TERMS AND CONDITIONS

Prices are F.O.B. Mifflintown, PA, and are subject to change without notice.

Terms are net 30 days from date of invoice to those customers with approved credit. All others, check with order. Freight charges are as determined and collected by the carrier unless DuMor is instructed to prepay and add to the invoice for the merchandise. All products manufactured by DuMor are warranted against defect in materials and/or workmanship and in accordance with our published specifications. In addition to a standard one-year warranty on all products, DuMor also offers a limited 20-year warranty against structural failure of all steel bench frames, steel bench assemblies, table frames, litter receptacle frames, and all cast iron bench supports; limited 5-year warranty against structural failure of Douglas Fir, Redwood, and Ipe wood slats; a limited 10-year warranty against structural failure of recycled plastic; and a limited 3-year warranty on bike racks. These warranties cover only those items which have been installed according to our detailed instructions and do not cover abnormal use or vandalism. Contact your local DuMor representative for details of the extended warranty program. DuMor is not responsible for loss or damage of products in transit. Any shortages or damage should be noted on the freight bill before signing. In the interest of product improvement, DuMor reserves the right to alter product design, material selection, or construction without notice.

COATING METHODS

DuMor recognizes the importance of a high quality finish on our site furnishings. That's why we offer a state-of-the-art polyester powder finish on all metal components. Three key elements are essential to achieving an attractive, durable finish: proper surface preparation, proper application of the powder, and proper curing.

All metal components offered by DuMor are: 1) Blasted to white metal, 2) Processed through an 8-stage wash system, 3) Coated with zinc-rich primer, 4) Finished with a top coat of TGIC-polyester powder, and 5) Cured for approximately 20 minutes.

Please note that due to variations in photographic reproductions, natural wood grains and colors shown throughout may not be exact. Please contact your local DuMor representative for color and wood grain samples.

WOOD SPECIES

DuMor has selected the highest grade woods available for use on our products "C" & Better Douglas Fir and IPE wood are offered as standard wood options. Requirements for other wood species not offered are available upon special request and quoted on a per-job basis.

DOUGLAS FIR

IPE

As a natural product of our environment, wood will weather when placed outdoors. Signs of weathering include splitting, checking, and changing color. These are not covered by DuMor's warranty.

RECYCLED PLASTIC

The high-density polyethylene raw material utilized in our recycled plastic furnishings is derived from post-consumer bottle waste resulting in a product that is over 90% recycled.

REDWOOD

COLOR OPTIONS

Most DuMor products are available in your choice of several color options in a super durable baked-on polyester powder finish. Additional colors are available at an extra cost—consult your local DuMor representative.

* This is not a super durable powder finish.

RECEPTACLE 200/300

The flexibility of the DuMor 200/300 Series Receptacles allows you the option of including the name of your city or town, corporate logo, school name/logo, or your own unique design with custom lettering. Simply provide a detailed drawing of your idea and we would be happy to create your one-of-a-kind receptacle for you. (All custom designs are subject to DuMor's review and approval.) A 200 series receptacle is a top emptying receptacle and a 300 series is a side door emptying receptacle.

SELF-WATERING PLANTER SYSTEM 49

DuMor Site Furnishings now offers EarthPlanter Premium Self-Watering Inserts as an option or retrofit for a large selection of our planters. The EarthPlanter system is the perfect solution for any commercial application that desires the beauty of real plants without daily maintenance.

Available for the following DuMor planters: 114, 122, 149, 159, 184, 430, 431

Planting Tray for soil-less mixture. Design promotes excellent water retention, aeration and drainage.

RapidWick™ Watering System delivers the nutrients your plants need, automatically!

Large water reservoir allows you to go up to 2 weeks between watering.

Side overflow outlet ensures planter can't be overfilled.

\$390

- Classic design
- Fluted top

CUSTOM PLAQUES

An attractive and enduring way to show sponsorship of a DuMor bench is with a dedication plaque. DuMor plaques are made of durable etched zinc with a bronze style finish. Zinc plaques are long lasting and offer versatility for etching detailed designs, crisp text, illustrations and photo transfers. DuMor offers plaques in a wide range of sizes and shapes to meet specific needs. Most DuMor products can be fitted to display a dedication plaque; ask a DuMor representative if your chosen product can accommodate a plaque to fit your specifications. Dedication plaques can be used in many of ways including, remembrance of a loved one, company logo, town or city name, quotes, sports teams, school name or family name. Given the versatility of DuMor dedication plaques on site furniture, many communities have had great success fully funding both benches and plaques with "Sponsor a Bench" programs which allow people to contribute to the community and place a message on a plaque.

...remembrance, dedication, sponsorship, inspiration...

