  - a. Review and discuss waste management plan including responsibilities of Waste Management Coordinator.
  - Review requirements for documenting quantities of each type of waste and its disposition.
  - c. Review and finalize procedures for materials separation and verify availability of containers and bins needed to avoid delays.
  - d. Review procedures for periodic waste collections and transportation to recycling and disposal facilities.
  - e. Review waste management requirements for each trade.
- 3. Minutes: Record discussion. Distribute meeting minutes to all participants. Note: If there is a Project Architect, they will perform this role.

- 1.5 WASTE MANAGEMENT PLAN Contractor shall develop and document the following:
  - A. Develop a plan to meet the requirements listed in this section at a minimum. Plan shall consist of waste identification, waste reduction plan and cost/revenue analysis. Distinguish between demolition and construction waste. Indicate quantities by weight throughout the plan.
  - B. Indicate anticipated types and quantities of demolition, site-cleaning and construction waste generated by the project. List all assumptions and deforthe quantities estimates.
  - C. List each type of waste and whether it will be salvages, see clear, or disposed of in a landfill. The plan should include the following information:
    - 1. Types of estimated quantities, by weight of aDL waste expected to be generated during demolition and construction.
    - 2. Proposed methods for CDL waste always, euse, recycling and disposal during demolition including. But not limited to, one or more of the following:
      - a. Contracting with a deconstruction specialist to salvage materials generated
      - b. Selective savage part of demolition contractor's work,
      - c. Reuse of materials on-site or sale or donation to a third party.
    - 3. Proposed methods for salvage, reuse, recycling and disposal during construct, in including, but not limited to, one or more of the following.

  - 1. Total quantity of waste.
  - 2. Estimated cost of disposal (cost per unit). Include handing and tipping fees and cost of collection containers for each type of waste.
  - 3. Total cost of disposal (with no waste management
  - 4. Revenue from salvaged materials.
  - 5. Revenue from recycled materials.
  - 6. Savings in hauling and tipping fees by donating materials.
  - 7. Savings in hauling and tipping feet that are avoided.
  - 8. Handling and transportation cost. Including cost of collection containers for each type of waste.
  - 9. Net additional cost or net savings from waste management plan.

Part 2 - PRODUCTS (Not Used)

Part 3 - EXECUTION:

#### 3.1 CONSTRUCTION WASTE MANAGEMENT, GENERAL:

- A. Provide containers for CDL waste that is to be recycled clearly labeled as such with a district acceptable and unacceptable materials. This list of acceptable materials must be the same as the materials recycled at the receipting materials recovery facility or recycling processor.
- I. The collection containers for recyclable CDL waste must contain no more the 13% non-recyclable material, by volume.
- C. Provide containers for CDL waste that is disposed in a landfill clearly labeled as such.
- D. Use detailed material estimates to reduce risk of unplanned and potentially wasteful cuts.

- E. To the greatest extent possible, include in material purchasing agreements a waste reduction provision requesting that materials and equipment be delivered in packaging made of recyclable material, that they reduce the amount of packaging, that packaging be taken back for reuse or recycling, and to take back all unused product. Insure that subcontractors require the same provisions in their purchase agreements.
- F. Conduct regular visual inspections of dumpsters and recycling bin to remove contaminants.

#### 3.2 SOURCE SEPARATION:

A. General: Contractor shall separate recyclable materials hor. CDL waste to the maximum extent possible.

Separate recyclable materials by type.

- 1. Provide containers, clearly labeled by type of separated materials or provide other storage method for managing recyclable materials until they are removed from Project site.
- 2. Stockpile processed materials on-site without intermixing with other materials. Place, grade, and shape stockpiles to drain surface water and to minimize pest attraction. Cover to prevent windblown dust.
- 3. Stockpile materials away from demolition area. Do not store with drip line of remarking trees.
- 4. Store components off the ground and protect from weather.

#### 3.3 CO-MINDGLE! RUCYCLING

A. Gen ral: Do not put CDL waste that will be disposed in a landfill into a comingled CDL waste recycling container.

#### 3.4 REMOVAL OF CONSTRUCTION WASTE MATERIALS:

- A. Remove CDL waste materials from project site on a regular basis. Do not allow CDL waste to accumulate on-site.
- B. Transport CDL waste materials off Owner's property and legally dispose of them.
- C. Burning of CDL waste is not permitted.
