I. INTRODUCTION

A. Background

The mission of the Division of Public Health is to protect and enhance the health of the people of Delaware. The Division accomplishes its mission by:

- working together with others;
- addressing issues that affect the health of Delawareans;
- keeping track of the State's health;
- promoting positive lifestyles;
- responding to critical health issues and disasters;
- promoting the availability of health services.

The accomplishment of this mission will facilitate the Division in realizing its vision of creating an environment in which people in Delaware can reach their full potential for a healthy life.

Since 1986, the Division of Public Health (DPH) has worked with community partners to provide critical services to HIV/AIDS clients. There are approximately 3,700 Delaware citizens living with HIV/AIDS- and 70 per cent of them live in New Castle County. Their medical conditions vary from home bound to having a productive life, including working full time. However, they all have HIV program needs to one extent or another.

The combined state/private partnership HIV prevention program provides comprehensive HIV medical treatment including management of medical co-infections and Hepatitis B and C, OB-Gyn, and women's health services, mental health assessment and counseling, substance abuse treatment and HIV case management provided by the Ryan White HIV/AIDS Treatment Extension Act of 2009. In addition, the HIV Program provides outreach and education to family planning sites throughout the state.

The HIV Program provides a wide array of services including HIV counseling and testing, treatment to include the provision of medications under the Ryan White "AIDS Drug Assistance Program" (ADAP). Currently the DPH HIV Program is available in all three Delaware counties and continuity of care to these HIV/AIDS clients is a critical factor in the success of this program.

B. Project Goals: To provide HIV/AIDS services to eligible clients in Delaware by achieving the following goals:

- Reducing the number of new patients entering into care who are already AIDS-defined.
- Increasing access to primary health care and increasing utilization to the underserved by establishing clinical services in faith-based organizations.
- Providing quality health care to HIV clients in a culturally competent, patient centered, community-based setting.
- Increasing patient understanding regarding HIV infection and self-care. This will increase client participation in health care decisions.
