CONSULTING SERVICES**
(29 Del.C. §§6981 & 6982)

Agreement No. 1782

HAZMAT and Environmental Services

PROJECT DESCRIPTION

The Delaware Department of Transportation is seeking the services of a qualified firm to handle the assessment, investigation and remediation of environmentally sensitive substances. The extent and scope of this effort is guided by three (3) general phases; Preliminary Assessment; Site Investigation; and Corrective Action.

The selected firm will be responsible for implementing corrective action and coordination of all work through any subcontractors upon DelDOT approval of proposal.

CONSULTANT SERVICES REQUIRED

1. Preliminary Assessment:

This phase includes a records search examining the history of the site. This search will seek evidence of past practices, which may have had a negative environmental consequence on the site. The review should make use of all available sources of information including existing site plans, aerial photographs, drawings, specifications, reports of inspections and previous tests, history of ownership, and permits. Site inspection components include a thorough first hand inspection of the property. The inspection will seek evidence, which may give indication of any activities dealing with the use, storage, or dispensing of hazardous materials. This phase may include the collection of soil samples. The assessment shall be conducted in accordance with applicable American Society for Testing and Materials (ASTM) guidelines for the completion of an Environmental Site Assessments.

A formal report will summarize activities related to this phase. This report will include copies of field data, calculations, graphics and photographs, analytical results and interpretations. This document will include recommendations, based on findings, for further work and related costs including potential order of magnitude of remedial costs.

2. Site Investigation:

Site investigations are determined on a site-by-site evaluation of risk, based on an analysis of site conditions including, but not limited to, site hydrogeology, nature of the substance released, impact to adjacent lands, impact to ground water and surface water, site geography, land use, and proposed use of the site for the transportation project. A site investigation sets the state for action by providing all relevant information. The investigation will provide the nature and extent of contamination. This will include all vertical and horizontal migration, which may occur at a particular site and/or its surroundings. Data supporting such movements will be provided to substantiate

observations. If applicable, the information will be developed and will focus on the relation to the proposed transportation project.

Deliverable products include all pertinent information contributing to assessed condition. This includes cause, type and volume of identified substance. These items will be supported by a site map showing all pertinent land characteristics and improvements. Site related concerns needed to be addressed involve water quality, extent of absorbed contamination, identification of soil and/or water sample locations, contour mapping, and identification of likely contaminant receptors.

A formal report will summarize activities related to this phase. This report will include copies of field data, calculations, graphics and photographs, analytical results and interpretations. The document will include recommendations, based on findings for further work and related on site costs associated with the impacted DelDOT transportation project or site. Phase II work may also involve the production of formal remedial investigation work plans, if this work is being done under applicable state or federal programs.

3. **Corrective Action and Implementation:**

A corrective action work plan (or similar document) shall be developed to guide remedial actions. Remediation should meet the target clean up goal set in the corrective action work plan through recommendations established in the previous investigations. Remediation must meet the target clean-up goals in compliance with applicable state and federal regulations, or as approved by DNREC on a site-by-site basis.

Remedial design plans will include documentation of any immediate dangers and the determination of soil and/or water contaminant treatment levels and exposure pathways and any/all requirements per established state and federal regulations. Implementation of remedial design plans may call for the removal of all free phase product, treatment of dissolved product, mitigation of contaminant vapors, and proper disposal of all solid and liquid wastes. Actions could also include environmental air monitoring and health and safety guidance in support of DelDOT construction projects, through recommendations based on the Phase I and/or Phase II investigations.

The Consultant shall provide recommendations and approaches to dealing with potential hazardous waste identified in this phase. This could include participation in State or Federal programs, including VCP and HSCA. Provisions can recommend, and have the potential to implement plans for active or passive remediation. Conditions leading to site closure will be detailed, pursued, and monitored. This will include a final report summarizing all action, which establishes conditions for closure.

