Q #	Question	Answer
1	Are all personnel required to have the State of Delaware Commercial Pesticide Applicator's License? We have one employee with this license, and it is our understanding that other employees can apply pesticides under the license holder's supervision. If one license holder qualifies our Company for this work, please let us know.	All applicator personnel, including vehicle operator must be certified in accordance with the specification and Delaware Department of Agriculture regulations. One license holder will not qualify.
