
2. All hot and cold water piping shall be IJ-inch minimum.
3. Prior to disinfection, potable water piping shall be flushed with water until no dirty water appears at the points of outlets.
4. Potable water piping shall be disinfected prior to use per national standard plumbing code. The piping shall be filled with a water chlorine solution containing at least 50 parts per million of chlorine and shall be valved off for 24 hours or filled with a water chlorine solution containing at least 200 parts per million of chlorine and allowed to stand for at least 3 hours. Following the allowed standing time, the system shall be flushed with potable water until no chlorine remains in the system. Provide results of disinfection to owner when complete.
5. Domestic water pipe shall consist of a hydrostatic pressure test of 25 psig above the working pressure under which it is operated for not less than 60 minutes.
6. If leaks occur during testing, repairs shall be made and system retested until no evidence of leaks exist for the duration of the test.
7. Domestic water pipe shall be insulated with 1" thick fiberglass preformed insulation with vapor jacket and self-sealing tape, equal to Owens-Corning ASJ/SSL-2. Cover insulation with white PVC sealed jacket system.
8. Ball valves shall be equal to Conbraco Apollo series 82-100 or 82-200 rated for 150 psig w.o.g. or equal.
9. Approved water hammer arresters shall be installed on water distribution systems where quick closing valves are installed. Water hammer arresters shall be placed as close as possible to the quick closing valve or at the end of long piping runs. Arresters shall be accessible for replacement.
10. Provide not less then 1 IJ-inch insulation to piping subject to freezing area.

SANITARY WASTE SPECIFICATIONS

1. Sanitary waste and vent pipe & fittings shall be service weight hubless cast iron ASTM A-888, with hubless coupling gaskets in accordance with ASTM C564 & CISPL-301 for above ground and hub and spigot pipe & fittings ASTM A-74, with compression type gaskets per ASTM C-564 for below slab.
2. Sanitary waste & vent pipe shall be air tested to not less than 5 psig pressure in the system. Piping system shall sustain a constant pressure for no less than 15 minutes.
3. Drainage specialties (clean outs and floor drains) shall be from a single manufacturer as noted in the plumbing fixture schedule or approved equal. Contractor shall coordinate top shape for floor drains and clean outs with final floor finishes. In general, provide square tops in tile floors, and round tops in other areas.
4. Horizontal drain piping shall be installed at uniform slope not less than 1/4" per foot for 3" and smaller and not less than 1/8" per foot for 4" and larger. Lesser slope may be permitted as approved by local administrative authority.
5. All new floor drains shall have deep seal traps, except where noted.
6. In the removal of any part of a drainage system, dead ends shall be avoided except where necessary to extend to a cleanout so as to be accessible.
7. Provide all necessary temporary or permanent caps or plugs for piping. Do not leave piping open ended.
8. All excavation shall be performed in strict compliance with OSHA occupational safety and health association regulations.

HANGERS & SUPPORTS

1. Hangers and anchors shall be securely attached to building construction at sufficiently close intervals to support piping and its contents.
2. In the removal of any part of a drainage system, dead ends shall be avoided except where necessary to extend to a cleanout so as to be accessible.

   A. Vertical piping for cast iron shall be supported at base and at each story height.
   B. Vertical piping for copper shall be supported at each story height but not more than 10 foot intervals.
   C. Horizontal piping for cast iron shall be supported with minimum one hanger located within 18" of each joint, at changes in direction, and at each branch connection. Where pipe is suspended by non-rigid hangers more than 18" long provide lateral support.
   D. Horizontal piping for copper shall be supported at 6 foot intervals for pipe sizes 1-1/4" and smaller and at 10 foot intervals for pipe sizes 1-1/2" and larger.
   E. All supports coming in contact with copper piping shall be plastic coated.
   F. Install metal shields on hangers supporting insulated pipe.
   G. Provide hangers that are u.l. listed and labeled. All domestic water, storm & sanitary waste pipe supports shall be in accordance with the 2012 IPC.

DESIGNED BY: O.D.D.
DRAWN BY: O.D.D.
BUILDING NO.: N/A
DATE: 04/26/2016
SCALE: AS NOTED
SHEET NO.: PA-1
PARKS PROJECT #: CH-44
CONTRACT #: 2015-CH-300