The consultant shall actively represent DelDOT concerning environmental issues in negotiation and coordination with DNREC and other State/Federal agencies. The Consultant shall coordinate with these agencies as necessary to resolve environmental issues in support of the mission and interest of the Delaware Department of Transportation.

Other Environmental Investigations – Projects may be required to be performed through environmental programs aimed at determining the extent of contamination and/or remedial options and recommendations on State properties. Examples of State and Federal environmental regulations that may govern other environmental investigations include the State of Delaware Hazardous Substance Cleanup Act (HSCA; the State of Delaware Voluntary Cleanup Program (VCP); the federal Comprehensive Environmental Response,

Compensation, and Liability Act (CERCLA); and the federal Resource Conservation and

Recovery Act (RCRA). Investigations, assessments, and remediation that are under the auspices of these programs may involve Remedial Investigations (RI), Feasibility Studies (FS), Risk Assessments (RA), and Remedial Designs (RD), among other services required. The scope and schedules of these projects will be determined and developed at the time of need.

4. **Additional Services:**

Other services that may be required include, but are not limited to, environmental compliance reviews of DelDOT maintenance and operation procedures; further refinement of environmental contract specifications; guidance on lead paint and asbestos issues; Legal interpretations concerning environmental regulations; continued education of environmental issues for DelDOT personnel; and general environmental coordination with state and federal regulators, citizens, legislators, and other affected and interested parties. All reporting documentation and other deliverables must be submitted within the established agency(s) required timeframes and deadlines.

The overall program will involve individual and group site assessments. Assessments, investigations, remedial design and implementation will be monitored individually and will most often take place concurrently with other ongoing tasks. Also, separately and concurrently to the three phases of Environmental Investigations, the program will also provide DelDOT with environmental expertise and resources to evaluate environmental contamination issues identified on DelDOT transportation projects and State owned properties. The program is to be implemented over a period of three calendar years.

NOTE: The use of subconsultants/subcontractors to provide the required services under this contract will be subject to prior Department approval.

REQUIRED CERTIFICATION FORMS

All firms responding to the RFQ must complete and return the Submission Forms located in 'Appendix A' of this document.

OVERVIEW OF SELECTION PROCESS

The Expressions of Interest will be used to determine a reduced candidate's list/short list and also will be used for reference material during the actual selection process. Once a short list has been determined, a mandatory pre-proposal meeting may be established for a briefing and to provide an opportunity for the short-listed candidates to ask questions. Once the Pre-proposal Meeting has been completed, there may be a written submission and/or oral interview sessions scheduled, after which the committee will determine the successful candidate. The Department's Professional Services Procurement Manual may be viewed [here](#).

After the selection process has been completed, applicable price information will be requested from the successful candidate; i.e. salary rates for various classifications of personnel, and an indirect cost derivation for the most current accounting period. It is expected that all firms submitting are prepared for the work and include necessary work materials in their overhead rates. If an interested firm is requested to submit a priced proposal, the proposal should substantially reflect the same composition and area of involvement as the Expression of Interest submission.

Payroll burden and overhead will be computed on direct salary costs only (not including overtime) at the consultant's audited rate, as per Federal Acquisition Regulations Part 31, and Department policies. Computer and CADD costs are not allowable as a direct cost to this project. Rate determination and applicability is subject to audit by the Department. Additionally, candidates should be prepared for the Department to work with your current accounting firm to provide information and backup documentation. Full and immediate cooperation is required to avoid delays in execution of an agreement. Failure to cooperate may result in breaking off of negotiations and moving to the next ranked firm.

FEDERAL CONTRACT PROVISIONS

FTA's Master Agreement contains a current, but not all-inclusive, description of statutory and regulatory requirements that may affect a recipient's procurement (such as Disadvantaged Business Enterprise (DBE) and Clean Air requirements). The Master Agreement states that applicable Federal requirements will apply to project participants to the lowest tier necessary to ensure compliance with those requirements. A recipient will also need to include applicable Federal requirements in each subagreement, lease, third party contract, or other document as necessary. For specific guidance on cross-cutting requirements administered by other Federal agencies, FTA recommends that the recipient contact those agencies.

