

Delaware Department of Transportation
QUESTIONS AND ANSWERS
EROSION, SEDIMENT, AND STORMWATER MANAGEMENT (ES2M)
Agreement 1973S
1/20/2020

Q #	Question	Answer
2	Could you please provide additional definition/clarification on the key staff roles?	The key staff may be comprised of multiple consultant personnel to assist with task assignments; however, there is expected to be one primary person meeting all the consultant requirements to work closely with the DelDOT Stormwater Engineer. The key staff will provide plan and stormwater/drainage report review services, conduct research on stormwater related practices/technologies, and update guidance and requirement documents as needed.
1	Will this DelDOT task require any on-site staffing needs? If yes, approximately how many hours/week would that come up to?	Yes. Approximately 20 – 30 hours per week.
