FULL-LINE CATALOG | 2011

Working to support music performance and education for over 75 years, KHS Musical Instruments Co., Ltd, has become one of the largest musical instrument producers in the world. A company with global resources, KHS selects the finest materials available and exercises quality controlled manufacturing in its state-of-the-art, company owned factories, ensuring consistently high performance and reliability.

JUPITER®

For almost thirty years, Jupiter has grown from a simple student instrument supplier to a full line maker of standard, intermediate, professional and background wind instruments. At the professional level, the XO line from Jupiter is winning high acclaim for its design and performance. Leading performers, including Roger Ingram, lead trumpet for Harry Connick, Jr., trombonists Harry Watters, Michael Davis, Boston Brass and others are choosing XO by Jupiter as their professional instruments of choice.

MAPEX®

Mapex Drums deliver the performance that drummers want. With superior clarity and voice, Mapex offers a truly unique drumming experience. Mapex designers and engineers construct Mapex shells to achieve their rich and distinctive sound. With world-renowned performances on concert stages, studios and the marching field, top drummers know that Mapex drums explode with sound, that Mapex drums last, and that Mapex is the leader in drum performance. More of tomorrow's best new drummers are playing Mapex today.

majestic

Drawing on the designs of classic German timpani makers, Majestic timpani have been appreciated and preferred by symphonic percussionists throughout Europe for nearly a century. Looking ahead, Majestic has been steadily expanding this commitment to the percussive arts by introducing exquisite mallet instruments, concert drums and field percussion. The performance opportunities provided by these innovative designs have won accolades on some of the world's most demanding stages.

AZUMI
by
Altus

Azumi Flutes are manufactured by the world-renowned Altus flute company which brings the features of the handmade professional flute to every player. The incredible, Z-Cut headjoint is the same available on the flutes used by professionals and the .958 Britannia silver construction is the highest silver content available in its class. By using the most durable mechanism and keywork in the industry, the SP-1 springs provide the same professional feel as the hand-crafted Altus instruments.

AZUMI™ Wave-Line™

The Wave Line flute is uniquely positioned to help the beginning flutist reach maximum playing potential more quickly and easily. The patented headjoint designs, combined with comfortable key placements make playing more enjoyable. The simplified mechanisms provide unrestricted fingering, while the ergonomically designed headjoints create full, colorful tone quality.

"For over a decade, I have loved the gorgeous range of tonal colors my flute gives me. It allows me to play the darkest sound imaginable and then in an instant, play a most transparent tone effortlessly. It's very even throughout the registers, the keys respond flawlessly and it has impeccable intonation thanks to the Altus-Bennett scale."

Denis Bouriakov
Altus Artist, Principal Flutist
New York Metropolitan Opera

The Azumi flute allows the player to pursue higher levels of performance with an instrument that can keep pace with that growing expertise. The world-renowned flute makers who handcraft Altus flutes have created Azumi flutes to satisfy the needs of the ever-improving flutist.

Azumi flutes are designed with the highly precise Altus-Bennett scale, based on the work and recommendations of legendary British flutist William Bennett. Materials include unique .958 Britannia silver and coveted SP-1 springs that are specially created for Altus professional flutes and provide for light and consistent action. Azumi flutes also include a most distinct feature – the Altus Z-cut professional headjoint – the same headjoint used on Altus flutes. Azumi players enjoy the same quick response, full projection and dramatic tone as professional Altus players.

AZ2000SRBO

AZ3000SRBEO

The special SP-1 spring sets used on Altus and Azumi flutes contain a unique blend of white gold and other precious metals which produce an incredibly light, resilient key action unlike stainless steel or other alloys. This material has remarkable memory and lasting durability.

JUPITER[®] diMEDICI

C Flutes

1211RBS

1311RBS

Jupiter's diMedici series reflects a commitment to preserving traditional features in the making of modern instruments. Classically aesthetic features like French pointed arms and elegant engraving (1211 & 1311 models) are combined with a selection of custom headjoints, tube materials and key options that allow players to individualize the look and sound of every instrument.

