Q #	Question	Answer
2	The Maintenance of Traffic notes are confusing. Plans call for the installation of Typical Application (TA) with payment shall include "providing, transporting, locating, setting up and maintaining of all necessary temporary traffic control devices as prescribed above' (utilizing the prescribed TA). However there is also a note that states that "Flaggers, portable light assemblies, portable changeable message signs, truck mounted attenuators and traffic officers will be paid for separately under the applicable pay items." But there are no applicable pay items in the RFP. Should these items be included in the pricing for the appropriate TA?	No. Flaggers, portable light assemblies, portable changeable message signs, truck mounted attenuators and traffic officers are not to be included in the TA pricing. The note should read: "Flaggers, portable light assemblies, portable changeable message signs, truck mounted attenuators and traffic officers will be <u>negotiated and</u> paid for separately under the applicable pay items <u>when/if needed.</u> "
