

**Modification to RFI
for
District-wide Evaluation of Learning Focused Solution Strategies,
CHR1230-LFS Strate**

Evaluation-related activities within the District's schools should be relatively short in duration, spanning no more than three months. The District would prefer that site-based research activities be conducted in late Winter/Spring of 2013, with the expectation that a final report of findings be completed by late Summer/early Fall 2013.

As such, potential vendors will need to present one or more strategies to carry out the work with maximum efficiency and minimum cost and possess the human resource capacity to conduct the evaluation within the specified timeline. Given these parameters, we welcome potential vendors to present varied strategic options for carrying out the research along with respective cost estimates.
