BE119166	N/A	SV9100 "S" CP20 CPU/SD-A2 Bundle	The new SV9100 GCD-CP20 CPU Main Processor Blade utilizes 32-bit microprocessor with DSP technology. Compared to the CP10 CPU, the clock speed is higher (667MHz vs. 553MHz) and the DRAM is doubled (1024MB vs. 512MB). A CPU Blade/SD Bundle is used to update an existing CP10 system to a CP20 and can also be used as a service spare. When updating from a CP10 to a CP20, NEC NTAC transfers all existing licenses. Soon, these updates will be available to quote in Studio and then the licenses can be automatically transferred within the LMS. Controls all system functions & operations. Provides (105) DSP resources for DTMF Receivers, Call Progress Tone Detection, Caller ID, etc. Provides (3) internal synthesized tunes or a service tone for Music-on-Hold (or external sources can be used). It must be installed in the first universal slot of the base chassis. The CP20 CPU must be equipped with an SD-A2 SD Card (for SV9100 "S") or SD-B2 SD Card (for SV9100 "E") Contains: □ Slot for required SD Card (used for system memory & InMail storage) □ Slot for GPZ-IPLE VoIP Daughter Board □ Slot for included BR2032-type 3Volt lithium battery □ (2) Control Relays for music source and external paging circuits Connectors: □ (1) USB connector for updating system software, storing system databases, licensing □ (1) Gigabit Ethernet connector □ (2) Mini audio input/output jacks (3.5mm) for music inputs (600 ohm) and/or external paging output (600 ohm) □ (1) 8-conductor mod jack for "Control Relay" contacts for music source (BGM or MOH) / external page Note: To differentiate the CP20 from the CP10 CPU blade, the CP20 has a blue stripe along the top of its faceplate. Consists of: • SV9100 CP20 Blade (GCD-CP20) • SV9100S SD-A2 2G SD Card - Provides InMail w/ approximately 40 hours of storage. - Provides VRS functions, with optional license. - Provides (48) System Resources (These are not actual licenses, as they will not be seen in the LMS)	SV9100 Upgrade Kit-A (US)	1418.00	$992.60

BE114042	640773	Resource License	Enables an SV9100 system port. Maximum of (1296) per system. (1) required for every: • Trunk port (IP/Digital/Analog) • Digital Station port • Analog Station Port • Mobile Extension • CCIS Channel • UM8000 port (always uses16) * • RGA port • NEC Meeting Center port ** Notes: The Essential License (BE119590), required for every IP endpoint, contains a Resource License. A Resource License is not required for InMail ports. SV9100S Systems: Resource Licenses are not required for SV9100 "S" systems, because all (48) resources (the maximum allowed in an SV9100S) are built into the SD-A2 memory card, which is provided in every "S" system. Therefore, you will never need to have Resource Licenses in the LMS account of an SV9100S. SV9100E Systems: The appropriate quantity of Resource Licenses is automatically added to SV9100E configurations in Studio. * UM8000: (16) Resource Licenses are required for all UM8000 applications. ** NEC Meeting Center (NMC) See NMC notes (page 22) for additional details on "IP Channels, Essential Licenses, Resource Licenses"	SV9100 Resource-Lic 01	11.00	$7.70

BE114067	640798	NetLink 1- Remote Node License	Integrates multiple systems into a single "virtual" communication server, with (1) main site and (1) or more remote sites. Notes: • (1) required per remote site. • All NetLink Node Licenses are activated to the main site in the LMS (License Server). • Includes (32) IP Channels (for the IPLE VoIP board). • NetLink can only be implemented in systems that are equipped with an IPLE Daughter Board (BE113281). • A single site with more than (4) chassis will require (1) or more Remote Node Licenses. • Maximum of (50) sites (Main plus 49 Remotes) & (1296) network-wide ports are allowed (400 trunks/896 stations). • Main site must have enough Resource Licenses to accommodate the trunks and stations of all networked sites. • Only one voice mail system can be installed in a NetLink application. An SV9100 NetLink network can consist of sites that are equipped with both CP20 CPU Blades and CP10 CPU Blades. All sites in a combined CP20-CP10 network must have system software 10.0 or higher. The main NetLink site (and any "Failover" sites, see below) must be equipped with a CP20 CPU. Failover: The main site controls all of the sites in a NetLink network. If the main site goes down or the IP connection to it goes down, the entire network is disabled. However, a secondary site can be designated as a "Failover" site (or temporary main site), and that site will take over control of the remaining network until the main site is operational again. Any secondary site that is designated as a Failover site must be equipped with a CP20 CPU. The NetLink Remote Node License is included in the NetLink Remote Site System Package. NOTE: NetLink applications generally require a managed network, such as MPLS or point-to-point with QoS.	SV9100 NetLink Node-Lic 01	420.00	$294.00