The requirements listed herein must be adhered to by any firms selected to perform work required under these agreements.

1. AUDIT AND INSPECTION OF RECORDS

The Contractor agrees to provide the Delaware Department of Transportation (Department), the FTA Administrator, the Comptroller General of the United States or any of their authorized representatives' access to any books, documents, papers and records of the Contractor which are directly pertinent to this contract for the purposes of making audits, examinations, excerpts and transcriptions. Contractor also agrees, pursuant to 49 C. F. R. 633.17 to provide the FTA Administrator or his authorized representatives including any PMO Contractor access to Contractor's records and construction sites pertaining to a major capital project, defined at 49 U.S.C. 5302(a)1, which is receiving federal financial assistance through the programs described at 49 U.S.C. 5307, 5309 or 5311. By definition, a major capital project excludes contracts of less than the simplified acquisition threshold.

The Contractor agrees to permit any of the foregoing parties to reproduce by any means whatsoever or to copy excerpts and transcriptions as reasonably needed.

2. ACCESS REQUIREMENTS FOR INDIVIDUALS WITH DISABILITIES

The Contractor agrees to comply with all applicable requirements of the Americans with Disabilities Act of 1990 (ADA), 42 U.S.C. Section 12101 *et seq.* And 49 U.S.C. Section 322; Section 504 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. Section 794; Section 16 of the Federal Transit Act, as amended, 49 U.S.C. App. Section 1612; and implementing regulations, as may be amended

3. CERTIFICATION REGARDING DEBARMENT, SUSPENSION, AND OTHER RESPONSIBILITY MATTERS – Lower Tier Covered Transactions (Third Party Contracts over \$100,000)

- a) By signing and submitting this bid or proposal, the prospective lower tier participant is providing the signed certification set out below.
- b) The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later

- c) determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the Department may pursue available remedies, including suspension and/or debarment.
- d) The prospective lower tier participant shall provide immediate written notice to the Department if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
- e) The terms “covered transaction,” “debarred,” “suspended,” “ineligible,” “lower tier covered transaction,” “participant,” “persons,” “principal,” “proposal,” and “voluntarily excluded,” as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549 [49 CFR Part 29]. You may contact the Department for assistance in obtaining a copy of those regulations.
- f) The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized in writing by the Department.
- g) The prospective lower tier participant further agrees by submitting this proposal that it will include the clause “Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transaction”, without modification, in all lower tier covered transactions.
- h) A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the No procurement List issued by the U. S. General Service Administration.
- i) Nothing contained in the foregoing shall be construed to require establishment of system of records in order to render in good faith the certification required by this clause. The Contractor shall promptly submit its termination claim for payment. If the Contractor has any property in its possession belonging to the Department, the Contractor will account for the same and dispose of it in the manner the Department directs.

Termination shall be affected by serving a notice of termination on the Contractor setting forth the manner in which the Contractor is in default. The Contractor will only be paid the contract price for supplies delivered and accepted, or services performed in accordance with the manner of performance set forth in the contract.

If it is later determined that the Contractor had an excusable reason for not performing, such as a strike, flood, events which are not the fault of or are beyond the control of the Contractor, the Department, after setting up a new delivery or performance schedule, may allow the Contractor to continue work, or treat the termination as a termination of convenience.

In the event the Department exercises its right of termination for default, and if an amount for liquidated damages is set forth, the Contractor shall be liable to the Department for excess costs and, in addition, for liquidated damages in the amount set forth, as fixed, agreed, and liquidated damages for each calendar day of delay, until such time as the Department may reasonably obtain delivery or performance of similar supplies or services.

If the contract is so terminated, the Contractor shall continue performance and be liable to the Department for such liquidated damages for each calendar day of delay until the supplies are delivered or services performed.
