Dear Mr. Jakubowski:

I am responding to your request for a category determination for the DEARNG 05-2011 Wilmington Headquarters-Entrance Enhancements, which is a state funded construction project located in New Castle County, DE. The work consists of the patching, milling, and restriping of the existing site pavements; removal and replacement of selected areas of sidewalk and curbing; installation of a new catch basin. You estimate the total cost of construction for this project to be \$ [REDACTED]

Based upon the information you provided the Department of Labor has determined that this project is a Highway Construction project.

Delaware's Prevailing Wage Regulations provide that the rates applicable to a project are the rates in effect on the date of publication of the specifications for that project. I have enclosed a certified copy of the March 14, 2014, prevailing wage rates for Highway Construction to be included in your bid specification. However, please be advised that, in the event that a contract for a project is not executed within one hundred and twenty (120) days from the earliest date the specifications were published, the rates in effect at the time of the execution of the contract shall be the applicable rates for the project.

If you have any questions or I can provide any additional assistance, please do not hesitate to contact me at (302) 451-3409.

Sincerely,

Such changes in the Work shall be authorized by written Change Order signed by the Professional, as the duly authorized agent, the Contractor and the Owner.

7.2 The Contract Sum and Contract Completion Date shall be adjusted only by a fully executed Change Order.

7.3 The additional cost, or credit to the Owner resulting from a change in the Work shall be by mutual agreement of the Owner, Contractor and the Architect. In all cases, this cost or credit shall be based on the 'DPE' wages required and the "invoice price" of the materials/equipment needed.

7.3.1 "DPE" shall be defined to mean "direct personnel expense". Direct payroll expense includes direct salary plus customary fringe benefits (prevailing wage rates) and documented statutory costs such as workman's compensation insurance, Social Security/Medicare, and unemployment insurance (a maximum multiplier of 1.35 times DPE).

To this amount, the General Contractor will be allowed a mark-up not exceeding seven and one half percent (7.5%) on the subcontractors work. These mark-ups shall include all costs including, but not limited to: overhead, profit, bonds, insurance, supervision, etc. No markup is permitted on the work of the subcontractors subcontractor. No additional costs shall be allowed for changes related to the Contractor's onsite superintendent/staff, or project manager, unless a change in the work changes the project duration and is identified by the CPM schedule. There will be no other costs associated with the change order.

**ARTICLE 8: TIME**

- 8.1 Time limits, if any, are as stated in the Project Manual. By executing the Agreement, the Contractor confirms that the stipulated limits are reasonable, and that the Work will be completed within the anticipated time frame.
- 8.2 If progress of the Work is delayed at any time by changes ordered by the Owner, by labor disputes, fire, unusual delay in deliveries, abnormal adverse weather conditions, unavoidable casualties or other causes beyond the Contractor's control, the Contract Time shall be extended for such reasonable time as the Owner may determine.
- 8.3 Any extension of time beyond the date fixed for completion of the construction and acceptance of any part of the Work called for by the Contract, or the occupancy of the building by the Owner, in whole or in part, previous to the completion shall not be deemed a waiver by the Owner of his right to annul or terminate the Contract for abandonment or delay in the matter provided for, nor relieve the Contractor of full responsibility.
- 8.4 **SUSPENSION AND DEBARMENT**
- 8.4.1 Per Section 6962(d)(14), Title 29, Delaware Code, "Any Contractor who fails to perform a public works contract or complete a public works project within the time schedule established by the Agency in the Invitation To Bid, may be subject to Suspension or Debarment for one or more of the following reasons: a) failure to supply the adequate labor supply ratio for the project; b) inadequate financial resources; or, c) poor performance on the Project."

The Agency shall send a copy of the petition to the Contractor within three (3) working days of filing with the Director. If the Director concludes that the petition has merit, the Director shall schedule and hold a hearing to determine whether to suspend the Contractor, debar the Contractor or deny the petition. The Agency shall have the burden of proving, by a preponderance of the evidence, that the Contractor failed to perform or complete the public works project within the time schedule established by the Agency and failed to do so for one or more of the following reasons: a) failure to supply the adequate labor supply ratio for the project; b) inadequate financial resources; or, c) poor performance on the project. Upon a finding in favor of the Agency, the Director may suspend a Contractor from Bidding on any project funded, in whole or in part, with public funds for up to 1 year for a first offense, up to 3 years for a second offense and permanently debar the Contractor for a third offense. The Director shall issue a written decision and shall send a copy to the Contractor and

the Agency. Such decision may be appealed to the Superior Court within thirty (30) days for a review on the record.”

8.5.2 This forfeiture of retainage also applies to the timely completion of the punchlist. A punchlist will only be prepared upon the mutual agreement of the Owner, Architect and Contractor. Once the punchlist is prepared, all three parties will by mutual agreement, establish a schedule for its completion. Should completion of the punchlist be delayed beyond the established date due to the Contractor's failure to meet their responsibilities, the Agency may hold permanently, at its discretion, all or part of the Contractor's retainage.

