 Stormwater Retrofit Design Services
 1666 Request For Proposals
 Wednesday, October 2, 2013**

Q #	Question	Answer
8	What are DelDOT's stormwater retrofit requirements?	DelDOT's retrofit requirements are detailed in the Phase I MS4 Permit which can be found on the DelDOT Website. Specifically, Part III. Water Quality Improvement Plans. http://deldot.gov/stormwater/permit.shtml
7	Can you estimate the budget for this Agreement?	That information is not available.
6	What types of stormwater retrofit designs will be considered?	DNREC has promulgated new sediment and stormwater regulations which mirror the BMP practices included in the Chesapeake Bay WIP. BMPs which work toward meeting the applicable Total Maximum Daily Loads (TMDLs) will be considered.
5	How many Agreements will be awarded?	One.
4	Will Watershed Implementation Plan (WIP) development be tasked under this Agreement?	This Agreement is solely for the design of the stormwater retrofit projects within DelDOT's jurisdiction which may result from the WQIPs.
3	What types of retrofit projects will be assigned as part of this Agreement?	Retrofits range from redesign of existing facilities, design of new facilities within the existing right-of-way, stream restoration, outfall retrofits.
2	Is DBE participation required on this Agreement?	At this time there is no DBE requirement.
1	Is a Certified Construction Reviewer (CCR) Certification from the DNREC required?	No, not at the time of proposal. If deemed necessary, the CCR certification can be obtained at a later date.