BE114066	640797	CCIS Networking Channel License	(1) required per CCIS channel. Includes (1) IP channel (for the IPLE VoIP Board). For SV9100E systems and SV9100S systems equipped with IPLE Daughter Board. CCIS (K-CCIS-IP) networking allows the connection of an SV9100 system to another SV9100 system (equipped with a CP20 or CP10 CPU), and/or to an NEC SV9300, SV9500, SV8100, SV8300, SV8500, NEAX IPS & IPX, and SV7000. CCIS can only be implemented in SV9100 systems that are equipped with an IPLE Daughter Board (BE113281).One CCIS Networking License is required per CCIS channel. For other NEC systems in the CCIS Network, refer to the appropriate technical documentation for system and license requirements. A maximum of (255) sites per CCIS network is allowed. (1) IP Channel (for the IPLE VoIP Daughter Board) is provided with each SV9100 CCIS Networking License. Each CCIS channel requires (1) Resource License (BE114042). Centralized Voice Mail Notes: When a centralized voice mail (InMail or UM8000) is used in a CCIS network application, each remote SV9100 site must have a Productivity License, User License, or VM Box License for each remote site user that will be using the centralized voice mail. In addition, the SV9100 CP20 site that has the centralized voice mail must also have a Productivity license for every remote site user. This means that each remote site user actually utilizes (2) Licenses. The SV9100 CP20 site that has the centralized voice mail only requires (1) Productivity License for each of its local users. BE114082	640801	VRS 1-Port License	Provides the following VRS features: ☐ Automated Attendant (without voice mail) ☐ Messages (General Message, AA Greetings, Preamble Message, Contact Center Delay Announcements, Hotel/Motel Wake-Up Call Message, Waiting Message) ☐ Park and Page ☐ Music-on-Hold (Message-on-Hold) – Requires only (1) VRS License to handle all system trunks ☐ System Voice Prompts Expandable from (1) to the maximum of (16) VRS ports. VRS hardware is already included in the system, provided by the 2G or 8G SD card on the CPU, so only VRS licenses are required to activate the feature. (26) languages can be activated per Subscriber Mailbox, Routing Mailbox, or Group Mailbox. VRS ports are dynamically allocated in conjunction with InMail ports. Example: If (8) VRS ports are added to the system's (16) InMail ports (combined total of 24), and (12) InMail ports are currently in use, only (4) ports will be available for VRS. In this same application, when (6) VRS ports are in use, only (10) ports are available for InMail.	SV9100 InMail VRS Port-Lic 01	26.00	$18.20

