

**Delaware Department of Transportation**  
**QUESTIONS AND ANSWERS**  
**Project Name**  
**201501 Request For Information**  
**Thursday, September 3, 2015**

Q #	Question	Answer
6	Can you provide a list of systems (and vendor names) and processes which are currently in place that are handling what the solution(s) will handle?	The Department has many sources of data such as for weather, traffic volume, traffic movement, work zones and more. The Department is looking for information of intelligent systems capabilities under data requirements.
5	Does the Department anticipate the upgrade or replacement of the existing phone system?	The Department is not looking at specific elements for the solution at this time. The vendor is free to propose alternatives and reasons for the different approaches. Information sharing can happen many ways. The vendor is to propose their solution.
4	When would the Department like a solution(s) in place to achieve the goals within the RFI?	That information is not available at this time.
3	When does the Department anticipate having a strategy for the advancement of the project developed?	That information is not available at this time.
2	Does the Department have an idea of how much the project cost will be?	No. However, if vendors wish to respond with detailed cost estimates the Department will accept it.
1	Have monies been secured for procurements related to this effort and if so, through what source?	That information is not available at this time.