3.2 All work shall be performed in accordance with DelDOT Standard Specifications.

3.3 Extreme care shall be utilized by the Contractor to minimize disturbance of existing pavement, walkways, curbs and landscaped areas. Prior to excavation of any existing pavement, the Contractor shall discuss the limits of additional disturbance that may be required to achieve the proposed construction with the Engineer. Damage to any areas

which were not agreed to in advance with the Engineer shall be repaired by the Contractor at no additional expense to the Owner.

- 3.4 Sawcutting of existing bituminous concrete pavement shall be performed around the perimeter of the reconstruction area. Sawcutting should be "squared off" and be full depth as required to provide a clean, straight and true edge.
- 3.5 All excavated materials shall become the property of the Contractor and be removed from the site at the completion of the project at no additional expense to the Owner. Where possible, it is preferred that excavated materials be directly loaded onto trucks for subsequent off-site disposal.
- 3.6 Following excavation of the existing pavement section, all loose soils shall be removed and leveled off. Subsequently, the exposed subbase shall be compacted with at least 3 passes of a minimum 10-ton, smooth drum. The subgrade shall be regraded as necessary to provide drainage of the final pavement section.
- 3.7 Contractor shall take precautions as necessary to minimize the potential for disturbance or softening of the pavement subgrade materials from inclement weather or construction traffic. The subgrade soil shall be proofrolled by a minimum 10-ton vibratory roller or a fully loaded tandem dump truck in the presence of a qualified geotechnical engineer acting as the owner's representative in the field. Any soft, wet or yielding areas encountered within the pavement areas shall be undercut to firm subgrade and backfilled as recommended by the geotechnical engineer. These areas shall be immediately covered by the geotextile fabric, pulled tight and lapped a minimum of 12 inches. Graded aggregate base course shall then be placed in a lift thickness not to exceed 8 inches, compacted with at least 3 passes of a minimum 10-ton vibratory roller. Any soft areas that develop after initial construction shall be undercut and replaced with graded aggregate at no additional cost to the Owner.
- 3.8 Prior to the placement of the pipe, the Contractor shall locate and establish the elevations of the high and low points. The elevations shall be coordinated with the Owner's site representative and recorded by the Contractor. **At the completion of project, that Contractor shall provide to the Owner a record of pipe invert elevations for each high and low point.**
- 3.9 The length of utility trench excavated at any time shall be limited to the length of pipe that can be placed, and backfilled in one workday. All excavations must be fully backfilled at the end of each workday.
- 3.10 Installation of the catch basin shall be in accordance with the manufacturer's specifications noted on the drawings. The compacted material above the 6-inch PVC pipe below the pavement section shall consist of DeIDOT Type C Borrow with a thickness as specified on the Contract Drawings. Following its placement, the material shall be compacted in accordance with DeIDOT's Standard Specification requirements (minimum of 95% compaction of a Standard Proctor).
- 3.11 Prior to the placement of any bituminous concrete, the edges of the reconstruction area shall be swept clean, and a tack coat shall be thoroughly applied with a brush to provide full coverage of adjacent sawcut pavement edge and any abutting curbs and sidewalks.
- 3.12 Prior to the placement of the new pavement, butt joints shall be constructed at each termination location for the surface course along the existing pavement. The edge of the existing pavement shall have a clean, straight and true edge, and should be sawcut, if necessary.

- 3.13 The compacted bituminous concrete pavement reconstruction shall consist of a thickness as specified on the Contract Drawings. The completed pavement surface shall be graded to match the surrounding grades and shaped to provide for positive surface drainage away from the existing structures. The contractor shall be responsible to establish final site grading that provides positive site drainage at all areas on the finished pavement surface. Following its placement, the surface and binder courses shall be compacted in accordance with DelDOT's Standard Specification requirements (minimum of 92% compaction of the theoretical voidless density (TVD) for surface course and minimum of 90% compaction of the TVD for binder course).
- 3.14 Following completion of pavement construction, the Contractor shall stripe the pavement areas to match the proposed markings.
- 3.13 Following completion of construction, the Contractor shall restore all site grades in landscaped areas to their pre-construction condition. The exposed surface shall be fine graded and raked free of roots, cobbles and soil lumps which shall be removed from the site. Subsequently, the Contractor shall restore the landscaped area to its pre-construction condition by providing topsoil, grass or mulch to match its previous condition. Seeding of grassed areas shall be performed in accordance with Delaware Erosion and Sedimentation Control Handbook (1989) and DelDOT Standard Specifications Section 734.
- 3.14 The interface between the new and existing pavement should be sawcut to a depth of approximately 1/2-inch and be filled with a hot poured joint sealant in strict accordance with Section 807 of the DelDOT Standard Specifications and the manufacturer's printed label instructions.