"The diMedici flutes get high marks in the characteristics necessary to be considered fine instruments."

Mark Thomas
Artist and Educator
Founder of NFA

diMedici flutes have a selection of hand finished **Sterling Silver (.925) Custom Headjoints** offering players great flexibility to personalize their sound, and are available with an optional **Gold-Plated Lip Plate**. See [pricelist](#) for more information.

The 631 series is the standard for the beginning clarinetist. These models are offered in two different bore sizes and trill key configurations to meet the demands of most educators. Available in both Grenadilla wood and ABS body materials, these instruments are built to produce a full, rich tone quality with exceptional intonation and playability.

Premium Grenadilla wood provides players with a rich, mature tone. The adjustable thumb rests, refined keywork and smooth operating mechanism make Jupiter clarinets both comfortable and highly responsive.

B \flat Bass Clarinets

The 673BN and all new 675N bass clarinets fill the warm, woodwind voicing essential to any band or ensemble. Both instruments include ergonomically designed key mechanisms for effortless playability. An adjustable thumb rest and adjustable floor peg provide additional player comfort. The 673BN comes with a one-piece case to accommodate the assembled body. The 675N comes with a unique multi-section case for exceptional mobility.

On the 675N, The low E \flat key is mounted on the body of the instrument. This practical feature protects the key mechanism and stabilizes proper key regulation.

Sam Pilafian and Pat Sheridan, Chief Design Consultants for Jupiter Band Instruments, possess more than half a century of experience designing brass instruments for top players throughout the world. The pair has aided in the creation of several marching and concert brass instruments, including horns in the highly respected Quantum Marching and XO Professional product lines.

Aside from their highly respected design prowess, these gentlemen carry with them esteemed performance careers that span over four decades. They have left an indelible impression within the world of brass ensemble, both as performers and as educators. Pat and Sam continue to play in top venues across the globe, and are true ambassadors for Jupiter brass.

Fiberglass models are available with a comfortable nylon carrying bag instead of a hard shell case. Specify 596LB for lacquered brass model (MSRP \$3,540.00) or 596SB for the silver-plated model (MSRP \$3,985.00).

Artist Series Concert Toms

"I really love the fat, enveloping tone produced by the thin maple and walnut shells of the Mapex Artist series toms and Majestic Prophonic bass drum. These shells and the I.T.S. mounting system create a sound which can be felt. I also like very much that this hardware allows easy positioning within my multi-percussion set-ups."

Nebojsa Jovan Zivkovic

Mapex Concert Percussion Artist, World Renowned
Percussion Composer and Performer

Single-Headed

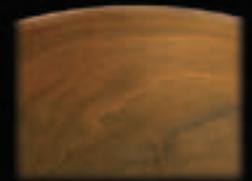

The patented Mapex Isolated Tom Mount System (I.T.S.)

The foundation of Mapex's Artist series concert toms is the thin 5.1mm shell featuring four outer plies of Maple with two interior plies of Walnut. The combination of this shell with the I.T.S. suspension mounting system and small, single point mounted lugs yields a sound that is warm, open, focused, and musical. Both single and double-headed versions are available in eight sizes each, ranging from 6" to 16".

See page 61 for tom stand information.

Double-Headed

Two interior plies of Walnut deliver a dark, rich sound with a wide tonal range.

ARTIST TOM SETS—SINGLE HEADED

Concert Series Tom Sets

By rising to the challenge of providing pro-level features at a reasonable price, the Mapex Concert series toms set a new benchmark for what should be expected in the school band percussion section.

Birch/Maple combination shells feature single screw, low mass lugs and utilize the I.T.S. mounting system to minimize shell contact and maximize tone and resonance. Available in both single head and double head configurations, the Concert series toms are sold in sets of two and include a double stand.

See page 61 for stand information.