BE118841	N/A	SV9100 InScheduler/Remote Conference License Bundle	Browser-based Lua application that allows scheduling of conference calls, using the SV9100 Remote Conference Feature. If video conferencing is required, the appropriate quantity of Video Conference/WebRTC licenses (BE115845) is also required (4 are provided at no charge.) Includes: •(1) Lua InScheduler License (Cannot be ordered separately) •(1) SV9100 Remote Conference License (see description below) •(1) InMail VM Box License (Required to set the recording option) •(1) VRS 1-Port License (Required to set password & pin) Additional Remote Conference Licenses can be added, as required. Features: Schedule – User can schedule a new conference Conference List – User can see a list of their scheduled conferences Connection can be via dial-in for audio-only or via WebRTC for video. System must be equipped with the CP20 CPU Blade, with R10 or higher system software. Supported Browsers: Google Chrome 30 +, Firefox, Safari	SV9100 Remote Conf-Pkg Lic	473.00	$331.10
BE114073	640784	SV9100 Remote Conference License	Provides the ability to call directly into a conference call by dialing a Remote Conference pilot number and entering a password. Works with the SV9100's built-in conference feature only. Max (20) Remote Conference Calls per system. This license only works with the SV9100's built-in conference feature, which provides no amplification or adjustment for poor audio quality on the associated trunks. Degradation in the audio quality may become more noticeable when a large quantity of trunks are conferenced. If large quantities of trunks are needed, the NEC Meeting Center may provide a better conferencing solution. Each conference call that will accept remote callers requires (1) license. Maximum (32) remote callers per conference call. Maximum (96) combined total of callers per system. (1) Remote Conference License is also required if system is equipped with the SV9100 Video MCU License (BE114070). One license required per Remote Conference Call. At least (1) VRS Port License (BE114082) is required, because the VRS provides guidance prompts for the callers. The recording feature uses one circuit in the conference, which reduces the maximum of callers in a Remote Conference call to (31). The SV9100 must be equipped with the R3 or higher version license and R3 or higher system software. Remote Conference Recording – A Remote Conference can be recorded into a licensed InMail mailbox (not a Group Mailbox) – max of 65 minutes. Q24-FR000000136386	N/A	NEC Meeting Center XMP Server 3 Blade	NEC Meeting Center (NMC) provides sophisticated audio conferencing, Mass Notifications, Firebar (Emergency) conferencing, web collaboration, and with release 9, Video Collaboration. The NMC XMP replaces the previous version of NMC, which is no longer available. The NMC XMP version is offered in a single 8-port configuration, which can be expanded in increments of (1) or (8) up to the maximum of (32) ports, if using the NMC XMP Server 3 Blade or (384) if using an external Linux-based server/PC. Multiple simultaneous conferences can be created – up to the combined total of equipped ports (maximum 32). The NMC XMP is offered in two levels of operation: • Basic operation – audio conference only (replaces the RGA Conference Bridge) • Full feature operation – audio conference with Web Collaboration, Firebar Conferencing, and Mass Notification Every application must begin with the NMC XMP Server 2 Blade (or an external Linux-based server) and an 8-Port Audio-only Conference License. Then, additional audio-only ports can be added – and/or – the ports can be upgraded to full operation. IP Channels, Essential Licenses, Resource Licenses – An IP channel is required for each NMC port. For audio-only applications, an 8-port IP Channel-only License (BE117877 – cannot be purchased separately) for the first (8) NMC XMP ports will be provided at no charge in Studio if the NMC is purchased with a new SV9100 system. An Essential License (BE119590) is required for each audio-only port after the initial (8) ports, to provide the IP channel and a Resource License. Q24-DN000000120213	N/A	SV9100 Multi-Line Client (MLC) 1-User Activation License	This license, in conjunction with the associated NEC MLC Mobile App (see below), integrates the traditional office desktop telephone with the user's smart device, Mac, or PC. Provides a SIP Softphone with multiline functionality for: • iPhone® and iPad® • Android™ Phone and Android™ Tablet • Mac with OSX (10) • PC with Windows 7 or 10 – Home, Professional, and Server versions Allows connection of the supported smart device to the SV9100 over the customer's WiFi network. When off-site, the MLC connection must be made via VPN or NAT for cell phone or tablet and via VPN for Mac or PC. Refer to the NEC NTAC Website (www.necNTAC.com) for NAT compatibility requirements. Be cautious when off-site and not using WiFi, because the data plan of the associated cell phone will be utilized, and therefore a cost might be incurred. Provides (32) Programmable line/feature keys. Bluetooth compatible with smart devices and Macs, but not Bluetooth compatible with PC's. The following functions are allowed: - Answer incoming calls to the associated SV9100 system directly from smart device or Mac/PC. - Make calls from the smart device using the SV9100's outside lines, masking your personal cell phone number. - Use the smart device, Mac or PC through WiFi at the office, at home, or at a public hotspot (VPN is required). - Hold calls & transfer calls to other SV9100 stations. - Access the SV9100 voice mail from the smart device, Mac or PC. One MLC license required per user, but can be shared between multiple devices that have the same profile configuration – but cannot be used not simultaneously. For example, one MLC Client can be used on an iPhone, an iPad, and a Mac. IMPORTANT: MLC Licenses expire (5) years after activation in the app! After (5) years, a new MLC License must be purchased. BE119003	N/A	DCK 60-Button DSS Console (BK)	Equipped with (60) buttons that provide single-button access to extensions, trunks, and system features, when used in