DUMOR CUSTOM PRODUCTS

In addition to our comprehensive selection of standard products, DuMor provides custom design and fabrication options to meet the needs of designers and architects whose requirements aren't always met by off-the-shelf site furnishings. Choose from a variety of high-quality raw materials including wood, steel, and recycled plastic, or customize with plaques and lettering options. DuMor's design flexibility makes creating a custom indoor or outdoor site easy and affordable. You'll see that DuMor's reputation for style and durability is reflected in every custom product. For more information on custom fabrication, please contact your local authorized DuMor representative or call 800-598-4018.

PRODUCT DESIGN WITH THE ENVIRONMENT IN MIND

► Our Commitment to Sustainability

DuMor recognizes the importance of using recycled material in our entire product line. This reduces solid waste volumes in landfills, helps conserve natural resources and limits the environmental impacts resulting from the extraction of virgin materials.

► Pre- and Post-consumer Recycled Content

We utilize pre- and post-consumer recycled material in all of our products. Pre-consumer material is material diverted from the waste stream during the manufacturing process. Post-consumer material contains waste material generated by households or by commercial, industrial and institutional facilities in their role as end-users of the product, which can no longer be used for its intended purpose. Used milk jugs and old railroad tracks are examples of post-consumer materials used in our products. Please contact your local DuMor representative for details on the pre- and post-consumer recycled content of our products.

► Eco-friendly Material Composition

Our product line is composed of three primary materials: steel, recycled plastic and sustainably-harvested wood, all of which possess eco-friendly attributes.

Steel-The majority of steel in our products contains over 80 percent recycled material, most of which is post-consumer. Our primary supplier of steel utilizes the Electric Arc Furnace (EAF) technology, which takes advantage of post-consumer scrap material for major feedstock, unlike blast furnace operations which use mined iron ore as major feedstock.

Recycled Plastic-Many of our products feature the PolyTuf Plastic Lumber product. PolyTuf is manufactured using 100% recycled milk jugs (post-consumer high density polyethylene). We also donate our scrap plastic to the manufacturing of new PolyTuf product, further reducing waste stream volumes.

Sustainably-Harvested Wood-We make it a priority to purchase only sustainably-harvested wood derived from stringently-regulated timber source locations, including: California, Oregon, Washington and British Columbia.

Please contact your local DuMor representative for more details on the eco-friendly attributes of our product line.

► Compatibility with LEED® Rating System

Leadership for Energy and Environmental Design (LEED) is the world's most well-recognized and sought-after green building rating system, created and administered by the United States Green Building Council (USGBC).

Achieving LEED certification is contingent upon earning credits, which provide guidelines for the design and construction of high performance, durable, healthful, affordable and environmentally-sound buildings.

Many of our products could help design teams earn LEED credits. Please contact your local representative to learn more about how DuMor's products can help your project achieve LEED certification.

MAINTENANCE & CLEANING

The following guidelines can be followed to provide general maintenance and cleaning for DuMor Site Furnishings.

As with any product used in a commercial application, an annual or semi-annual inspection of the product should be conducted. Any loose or missing hardware should be tightened or replaced immediately. If any part of the item is found to show excessive wear or is cracked or broken, the product should be taken out of service until all repairs are made.

All wood components should be inspected for excessive cracks or splits and repaired or replaced as needed. The surface of wood components should be checked for splinters and sanded as required. Discoloration of wood can be treated using a 50/50 mixture of household bleach and water. Mix the solution in a plastic bucket only. Using rubber gloves and a mild bristle brush, apply the mixture and lightly scrub, leaving the mixture on the wood for 3 to 4 minutes. Rinse with clean water. Allow the wood to dry, and then recoat with a clear non-toxic, oil-based or water-based preservative.

All recycled plastic components offered by DuMor are extruded 100% polyethylene. If the surface requires cleaning only, any household cleaner such as Fantastik®, Formula 409®, or Armor All® may be sprayed on and wiped off. If the surface has been marked with graffiti, a high-pressure washer may be used to remove the graffiti. Severe scratches and carvings into the surface may be hand sanded with a fine grade of sandpaper.

All steel components have been finished with a baked-on polyester powder coating which offers long-lasting protection against acids, salts, and corrosive moisture. Because of its smooth texture, it will stay cleaner than wet-applied paint or a galvanized surface. Our powder coating forms a finish 4-6 mils thick when cured and becomes a sacrificial coating giving superior chipping resistance. If the surface requires cleaning only, any household cleaner such as Fantastik®, Formula 409®, or Armor All® may be sprayed on and wiped off. If, however, the finish is abraded to the point of exposing the steel or similarly rusted, lightly sand the surface being careful to remove all rust as well as any loose finish materials. Once this sanding is complete, clean the surface with a solvent such as paint thinner to remove any remaining contaminants which might hinder proper paint adhesion. A good grade of exterior metal primer and top coat of matching color enamel should then be applied over the prepared surface.