Symphonic Grand Series

With an incredibly smooth and secure block pedal system, the Symphonic Grand series makes pro level features and performance accessible to a wide range of ensembles. This series combines all benefits of a piston clutch pedal system with a hand fine tuner/master tuner and the innovative foot fine tuner with adjustable resistance. The resulting instruments are perfect for advanced high school percussion sections, universities, and most professional applications.

Symphonic Series

Popular for use in middle school and high school ensembles, as well as college percussion studios, the Symphonic series features flexibility to choose between suspended precision hammered cambered copper kettles, suspended smooth polished cambered copper kettles, or suspended parabolic FRP kettles. The balanced pedal employed by all Symphonic models is known for its accurate stability, and distinctively light, smooth action. The built-in third wheel assembly under the pedal provides easy, stable movement. Symphonic timpani also come complete with easy-to-read tuning gauges and full-length padded covers with zippers.

Harmonic Series

As popular with traveling professionals as it is with schools, the Harmonic series offers performance, precision and stability like no other portable timpani. Majestic's exclusive FRP fiberglass kettle with steel-bearing hoop ensure quality sound and response. The exclusive folding leg system is made of rugged cast aluminum for durability and stability. The legs and pedal structure lock securely in place during performances and fold to a surprisingly compact size.

Concert Series

The Majestic Concert series timpani offer extremely lightweight and advanced performance features. The block pedal system has exceptionally smooth, light action over the entire range of nearly one octave thanks to a newly designed mechanism. This pedal, in combination with the stable retractable four leg design, allows an extended range of height-adjustability, perfect for drum set use in pit orchestra settings, or for younger players.

Prophonic, Harmonic, and Concert models come complete with padded drop covers with zippers. Optional carrying bags are available for transporting all portable timpani models.

Concert Marimbas

M8650H

Majestic concert marimbas with Honduran rosewood bars are available in 5 or 4.3 octave models featuring newly designed bar posts with felt insulators, and a revolutionary re-leveling rail system. The M8650H professional marimba features our highest grade of bar quality, a padauk wood frame with detailed inlay and champagne finished resonators with tunable low register.

In recognition of the cost and growing scarcity of rosewood, Majestic offers two other viable bar materials in its marimba line up. Jestech™ synthetic bar material was developed to better mimic the sonic properties of wood bars while still having the durability required to maintain intonation and appearance under the rigors of school use, while padauk wood offers warm sound and a softer feel that yields an ideal home practice instrument for aspiring percussionists. The Majestic M6543D offers five bar graduations and full featured frame/leg system that place it among the finest padauk bar instruments available.

The new Majestic X8540H four octave professional xylophone features graduated bars of select Honduran rosewood and an elegant natural wood frame. The advanced bar production methods employed by this instrument include an extended range of quint tuning and tonally matched wood selection, making it ideal for solo or ensemble performance.

Professional Concert Xylophone

"I have found the X8540H to have a warm, consistent tone throughout its 4 octave range. This will allow for great flexibility in its application to a variety of musical situations. Bravo Majestic!"

Don Parker

Majestic Mallet Percussion Artist,
Associate Professor of Music/Percussion,
Music Coordinator at Fayetteville State University

The longer bar geometry of Majestic's X7535 xylophone is reminiscent of the prized American classic xylophones and provides a full sound that's ideal for orchestral and solo work. Available in Honduran rosewood or Majestic's warm JESTECH synthetic bar material, these models provide a rich, full sound in all registers. Meticulous quint tuning in the American tradition ensures that Majestic's entire line of xylophones offer outstanding tone for every stage.

Concert Drum Stands

Mapex snare drum and tom stands feature double braced legs, die cast memory locks and dual tube construction with slip-proof nylon sleeves to offer stability and durability. The ball-in-socket joints allow full freedom of positioning while providing a secure hold.

Majestic offers three types of bass drum stands to suit the performance and budget needs of any program. The tilting concert stands provide suspension for Majestic Concert series bass drums and allow free rotation at any angle. The field version of this stand adds a heavy-duty wheel deck and 8-inch tires to better accommodate transport over any surface. The universal folding stand provides quick set-up and stable positioning of any size bass drum.

