

DSCYF RFP #11-04
DSCYF-CMH
Individual Residential Treatment Services

Amendment #2
08/26/10

Issue:

Page 5 of the RFP includes a list of requirements for “Professional Treatment Parents” which includes the following:

- Be competent to serve as treatment parents by virtue of a combination of education (e.g. B.A./B.S.), training and experience.

The Department has been asked if there is an educational requirement for treatment parents.

Resolution:

There is NO educational requirement to be a treatment parent for this service. The above bulleted item requires only that a treatment parent be competent to provide all of the services described in the RFP as a result of a combination of factors including education, training and experience.