conjunction with either of the following endpoints: -DT530 (Digital 12/24-Button) -DT930 (IP 24-Button & Touch-Panel) Unlike previous DSS Consoles, this version is free-standing. The DSS can also be physically attached to a DT920 IP Endpoint, but the DSS must be connected to a digital station port. Not compatible with DT310, DT410, DT710, DT730, DT750, DT820, DT830, and DT920 endpoints (see DT920 note above). When used with an IP endpoint: -Connects directly to the IP endpoint, using a special 5-inch cord which is provided with the DSS Console. -Attaches to the endpoint or, if on a DT930 24-Button Endpoint, can be connected to the endpoint's optional 8-Button Key Assembly. -Requires an AC adapter (AC-Z BE115923). When used with a digital endpoint: -Attaches to the endpoint or the endpoint's optional 8-Button Key Assembly, but connects to a separate digital station port. -Does NOT require an AC Adapter – unless the DSS station cable is longer than 2,950 feet. Contains built-in wall-mount. Note: When connected to an endpoint that is equipped with an APR, ADA or WFA adapter, a DSS Wall Mount Adapter (BE107666) is required. BE109741	922450	Analog Doorchime Box	Surface-mount audio Doorchime Box. When its call button is pressed, it sends chime tones to designated extensions. Extension user lifts the handset to speak with the visitor. Extension user can also initiate a call to the Doorchime Box. If the associated door is equipped with an electric door-strike, the associated Doorbox adapter (BE107079) can provide a normally-open relay contact to activate it, allowing the visitor to enter. The extension user activates the door-strike by pressing the "Flash" key. Refer to the SV9100 tech manuals for specifications. Maximum (8) per system. * (6) chime tones available. Color: Dark Brown Dimensions: 3¾" W x 5" H x 1" D Requires Doorbox/Page/Audio Adapter (BE107079). Replaces BE106914 (formerly 721160)	Doorchime Box	80.00	$56.00
BE112222	670553	IP Video Doorbox	Provides audio and video communication. Image from Video Doorbox can be viewed using the no-charge DR-Viewer Application (installed on up to 8 PC's in the same network). Contains two relay contacts (one normally open & one normally closed) for door strike operation. These can only be activated from an SV9100 terminal. Requires standard LAN cable and requires IP connection to the SV9100. Must be powered by an 802.3af PoE data switch or a PoE Injector. The system must be equipped with an IPLE VoIP Daughter Board. Surface-mount. Combined system maximum of (8) Analog and IP Video Doorboxes. Requires an Essential License (BE119590), which includes an IP Terminal License and a Resource License. Does NOT require a Doorbox Adapter. Color: Gun-metal/Black. Dimensions: 5.9" H x 3.94" W x 2.1" D. Requires standard LAN cable. System must be equipped w/ IP Resource Daughter Board. Caution: Requires surface-mount installation, but can be flush-mounted, using optional wall cover, below. Removal of mounted IP Video Doorbox allows access to the network LAN cable as well as the door strike contacts, which may result in a security issue. Q24-FR000000135343	N/A	FA100CS Facial Authentication Access System	Android tablet-based facial authentication application, utilizing SV9100 resources to manage access to restricted areas – using NEC's highly accurate facial recognition technology. Provides automated entry access to an internal door by photographing the user and comparing the photo to a database of authorized personnel profiles. A matching photo enables a contact closure in the SV9100 system, which in turn activates the associated door strike, allowing entry. Manage usage of building assets such as freight elevators, teacher lounges, study rooms, executive conference rooms, corporate gyms, lunch rooms, hospitality concierge floor and more… Up to (9) FA100CS can be installed per SV9100 system. One of the (9) General Purpose Relay Contacts that can be provided by the SV9100 system must be assigned to each FA100CS. (1) relay contact is provided on the CPU and up to (8) relay contacts can be provided using the appropriate quantity of the 2-port Doorbox/Page/Audio Adapter (PGD(2)-U10 ADP). Supports a 300-picture system-wide database. Sends user information and authentication emails for tracking purposes and history retention. Associated software must be installed on a PC that is on the same network as the FA100CS. The ST500 is pre-loaded on the tablet, and is used to: • Activate the SV9100 relay contact that triggers the door strike • Contact the SV9100 attendant when access is denied. The SV9100 system must be equipped with an IPLE and each tablet requires (1) Essential License (BE119590), which includes an IP Terminal License and a Resource License. A tablet-compatible wall-mount is suggested (optional, see below). The FA100CS is not eligible for ESPP (5-year hardware warranty). Note that the FA100CS cannot detect spoofing with 100% accuracy. BE118719	N/A	SV9100 InDECT Management License	Provides access to the InDECT application, which resides on the SV9100 CP20 CPU. InDECT is a Lua application that is used to make it easier to configure and maintain IP DECT applications (enter license info, extension numbers, subscribe handsets, etc.) when using the AP400-type Access Points and IP DECT handsets. This is a standard LMS-type system-wide license. One required per site. The SV9100 CP20 must have system software 10.30.50 or higher. Notes: When using InDECT, the maximum quantity of allowed IP DECT handsets is 64! Some IP DECT features, such as the SOS Emergency Key and Messaging are not supported when using the InDECT application (For the messaging feature, DMLS integration is required, as well as an external Messaging Server. Also, InDECT cannot be used If there are IP DECT AP's and handsets in a remote or branch location (CCIS or NetLink). In the above situations, the full DAP Manager will be required, instead of InDECT. DAP Manager is a much more complex method of IP DECT deployment, and requires an external PC for administration. See the main IP DECT Price List for details). NOTE: The InDECT License CANNOT be used with the CP10 CPU.	InDECT Mgmt Lic	26.00	$18.20