The Quantum family of marching snare drums includes the HT, XT, and Agility models. All three feature two interior plies of birch and four exterior plies of maple for a warm overall sound with an enhanced attack and rimshot characteristic, and a special snare bed that provides superior snare response. The HT model is for ensembles seeking a more conventional look and sound at low to medium-high tension. The XT has the ability to support the highest tension tuning schemes and all batter and snare head types. The reduced shell depth of the Agility model offers reduced weight and enhanced articulation for indoor and outdoor applications.

The Mapex Quantum tom shells feature interior plies of Walnut and progressive cutaways that produce a full, dark tonality with intense clarity and projection. Walnut reinforcing rings provide shell stability while retaining the characteristic warmth of the shell.

Marching Toms

QCT680234
SEXTET

Mapex Quantum Agility Multi-Toms provide the reduced carrying weight of shallower shells in response to the ever-increasing demands of body movement and fast-paced drill on the field and the floor. Greater clarity for arenas and domed stadiums is created without sacrifice of feel or pitch through the special acoustic physics of the minimal frontal cutaway and radical porting system.

THE ACADEMY

DRUM AND BUGLE CORPS

Quantum Bass drums feature progressive air vent placement for a more consistent sound and feel throughout the bass ensemble and are outfitted with chambered aluminum hoops that provide strength and stability while eliminating the need for additional rim protection. Lightweight, aluminum tube lugs minimize shell contact while ensuring the best possible alignment of tension rods to keep tuning stress off the shell.

See pages 70-73 for full selection of carriers, stands, and accessories.

The Mapex Qualifier marching drum series offers traditional design and reliable function.

The Qualifier Deluxe model snare drum supports high-tension with its aluminum bearing edge, cast hoops, full-length lugs and Pro snare strainer, while the standard models offer reduced weight and simplified function.

Qualifier toms and bass drums offer high-strength, cast aluminum lugs for reliable tuning while keeping the weight manageable for younger players.

See pages 70-73 for full selection of carriers, stands, and accessories.

Saturn

The Mapex Saturn is ideal for any professional studio application and has been extensively tested on tours by Mapex artists for years. Saturn is available in a wide variety of complete drum sets and shell packs.

With its unique thin maple and walnut shell, Saturn produces a deep, rich tone that thousands of players have made their drum of choice.

- 8-ply, 7.5mm bass drums / 6-ply, 5.1mm toms, two interior walnut plies, four exterior maple plies
- Eight coat, hand applied deep gloss lacquer finish
- Exclusive Isolated Tom Mount System (ITS) on all toms
- Exclusive Isolated Tom Mount System (ITS) on bass drums
- Spring-loaded floor tom legs
- Low mass, single-point-of-contact lugs
- Low profile, cushioned, die cast bass drum claw hooks
- 2.3mm Steel Mapex Powerhoops
- Remo Emperor batter heads on all toms, Remo Ambassador™ heads on snare and Remo Powerstroke 3 on bass drums

Saturn Series drums are also available in additional shell packs configurations. For configuration and finish options, please visit www.mapexdrums.com.

Meridian Birch

Like its Maple counterpart, the Meridian Birch employs the same lightweight and ergonomic Isolated Tom Mounting System that allows precise tom positioning without sacrificing the resonance or sustain of the drums.

The Meridian's thin birch shells offer plenty of attack and remarkable tone. Meridian Birch drum sets come with Mapex 700 Series hardware.

- 6-ply all birch, 7.2mm toms and snares, 7.2mm bass drum
- Newly engineered Isolated Tom Mount System (ITS)
- Newly designed lug with smaller footprint for lower overall mass
- Eight coat, hand-sanded, high gloss lacquer finish
- Redesigned Bass drum tom mount with and built-in adapter for optional boom arm
- Low-profile, recessed bass drum claws with cushioning gasket
- All birch snare drum
- Remo UT heads
- Instructional Setup DVD included

For more information on Meridian Birch, please visit www.mapexdrums.com.
