RFP COORDINATOR

Page 11: Overview of Core and Value-Added Services

In order to bid on this scope of work, DSAMH is requiring providers offer a Core set of services that consist of selected PROMISE services as well as selected Non-PROMISE services. Any RFP response that does not provide all Core services will not be accepted. **However, DSAMH will consider proposals that sub-contract Core Services.** In addition, bidders are also asked to consider providing one or more Value Added services. Bidders could also demonstrate the presence of subcontract relationships and/or other meaningful partnerships with providers of Value Added services not offered by the bidder in order to ensure individuals are easily able to access these additional services. While Value-Added services are not mandatory, bidders who offer these services can receive up to 45 points for service functions and 120 points total. As stated earlier, this RFP offers the opportunity to create a continuum of services and is not intended to replace existing services such as standalone CBHOT, Group Homes, or other SUD services.

Page 71, Section G. Core Services;

For each of the required Core Services, detail the following separately.

- a. Name of Core Service (if bidder proposes sub-contracting a Core Service, state the name of the sub-contractor. All of the following questions in this section must pertain to the named sub-contractor) :
- b. Abstract of Bidder's experience with specific Core service:
- c. Specifically describe the geographic area(s) where the service will be provided. Beneficiaries will be served in regular business, industry, and community settings. DSAMH will consider awarding services to more than one Contractor. The goal is to ensure that services are provided to all three counties in the state.
- d. Bidder's client engagement strategies and use of EBP's for the identified Core service.
- e. Bidder's strategy for deployment if Core Service is not currently offered (reference detailed work plan in Section K).