ELECTRICAL GENERAL NOTES

1. The contract documents are schematic. The electrical contractor is to provide a fully functional power and lighting system for existing devices and fixtures.
2. The contractor is to provide all labor and material required for a complete installation that is fully warranted by the product manufacturer. Any details or work required, but not shown or specified are to be provided in accordance with the products manufacturer's recommendations and/or requirements at no additional cost to the owner.
3. Contractor shall keep work area clean and orderly.
4. The contractor is responsible for site safety and shall follow safety rules and conditions for contractors.
5. The electrical contractor is responsible for providing temporary lighting adequate in all areas of construction providing a coverage of .25 watts per square foot. Temporary lights shall be of the OSHA approved type.
6. All penetrations of roof and exterior walls shall be weathertight.
7. All electrical work to be done in a safe and orderly manner and in accordance with all state fire regulations, local codes and nec. Contractor shall arrange for all work to be inspected in accordance with Delaware State Law.
8. Contractor shall provide catalog cut sheet submittals for all equipment and materials under contractors scope of supply, submit with approval stamp affixed.
9. All electrical material and equipment shall be new, UL listed and bear the UL label. The exception is the existing electrical panels which shall remain.
10. All electrical material and equipment shall be as specified or approved equal.
11. All work shall comply with the latest edition of the National Electric Code (NEC) and all local codes.
12. The electrical contractor shall furnish and install all incidental accessories necessary to make the electrical work complete and ready for operation.
13. Conduit types shall be as follows, unless otherwise specified on the drawings:
    - A. Schedule 40 pvc - all underground conduit. Underground conduit shall transition to RGS conduit 1 '-0" (min.) prior to surfacing above ground.
    - B. Rigid Galvanized Steel (RGS) - all above ground outdoor conduit, and all indoor conduit subject to damage.
    - C. Electrical Metallic Tubing (EMT) - all above ground indoor conduit not subject to damage.
    - D. Liquidtight Flexible Metal Conduit - at final termination, not to exceed 18", to equipment subject to vibration.
    - E. MC cable may be used for power whips to light fixtures.
14. Contractor to coordinate conduit installation with piping and mechanical installation on this project.
15. All wire type shall be copper, with thhn/thwn, 75°c insulation. #4 awg and larger shall be XHHW insulation.
16. Contractor shall furnish and install permanent Brady heat shrink wire labels, with unique wire numbers, for all wires.
17. Contractor shall furnish and install new typewritten panel schedules and engraved name plates for all existing power panels and panel boards.
18. Coordinate electrical equipment installation locations with other disciplines and contractors.
19. All neutral conductors shall be rated at 100%, except as noted, of the ampacity of the circuit it is serving. Common neutrals and downsizing of neutral conductors shall not be permitted.
20. A green insulated equipment grounding conductor shall be run to each piece of equipment. Combining grounding conductors or the use of conduit as an equipment ground shall not be permitted.
21. All lighting branch circuit wiring shall be 2 #12 with 1 #12 green insulated ground in conduit not less than ¾-inches where specified. Type MC cable may be used as follows.
22. Contractor shall furnish all equipment, materials and hardware required to furnish a complete and operational electrical installation.
23. All underground conduit shall be at a minimum depth of 36" below finished grade. Areas where conduit is run under the building minimum depth shall be 24" below finished floor. A warning tape shall be installed inside the underground conduit trench at a maximum 12" below grade.
24. Where power connections are shown to disconnect switches, junction boxes, etc. This contractor shall also be responsible for all final connections to equipment.
25. This contractor shall field verify all dimensions and existing conditions prior to proceeding with any work. Where discrepancies occur between these documents and existing conditions, the discrepancy shall be reported to the owner for expediting and resolution.
26. All devices shall be white in color. Convenience receptacles shall be Hubbell 120v, 20amp, grounding type, NEMA 5-20r units. light switches shall be quiet type, snap action, 277 volt, 20 amp units. Cover plates shall be stainless steel.
27. This contractor shall verify all equipment voltage, phase and power requirements prior to connection of the equipment. Where discrepancies occur between these requirements and power supply, the discrepancy shall be reported to the project engineer for expediting and resolution.
28. All electrical devices shall be recessed in the new GWB partitions. All conduit and wiring shall be concealed in the new GWB partitions and/or new concrete slabs. Conduit at existing CMU partitions and in unfinished areas may by run exposed. The complete installation of devices, wiring and conduit shall be coordinated with the owner.
29. Unless noted otherwise, all light switches shall be mounted +48-inches A.F.F. and all receptacles and voice/data outlet boxes shall be mounted +18-inches A.F.F.

ELECTRICAL SYMBOLS

R — NEMA type 5-20r duplex receptacle outlet - Provide extra heavy duty specification grade, straight blade, 20 ampere, 125 volt, 2 pole, 3 wire grounding type with gray color (Hubbell cat. no. HBL5362GY or approved equal by Bryant, Cooper, Leviton or Pass & Seymour). Mount 18" A.F.F. unless otherwise noted.

R1 — NEMA type 5-2dr surge-protection duplex receptacle outlet - Provide specification grade, straight blade, 20 ampere, 125 volt, 2 pole, 3 wire grounding type, 240 joules/15000a per mode with blue color, indicator light and audible alarm (Hubbell cat. no. HBL5362SA or approved equal by Bryant, Cooper, Leviton or Pass & Seymour). Mount 18" A.F.F. unless otherwise noted.

R2 — NEMA type 14-30r receptacle outlet - Provide straight blade, 30 ampere, 125/250 volt, 3 pole, 4 wire grounding type (hubbell cat. no. HBL9430A or approved equal by Bryant, Cooper, Leviton or Pass & Seymour). Mounting height as indicated.

G WP — GFCI receptacle outlet as above with horizontal weatherproof while-in-use device cover. Device cover shall be heavy duty gray die-cast aluminum or zinc (Hubbell cat. no. WP826H or approved equal by Pass & Seymour). Mount 24" A.F.F. unless otherwise noted.

▶ Provide ¾" conduit with pull string & back box for owner installed it. Conduit is to extend to Housekeeping 103.

LIGHTING FIXTURE SCHEDULE