Q24- FR000000136018	N/A	AP400C IP-DECT Wireless Access Point (DAP)	For SV9100 sites with up to (10) access points. Each site requires a PARI LMS Code (Q24-DN000000120247). The AP400S type access point: • Support up to (11) simultaneous calls with seamless handover between access points. • Connect to the SV9100 with Cat5 or Cat6 cabling (AP400's manufactured after Feb 2018, can also use Cat7 cabling.) • Must be powered by PoE (PoE switch or PoE injector). • Are equipped with internal dual omni-directional antennas. • Are equipped with hardware that allows for wall-mounting or ceiling mounting. AP400 access points are compatible with both Standard SIP and iSIP protocols. The G277 (and G266) handset uses Standard SIP and therefore operates like a single-line telephone. The G577 (and G566) and i766 handsets use the NEC iSIP protocol, allowing for integration with SV9100 system features via the (4) Programmable Function Keys on the handsets. Both protocols can be used simultaneously, so all three handset types can be used on the same system. Configuration requires the InDECT Management License (BE118719). AP400 dimensions: Mounted horizontally: 5.75 inch x 5.8 inch x 2.7 inch Mounted Vertically: 5.75 inch x 6.85 inch x 1.7 inch The SV9100 system must be equipped with an IPLE Daughter Board. If the SV9100 system equipped with a CP20 CPU, each Handset requires an Essential License (BE119590). If it is equipped with a CP10 CPU, each IP DECT Handset requires a Resource License (BE114042) and a Standard User License (BE114153). Refer to installation manual for coverage specifications. It is recommended that any AP400 be placed at least 16 feet from another AP400 or a WiFi access point. For indoor installation only. Outdoor applications require the Outdoor Enclosure (Q24-FR000000113080).	AP400C	590.00	$413.00

Additional Comments

* 35% off NPL is the minimum discount that Info Solutions will pass on to the agency. Info solutions will continue to work with the manufacturers in an effort to obtain the best possible price to all for additional agency savings.

** Cisco and Non- Cisco options for IVR solutions are available, Cisco solutions have a greater discount value off NPL

*** Info Solutions' pricing is based on Cisco's current published National Price List (NPL)

Typically Cisco and Avaya will have 1-2 National Price List (NPL) adjustments annually
