DOT1709-COLD_PATCH
HIGHWAY COLD PATCH MATERIALS
Thursday, April 13, 2017

Q #	Question	Answer
1	Is it a requirement that the cold patch be produced thru a hot mix asphalt plant? We are able to produce the material ambient thru a portable pugmill, would this be acceptable?	As long as the specification requirements can be met, it doesn't have to be run through a hot mix plant. Also, all applicable permits would need to be obtained for the production.
