Q: Option Package D

Posted On: 11/18/2019 3:58:33 PM

Air-operated service door with automatic release when ignition is turned off. Units 13, 47 and 60 will have electric doors. This option is only available on air doors. Will it be OK if electric doors do not have this?

A: Option D - electric doors would not have the automatic release with ignition off that air doors are retired to have.

Q: Units 32-35 request air door

Posted On: 11/18/2019 4:03:48 PM

32-35 request air door. There are no other air operated features on these buses (ie. air brakes). To add an air source adds greater expense to this option. Would the district prefer an electric door to save costs and add simplicity?

A: Units 32-35 are to be electric doors not air doors.

Q: Type A Lift Bus

Posted On: 11/19/2019 1:10:15 PM

Our Type A Transit buses have a 2 leaf door setup for the lift door. Will this be OK?

A: A 2 leaf door would be acceptable for Type A bus.
