Arius Classic Home Pianos

As easy to operate as they are to listen to, Arius digital pianos give a more traditional look of rosewood or black walnut finish to an otherwise hi-tech musical instrument.

B = Black Walnut, DA = Dark Alder, DR = Dark Rosewood

For every action, there is an explanation:

GRADED HAMMER EFFECT (GHE) ACTION

- This premium weighted action provides greater accuracy for faster repetitive passages required by intermediate and advanced pianists. Professional grade components provide a smoother, quiet mechanism when striking the keys.

GRADED HAMMER STANDARD (GHS) ACTION

- Well-suited for the beginner pianist, GHS action delivers the graded action piano teachers recommend for building proper playing technique.

Portable Grand

What happens when you take all the fun and interactivity of a Yamaha portable keyboard and give it a weighted action and a matching stand? You get America's number one selling digital piano series for 4 years running.

LC3 Music Lab

The LC3 is an affordable multi-purpose music lab (developed for Yamaha by J.L.Cooper) that features a modular and expandable design that makes it perfect for a variety of different electronic instruments like digital pianos, guitars, digital drums & keyboards.

LC3-16SET	16-student expanded lab including LC3BASE and LC3EXP	\$6198.00
LC3BASE	Basic 8-student LC3 lab complete hardware	4999.00
LC3EXP	8-student expansion for LC3BASE	2199.00
LC2 CM500	Optional additional or replacement headset with built-in microphone	80.00

*Orders for LC3BASE and LC3EXP accompanied by a school PO that includes all Yamaha musical instruments for the lab are eligible for a 20% discount.

The LC3 Music Lab offers music educators an intuitive, flexible way to teach a group of students either all at once, one-on-one, or split into smaller groups - all without ever leaving their own instrument.

Lab-Based Music Education

The LC3 Music Lab system effectively allows an instructor ubiquitous control over classes expandable to as many as 48 students. Using a system of headphones/mics, it's as if each student is isolated in their own virtual practice room - ideal for private practice or one-on-one instruction with a teacher. Any instrument with a stereo headphone output can be taught using the LC3, including Yamaha keyboards, digital pianos, Silent Series brass and string instruments, or electronic percussion.

Yamaha Exclusive Features Come Standard

- Heavy-duty CM500 Headset Microphones for listening and class communication
- Store and Recall Memories, customize 6 classroom configurations via the control unit
- Convenient Mega Group feature connects up to 48 students with the single press of a button
- Enhanced grounded power supply and circuitry tremendously reduces noise floor in labs with less-than-perfect electrical grounding
- Intuitive installation and operation guides
- PC/Mac inputs for each student, ideal for optional computer/music recording
- Educator Utilities CD-ROM

It's All In One Box

The LC3 BASE comes with everything needed (except the musical instruments) for 8 students and 1 teacher (9 stations). That's all the headsets, cabling, I/O boxes, Hub and Control Unit to get a lab up and running fast. The LC3 EXPANSION comes with everything needed to add 8 more students to the LC3 BASE (max 48 students).
